Quality assurance plan for the Close Support Laboratory for the remedial investigation at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:12658 (R;US)

Pennsylvania State Univ., University Park, PA (United States)
In-situ characterization of growth and interfaces in a-Si:H devices: Annual subcontract report, 1 May 1992–30 April 1993, 19:11949 (R;US)

Pennsylvania State Univ., University Park, PA (United States). Coal and Organic Petrology Labs.
Establishment and maintenance of a coal sample bank and data base: Final report, April 8, 1988–September 28, 1993, 19:11505 (R;US)

Pennsylvania State Univ., University Park, PA (United States). Dept. of Materials Science and Engineering
Semiconductor electrochemistry of coal pyrite: Technical progress report, July–September 1993, 19:12676 (R;US)

Semiconductor electrochemistry of coal pyrite: Quarterly technical progress report, July–September 1993, 19:11482 (R;US)

Pittsburgh Univ., PA (United States)
[Studies of the fundamental nature of catalytic acidity, sites and intermediates]: Final performance (technical progress) report, 19:12673 (R;US)

Princeton Univ., NJ (United States). Dept. of Chemical Engineering
[Molecular interactions in dilute supercritical mixtures: Molecular dynamics investigation]: Final technical report, December 1, 1990–August 31, 1993, 19:13879 (R;US)

Princeton Univ., NJ (United States). Dept. of Chemistry
Analysis of forward and inverse problems in chemical dynamics and spectroscopy: Progress performance report, November 1, 1992–October 31, 1993, 19:12705 (R;US)

Princeton Univ., NJ (United States). Joseph Henry Labs.
Development and application of photosensitive device systems to studies of biological and organic materials: Progress report, January 1, 1993–December 31, 1993, 19:12935 (R;US)

Princeton Univ., NJ (United States). Plasma Physics Lab.
Are the invariance principles really truly Lorentz covariant?, 19:13474 (R;US)
Frequency-sweeping: A new technique for energy-selective transport, 19:14067 (R;US)
Lower Hybrid Current Drive and ion Bernstein wave heating experiments on PBX-M, 19:14064 (R;US)
Performance of the PBX-M passive plate stabilization system, 19:14066 (R;US)
Periods of enhanced transport during H-mode in PBX-M, 19:14065 (R;US)
The TPX magnet R&D program, 19:14201 (R;US)

Process Technology, Inc., Calumet, MI (United States)
Bench-scale testing of on-line control of column flotation using a novel analyzer: Revised final report, [October 1992–October 1993]: Volume 1, 19:11415 (R;US)

R

Radian Corp., Austin, TX (United States)
Field study of disposed solid wastes from advanced coal processes: Annual report, October 1, 1992–September 30, 1993, 19:11490 (R;US)

Radiation Effects Research Foundation, Hiroshima (Japan)
Adult health study report 7. noncancer disease incidence in the atomic-bomb survivors, 1958-86 (examination cycles 1-14), 19:13309 (R;JP)
Application of generalized estimating equations to a study in vitro of radiation sensitivity, 19:13308 (R;JP)
Autoantibodies and immunogiobulins among atomic-bomb survivors, 19:13310 (R;JP)
Combining diagnostic categories to improve agreement between death certificate and autopsy classifications of cause of death for atomic bomb survivors, 1950-87, 19:13313 (R;JP)
Correcting for catchment area nonresidency in studies based on tumor-registry data, 19:13306 (R;JP)
Differential effects of atomic bomb irradiation in inducing major leukemia types: Analyses of open-city cases including the Life Span Study cohort based upon updated diagnostic systems and the dosimetry system 1986(DS86), 19:13311 (R;JP)
Radiation-related ophthalmologic changes and aging among the atomic bomb survivors: A re-analysis, 19:13314 (R;JP)
Radon concentrations in residential housing in hiroshima and nagasaki, 19:13059 (R;JP)
Simple, rapid HLA-DQA1 genotyping using the polymerase chain reaction and analysis by single-strand conformation polymorphism and restriction-enzyme cleavage, 19:13312 (R;JP)
The influence of death-certificate errors on cancer mortality trends, 19:13307 (R;JP)

Raytheon Services Nevada, Las Vegas, NV (United States)
Tomographic data developed using the ABEM RAMAC borehole radar system at the Mixed Waste Landfill Integrated Demonstration, 19:11834 (R;US)

Rensselaer Polytechnic Inst., Troy, NY (United States). Dept. of Chemical Engineering
Chemical interactions between protein molecules and polymer membrane materials: Annual progress report, August 1, 1992–July 30, 1993, 19:13139 (R;US)

Research Inst. of Scripps Clinic, La Jolla, CA (United States). Dept. of Cell Biology
[Genetic engineering with a gene encoding a soybean storage protein to identify DNA sequences to control its expression]: Annual report, 1993, 19:13140 (R;US)

Reynolds Electrical and Engineering Co., Inc., Las Vegas, NV (United States)
CASCADER: An m-chain gas-phase radionuclide transport and fate model: Volume 2, User's manual for CASCADR8, 19:13070 (R;US)
Hydrogeologic data for existing excavations and the Area 5 Radioactive Waste Management Site, Nevada Test Site, Nye County, Nevada, 19:11686 (R;US)
Operational air sampling report: [Semiannual report], January 1–June 30, 1993, 19:13038 (R;US)

Reynolds Electrical and Engineering Co., Inc., Las Vegas, NV (United States). Waste Operations Dept.
CASCADER: An M-chain gas-phase radionuclide transport and fate model: Volume 4 – Users guide to CASCADR9, 19:11799 (R;US)

Risoe National Lab., Roskilde (Denmark)
MOHAWC. Models of human activities in work contexts, 19:12189 (R;DK)

Risoe National Lab., Roskilde (Denmark). Materials Dept.
Decommissioning of the Risoe Hot Cell facility: 6. Periodic report covering January 1 to June 30, 1993, 19:13315 (R;DK)

Risoe National Lab., Roskilde (Denmark). Systems Analysis
Hazard identification based on plant functional modelling, 19:12740 (R;DK)

Rochester Univ., NY (United States)
Main research accomplishments since the grant was last reviewed competitively: [Final technical progress report, November 1, 1992–July 31, 1993], 19:13141 (R;US)

S

San Francisco State Univ., CA (United States). Dept. of Physics and Astronomy
Research in theoretical high-energy physics: Progress report, September 1992–September 1993, 19:13489 (R;US)

Sandia National Labs., Albuquerque, NM (United States)
A compendium of solar dish/Stirling technology, 19:11952 (R;US)
A complete algorithm for synthesizing modular fixtures for polygonal parts, 19:12743 (R;US)
A global motion planner for curve-tracing robots, 19:12744 (R;US)
A model for forming airborne synthetic aperture radar images of underground targets, 19:13024 (R;US)
A new analysis of the Vixen A Trials, 19:11811 (R;US)
A numerical study of bench blast row delay timing and its influence on percent-cast, 19:11510 (R;US)
A strategy for analysis of TRU waste characterization needs, 19:11757 (R;US)
A study of geothermal drilling and the production of electricity from geothermal energy, 19:11959 (R;US)
A working example of RTDP/industry cooperation-CCA productization, 19:11744 (RA;US)
Advances in MOVPE compound semiconductor epitaxy manufacturing technology: From high throughput large area reactors to cluster tools, 19:13887 (R;US)
An $\Omega(\sqrt{\log \log n})$ lower bound for routing in optical networks, 19:14266 (R;US)
An application reference model for layered manufacturing, 19:12751 (R;US)
An approach to establishing cooperative R&D projects with Russian Institutes, 19:11754 (R;US)
An efficient hybrid planner in changing environments, 19:12745 (R;US)
An integrated approach to the characterization and decontamination of uranium contaminated soils, 19:11812 (R;US)

An interactive Virtual Reality simulation system for robot control and operator training, 19:12747 (R;US)
An investigation of airborne GPS/INS for high accuracy position and velocity determination, 19:12997 (R;US)
An overview of the Accident Response Mobile Manipulation System (ARMMS), 19:12750 (R;US)
Analysis of the photodiode boundary layer transition indicator, 19:12986 (R;US)
Applications of solar reforming technology, 19:11954 (R;US)
Appropriateness of one-dimensional calculations for repository analysis, 19:11755 (R;US)
Arithmetic averaging: A versatile technique for smoothing and trend removal, 19:14267 (R;US)
Assessment of hoist failure rate for Payload Transporter III, 19:13008 (R;US)
Autosim user guide, 19:13013 (R;US)
BARS/SSC/SPHINX4.0: BARS Bibliographic Data Retrieval System, 19:14246 (CM;US)
Blind deconvolution of two-dimensional complex data, 19:14265 (R;US)
Bounds on least-squares four-parameter sine-fit errors due to harmonic distortion and noise, 19:12752 (R;US)
Cable discharge system for fundamental detonator studies, 19:13014 (R;US)
Characterization of the SPR II generated radiation environments next to and within a guidance system, 19:12245 (R;US)
Characterization of thermally stable dye-doped polyimide based electrooptic materials, 19:12620 (R;US)
Chemisorbed-molecule potential-energy surfaces and electronically- stimulated processes, 19:13888 (R;US)
Complete model description of an electron beam using ACCEPT Monte Carlo simulation code, 19:13824 (R;US)
Considerations for guidance for radioactive waste disposal arising from rules under 40 CFR 191 and 40 CFR 194, 19:11752 (R;US)
Contaminant analysis automation, 19:11746 (RA;US)
Coproduction of electric power and Fischer-Tropsch products (CATL-078), 19:12035 (R;US)
Cross cutting and advanced technology development, 19:11749 (RA;US)
Decontamination and dismantlement, 19:12280 (RA;US)
Design and evaluation of coils for a 50 mm diameter induction coilgun launcher, 19:12906 (R;US)
Design considerations in Li/$SOCl_2$ battery technology, 19:12294 (R;US)
Design optimization analysis of the new SPR III-M reactor, 19:12246 (R;US)
Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers, 19:12663 (R;US)
Development of techniques for tagging precursor and essential chemicals, 19:12664 (R;US)
Development, characterization, and applications of high temperature superconductor nanobridge Josephson junctions, 19:13922 (R;US)
Dilation-induced permeability changes in rock salt, 19:11753 (R;US)
Dual-benefit technologies at Sandia National Laboratories, 19:12323 (R;US)
Engineered Porous Materials EXPO '93, 19:12475 (R;US)
Experimental measurement of dynamic failure and fragmentation properties of metals, 19:12536 (R;US)
Experimental survey of the L-H transition conditions in the DIII-D tokamak, 19:13951 (R;US)
Feature discovery in gray level imagery for one-class object recognition, 19:12998 (R;US)
FWP executive summaries: Basic Energy Sciences/Materials Sciences Programs (SNL/NM), 19:12476 (R;US)
Gettering of metal impurities by cavities in silicon, 19:12535 (R;US)
High temperature ductility loss in titanium alloys – A review, 19:12537 (R;US)
Impact analysis of Minuteman III Payload Transporter Type III, 19:13015 (R;US)
Information systems to enhance technology exchange, 19:13030 (R;US)
Initial performance assessment of the disposal of spent nuclear fuel and high-level waste stored at Idaho National Engineering Laboratory: Volume 2: Appendices, 19:11751 (R;US)
Integrated alarm annunciation and entry control systems – Survey results, 19:11878 (R;US)
Integrated safety program for the Nuclear Electric Propulsion Space Test Program, 19:12281 (R;US)
ITS Version 3.0: Powerful, user-friendly software for radiation modelling, 19:13823 (R;US)
Laser beaming demonstrations to high-orbit satellites, 19:12742 (R;US)
Long-term sealing analyses for US Strategic Petroleum Reserve (SPR) caverns, 19:11583 (R;US)
Medical isotope production: A new research initiative for the Annular Core Research Reactor, 19:12247 (R;US)
Metal-ion spin-on glasses: Novel materials for active waveguides, 19:12817 (R;US)
Model for heat-up of structures in VICTORIA, 19:12279 (R;US)
Modelling dose distribution in tubing and cable using CYLTRAN and ACCEPT Monte Carlo simulation code, 19:13825 (R;US)
Multiple size scale structures in silica/siloxane composites studied by small-angle scattering, 19:12621 (R;US)
Note on the variance of autospectral density processed using Welch's method, 19:14269 (R;US)
Novel failure analysis techniques using photon probing with a scanning optical microscope, 19:13900 (R;US)
Nucleation and growth of cubic boron nitride films produced by ion-assisted pulsed laser deposition, 19:12588 (R;US)
OTD Robotics Technology Development Program Overview, 19:11743 (RA;US)
Packaging design guide of the Packaging Advisory Board: A broad range of lessons learned in the design of weapon systems, 19:13012 (R;US)
Parallel particle simulations of low-density fluid flows, 19:12773 (R;US)
Performance assessment of the Greater Confinement Disposal facility on the Nevada Test Site: Comparing the performance of two conceptual site models, 19:11750 (R;US)
Performance of an induction coil launcher, 19:12828 (R;US)
Performance of Sequoyah Containment Anchorage System, 19:12142 (R;US)
Portable, solid state, fiber optic coupled Doppler interferometer system for detonation and shock diagnostics, 19:13020 (R;US)
Practical hot oiling and hot watering for paraffin control, 19:11558 (R;US)
Preliminary characteristics and development report MC4231 Cap Release, MC4248 Actuator, 19:13005 (R;US)
Projectile transverse motion and stability in electromagnetic induction launchers, 19:12829 (R;US)
Pulsed power systems for environmental and industrial applications, 19:12434 (R;US)
Purchasing and Materials Management Organization, Sandia National Laboratories annual report, fiscal year 1993, 19:14226 (R;US)
Random patterns and biometrics for counterfeit deterrence, 19:12470 (R;US)
Real-time seam tracking for rocket thrust chamber manufacturing, 19:12746 (R;US)
Sandia Technology engineering and science accomplishments, 19:12749 (R;US)
Solar activities at Sandia National Laboratories, 19:12350 (R;US)
Superconducting active impedance converter, 19:12813 (PA;US)
System requirements for laser power beaming to geosynchronous satellites, 19:12287 (R;US)
Tank waste retrieval, 19:11745 (RA;US)
The advent of failure analysis software technology, 19:12819 (R;US)
The National Center for Advanced Information Components Manufacturing: Program update, 19:12324 (R;US)
The relative performance of FeS_2 and CoS_2 in long-life thermal-battery applications, 19:13016 (R;US)
THERM3D – A boundary element computer program for transient heat conduction problems, 19:12774 (R;US)
Thermal performance of a depleted uranium shielded storage, transportation, and disposal package, 19:11756 (R;US)

Thin-film decoupling capacitors for multi-chip modules, 19:12818 (R;US)
Three-dimensional shock wave physics simulations with PCTH on the paragon parallel computer, 19:13006 (R;US)
Toxicity evaluation and hazard review for Rigid Foam, 19:13322 (R;US)
Travel to Austria to participate in DOE/IS-40's presentations: Foreign trip report, October 11, 1993–October 16, 1993, 19:11872 (R;US)
Travel to Europe to attend the AGARD Fluid Dynamics Panel Symposium: Foreign trip report, October 2–21, 1993, 19:12762 (R;US)
Travel to Germany to attend the 44th Aeroballistics Range Association (ARA) meeting: Foreign trip report, September 11, 1993–September 25, 1993, 19:12761 (R;US)
Travel to Sweden to participate as a Principal Member of the ATM Forum: Foreign trip report, 14 November 1993–21 November 1993, 19:14243 (R;US)
Use of inelastic design for radioactive material transportation packages, 19:12741 (R;US)
Using an Augmented Lagrangian Method and block fracturing in the DDA method, 19:11742 (R;US)
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems, 19:13007 (R;US)
Utility Battery Storage Systems Program report for FY93, 19:12034 (R;US)
Utilizing a Russian space nuclear reactor for a United States space mission: Flight qualification issues, 19:12161 (R;US)
Varying execution discipline to increase performance, 19:14268 (R;US)
Waste facility operations, 19:11747 (RA;US)
Waste processing operations, 19:11748 (RA;US)
Whole arm obstacle avoidance for teleoperated robots, 19:12748 (R;US)

Sandia National Labs., Livermore, CA (United States)
A genetic algorithm based method for docking flexible molecules, 19:13148 (R;US)
Compilation of diamond-like carbon properties for barriers and hard coatings, 19:12622 (R;US)
Process Waste Assessment for the Diana Laser Laboratory, 19:11758 (R;US)
Tearing resistance of a thin shell against projectile penetration: Material property effects, 19:12999 (R;US)
The decomposition of methyltrichlorosilane: Studies in a high-temperature flow reactor, 19:12708 (R;US)
The history of NATO TNF policy: The role of studies, analysis and exercises conference proceedings: Volume 3: Papers by Gen. Robert C. Richardson III (Ret.), 19:12328 (R;US)
The role of variation, error, and complexity in manufacturing defects, 19:12753 (R;US)

Sao Paulo Univ., Piracicaba, SP (Brazil). Escola Superior de Agricultura Luiz de Queiroz
Impurities in sugar cane and their influence on industrial processing evaluated by nuclear techniques, 19:12642 (I;BR;In Portuguese)

Sao Paulo Univ., Sao Carlos, SP (Brazil). Inst. de Fisica e Quimica
Experimental determination of the radiation dose distribution in heterogeneous medium submitted to gamma and x-rays, 19:13262 (I;BR;In Portuguese)
Influence of quantum noise on radiological images, 19:13162 (I;BR;In Portuguese)
Spin glass: thermal properties and characterization of the $\pm$ J Sherrington-Kirkpatrick model partition function zeros, 19:13399 (I;BR;In Portuguese)
Studies on atom deceleration process by using the Zeeman-tuned technique, 19:13841 (I;BR;In Portuguese)

Sao Paulo Univ., SP (Brazil). Inst. de Fisica
Gamma-gamma angular correlation measurement in the ^{100} Ru, 19:12945 (I;BR;In Portuguese)
Magnetic surfaces of toroidal helical fields in tokamaks, 19:13953 (I;BR;In Portuguese)
Massless quantum electrodynamics: a variational study, 19:13497 (I;BR;In Portuguese)
Position sensitive x-ray detector, 19:12944 (I;BR;In Portuguese)
Site populations analysis of the $Sm_2(Co,Fe)_{17}$ alloys using Moessbauer spectroscopy, 19:13893 (I;BR;In Portuguese)
Study of thermoluminescence in K Cl crystals doped with Sr^{2+}, 19:13903 (I;BR;In Portuguese)
Two models 1/N treatment in quantum field theory: O(N) x O(N) and Thirring model, 19:13461 (I;BR;In Portuguese)

Science Applications International Corp., Englewood, CO (United States). Foreign Systems Research Center
N-STAR/IMAGE Project: Final report, 19:12327 (R;US)

Science Applications International Corp., Las Vegas, NV (United States)
Carbon-14 releases from an unsaturated repository: A senseless but expensive dilemma, 19:11667 (R;US)

Science Applications International Corp., Oak Ridge, TN (United States)
Environmental Monitoring Plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:11687 (R;US)

Secretariat d'Etat a la Recherche, Algiers (Algeria)
Determination of alkylphosphates esters by complexation with perchloric acid: Application to the determination of TBP and derivatives in the synthesis mixtures, 19:12671 (R;DZ;In French)
Pharmacokinetics of 125-I-labelled meta-iodo-benzyl-guanidine : Preliminary results, 19:13270 (R;DZ)

Service Central de Protection contre les Rayonnements Ionisants, 78 - Le Vesinet (France)
Monthly results of measurements; April 1993, 19:13107 (R;FR;In French)

Smith International, Inc., Houston, TX (United States)
Steerable percussion air drilling system, 19:12784 (R;US)

Sociedade Brasileira de Ciencia e Tecnologia de Alimentos, Piracicaba, SP (Brazil)
Effects of gamma and microwave radiation over some biochemical properties of bean, before and during the storage, 19:13208 (I;BR;In Portuguese)
Effects of gamma and microwave radiation over the steadiness of beans grains, before and during the storage. Relation between the sensorial and instrumental measures, 19:13209 (I;BR;In Portuguese)
Evaluation of phenolic, tannin and phytate participation on iron bioavailability in irradiated beans, 19:13206 (I;BR;In Portuguese)
Storage effect over the cooking time and tannin and phenolic tenors of irradiated beans, 19:13207 (I;BR;In Portuguese)

Winter fuels report, week ending March 4, 1994, 19:11571 (R;US)
Winter fuels report, week ending March 11, 1994, 19:11572 (R;US)

USDOE Environmental Measurements Lab., New York, NY (United States)
Low power, constant-flow air pump systems, 19:12990 (R;US)

USDOE Morgantown Energy Technology Center, WV (United States)
A calcium oxide sorbent process for bulk separation of carbon dioxide, 19:12078 (RA;US)
A coal-water slurry fueled internal combustion engine and method for operating same, 19:12451 (PA;US)
A gas stream clean-up filter and method for forming same, 19:11464 (PA;US)
A sorbent injection and filtration process for H_2S removal from hot gas, 19:12069 (RA;US)
A utility's perspective of the market for IGCC, 19:11988 (RA;US)
Advanced hybrid gasification facility, 19:12065 (RA;US)
Advanced research and technology development of MCFCs, 19:12372 (RA;US)
Advanced turbine systems - studies and conceptual design, 19:12007 (RA;US)
Advanced turbine systems program, 19:12006 (RA;US)
Air extraction in gas turbines burning coal-derived gas, 19:12028 (RA;US)
Alternative high temperature gas piping systems for PFBC, 19:12002 (RA;US)
Alternative materials for solid oxide fuel cells: Processing and interactions of materials, 19:12369 (RA;US)
Applications of moving granular-bed filters to advanced systems, 19:12088 (RA;US)
Catalytic membranes for facilitating the water-gas shift reaction, 19:11997 (RA;US)
Ceramic filter material issues, 19:12093 (RA;US)
Ceramic filters for removal of particles from hot gas streams, 19:12095 (RA;US)
Ceramic retrofit program, 19:12009 (RA;US)
CO_2/sand fracturing in Devonian shales, 19:11594 (R;US)
Coal ash behavior in reducing environments, 19:12068 (RA;US)
Coal future, the impact of IGCCs and PFBCs, 19:11990 (RA;US)
Coal-fueled diesel engines for locomotive applications, 19:12448 (RA;US)
Collaborative advanced gas turbine program, 19:12011 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel and a rich-quench-lean combustor, 19:11996 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel from a fixed bed gasifier, 19:12026 (RA;US)
Commercialization of coal diesel engines for non-utility and export power markets, 19:12027 (RA;US)
Commercialization of fuel cells in the 21st century, 19:12366 (RA;US)
Contaminant effects in solid oxide fuel cells, 19:12365 (RA;US)
Desulfurization of hot fuel gas with Z-Sorb III sorbent, 19:12064 (RA;US)
Development and demonstration of a wood-fired gas turbine system, 19:12000 (RA;US)
Development of a dry-feed system for a coal-fired gas turbine, 19:12029 (RA;US)
Development of advanced gas turbine systems, 19:12003 (RA;US)
Development of an electrochemical hydrogen separator, 19:12082 (RA;US)
Direct coal-fired gas turbines for combined cycle plants, 19:12024 (RA;US)
DSRP, direct sulfur production, 19:12085 (RA;US)
Effects of operating conditions on dust cake behavior in filters with high surface-to-volume ratios, 19:12073 (RA;US)
Enhanced durability of desulfurization sorbents for fluidized-bed applications, 19:12062 (RA;US)
Evaluation of ceramic filter material, selection for application, 19:12094 (RA;US)
Evaluation of options for CO_2 capture/utilization/disposal, 19:12079 (RA;US)
Externalities: Impacts on IGCCs and PFBCs, 19:12055 (RA;US)
Fixed-bed testing of a molybdenum-promoted zinc titanate sorbent for hot gas desulfurization, 19:12076 (RA;US)
Fluid-bed HGD PDU, 19:12075 (RA;US)
Fuel cell handbook update, 19:12373 (RA;US)
Full-scale and bench-scale testing of a coal-fueled gas turbine system, 19:12022 (RA;US)
Functionally gradient materials for thermal barrier coatings in advanced gas turbine systems, 19:12017 (RA;US)
Gas fired advanced turbine system, 19:12005 (RA;US)
GE power generation technology challenges for advanced gas turbines, 19:12004 (RA;US)
General Electric hot gas cleanup and regeneration, 19:12060 (RA;US)
Government policy impact on coal and coal technology, 19:11531 (RA;US)
Heavy duty gas turbine combustion tests with simulated low BTU coal gas, 19:12025 (RA;US)
High pressure ceramic air heater for indirectlv-fired gas turbine applications, 19:12023 (RA;US)
High temperature hydrogen sulfide removal with tin oxide, 19:12084 (RA;US)
High temperature size selective membranes, 19:11998 (RA;US)
High temperature solid oxide fuel cell development activities, 19:12362 (RA;US)

High temperature solid oxide fuel cell-customer test units, 19:12364 (RA;US)
High-temperature H_2S-removal processes using limestones, 19:12071 (RA;US)
Hollow fiber catalytic membranes, 19:12066 (RA;US)
Hot coal gas desulfurization with manganese-based sorbents, 19:12086 (RA;US)
IGCC database and hot gas cleanup systems studies, 19:12081 (RA;US)
Industry/University consortium for ATS research, 19:12013 (RA;US)
Initial operation of the Tidd PFBC hot gas clean up filter, 19:12091 (RA;US)
Integrated low emissions cleanup system for multi-contaminant control, 19:12089 (RA;US)
Interface between a gas turbine and PFBC, 19:12021 (RA;US)
Land application uses of pressurized fluidized-bed combustion (PFBC) ash, 19:12059 (RA;US)
LASH oxidation, waste management, 19:12063 (RA;US)
Life prediction of advanced materials for gas turbine applications, 19:12019 (RA;US)
Low cost, radial flow, solid oxide fuel cell, 19:12370 (RA;US)
Macrocrylic redox promoters for methanol oxidation, 19:12374 (RA;US)
Materials/manufacturing element of the advanced turbine system program, 19:12010 (RA;US)
MCFC Power Plant System verification, 19:12360 (RA;US)
MCFC product development test, 19:12358 (RA;US)
Measurement and modeling of advanced coal conversion processes, 19:11999 (RA;US)
METC combustion research facility, 19:12008 (RA;US)
METC fluid-bed test rigs/test program, 19:12077 (RA;US)
METC research on coal-fired diesels, 19:12030 (RA;US)
Molten carbonate fuel cell product development test, 19:12359 (RA;US)
MSOFC development status, 19:12363 (RA;US)
NH_3/H_2S advances, 19:12083 (RA;US)
NO_x abatement in advanced gas turbines, 19:12020 (RA;US)
Novel concept for an on-line alkali monitoring probe, 19:12070 (RA;US)
On-line monitoring of mercury and hydrogen chloride in hot gases from coal gasifiers, 19:12072 (RA;US)
Optical sensor development for MCFCs: HCl detection through wavelength modulation diode laser absorption spectroscopy, 19:12375 (RA;US)
Overview of ERC's carbonate fuel cell development program, 19:12356 (RA;US)
Overview of M-C power's MCFC Power Generating System, 19:12357 (RA;US)
Overview: Utility market for advanced coal-fired systems, 19:11987 (RA;US)
Particle collection enhancement by acoustics, 19:12090 (RA;US)
Particulate characterization for PFBC filter systems, 19:12058 (RA;US)
Particulate control for coal-fueled diesel engine exhaust, 19:12449 (RA;US)
PCFB environmental performance and efficiency, the Pyropower perspective, 19:12056 (RA;US)
Perovskite solid electrolytes for SOFC, 19:12376 (RA;US)
Perspective of the market for PFBC, 19:11989 (RA;US)
Power systems development facility, PFBC system perspectives, 19:11994 (RA;US)
Premixed burner studies of NO_x formation and control, 19:12032 (RA;US)
Pressure-gain combustion, 19:12031 (RA;US)
Pressurized burner test facility, 19:12074 (RA;US)
Processing of $LaCrO_3$ for solid oxide fuel cell applications, 19:12371 (RA;US)
PyGas™ design support, 19:12001 (RA;US)
Reduction of turbine endwall total pressure loss and heat transfer using the iceformation design method, 19:12016 (RA;US)
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells, 19:12367 (RA;US)
Sealant research for solid oxide fuel cells, 19:12368 (RA;US)
Second generation PFBC systems research & development, Phase 2 topping combustor development, 19:11993 (RA;US)
Second-generation PFBC systems research and development – Phase 2, best efficiency approach in light of current data, 19:11992 (RA;US)
Simulated coal gas MCFC power plant system verification, 19:12361 (RA;US)
Some ceramic options, 19:12096 (RA;US)
Specific filter designs for PFBC, 19:12057 (RA;US)
Sub-scale development of an acoustically enhanced cyclone for PFBC, 19:12098 (RA;US)
Testing of zinc titanate desulfurization sorbents for moving-bed applications, 19:12061 (RA;US)
The DOE NEPA process, 19:12107 (RA;US)
The DOE NEPA Process, 19:12099 (RA;US)
The systems and the development targets for IGCC, 19:11995 (RA;US)
The systems and the developmental targets for PFBC, 19:11991 (RA;US)
Thermal/chemical degradation of inorganic membrane materials, 19:12067 (RA;US)
Trace element emissions, 19:12087 (RA;US)
Transport reactor demonstration unit, 19:12080 (RA;US)
U.S. Navy intercooled recuperated (ICR) engine, 19:12012 (RA;US)
Ultra-low gas turbine emissions using catalytic and noncatalytic porous combustors, 19:12097 (RA;US)
University participation in the ATS program, 19:12015 (RA;US)
Vortex-generator induced enhanced heat transfer in gas turbine blade coolant channels with rotation, 19:12018 (RA;US)
Welcome - ATS University Workshop, 19:12014 (RA;US)
Westinghouse filter update, 19:12092 (RA;US)

USDOE Office of Arms Control and Nonproliferation, Washington, DC (United States)
Tomographic data developed using the ABEM RAMAC borehole radar system at the Mixed Waste Landfill Integrated Demonstration, 19:11834 (R;US)

USDOE Office of Energy Research, Washington, DC (United States)
Natural Gas Strategic Plan and Multi-Year Program Crosscut Plan, FY 1994–1999, 19:11584 (R;US)

USDOE Office of Energy Research, Washington, DC (United States). Materials Sciences Div.
Materials research at selected Japanese laboratories: Based on a 1992 visit: Overview, summary of highlights, notes on laboratories and topics, 19:12473 (R;US)

USDOE Office of Environmental Restoration and Waste Management, Washington, DC (United States)
Site maps and facilities listings, 19:11677 (R;US)

Advanced coal-fueled gas turbine systems: Quarterly report, January–March 1993, 19:11517 (R;US)

Westinghouse Electric Corp., Orlando, FL (United States). Power Generation Business Unit
Advanced coal-fueled gas turbine systems: Subscale combustion testing: Topical report, Task 3.1, 19:11516 (R;US)

Westinghouse Electric Corp., Pittsburgh, PA (United States). Science and Technology Center
Integrated Low Emissions Cleanup system for direct coal fueled turbines, (moving bed, fluid bed contactor/ceramic filter): Twenty-fourth quarterly status report, July–September 1993, 19:12053 (R;US)
Subpilot scale gasifier evaluation of ceramic cross flow filter: Final report, February 1, 1988–December 31, 1992, 19:11422 (R;US)

Westinghouse Hanford Co., Richland, WA (United States)
100-DR-1 radiological surveys, 19:11865 (R;US)
Agile total quality guidelines for enhancing teamwork and success, 19:14229 (R;US)
Analyses of postulated ALMR containment and steam generator building accidents using the CONTAIN-LMR code, 19:12283 (R;US)
Assessment of annual exposure for grout operations, 19:11866 (R;US)
Combining expedited cleanup with innovative technology demonstrations, 19:11859 (R;US)
Corrosion monitoring of high-level waste tanks, 19:11768 (R;US)
Data validation report for the 100-HR-3 Operable Unit, fifth round groundwater samples, 19:13112 (R;US)
Field characterization plan for the 216-U-8 vitrified clay pipeline, 19:11863 (R;US)
Groundwater maps of the Hanford Site, June 1993, 19:13111 (R;US)
Groundwater monitoring plan for the proposed state-approved land disposal structure, 19:11769 (R;US)
Hanford well remediation and decommissioning plan, 19:11862 (R;US)
Integrated test plan for crosswell compressional and shear wave seismic tomography for site characterization at the VOC Arid Site, 19:13113 (R;US)
Preliminary results of a seismic borehole test using downhole shaped charges at the DOE Hanford Site, 19:11861 (R;US)
Results of groundwater quality assessment program at Low-Level Waste Management Area 3 of the low-level burial grounds, 19:11770 (R;US)
Riverland ERA maintenance pad site diesel contamination risk assessment, 19:11864 (R;US)
Thermal-spectrum recriticality energetics, 19:11860 (R;US)
Using Gagne's Chain in OJT, 19:14230 (R;US)
Using the global positioning system in support of environmental characterization at the Hanford Site in Washington State, 19:11855 (R;US)
Vacuum system pump down analysis, 19:12162 (R;US)

Westinghouse Idaho Nuclear Co., Inc., Idaho Falls, ID (United States)
Determination of actinides in urine and fecal samples, 19:12661 (PA;US)

Westinghouse Savannah River Co., Aiken, SC (United States)
A numerical comparison of sensitivity analysis techniques, 19:13060 (R;US)
A review of sensitivity analysis techniques, 19:14275 (R;US)
A visual assessment of the concrete vaults which surround underground waste storage tanks, 19:11791 (R;US)
An innovative method for mixed waste disposal at the Savannah River Site's high level liquid waste tank farms, 19:11772 (R;US)
An integrated degradation and structural model for predicting the service life of buried reinforced concrete structures for low- and intermediate-level radioactive waste disposal, 19:11775 (R;US)
An investigation of the radiolytic stability of a resorcinol- formaldehyde ion exchange resin, 19:11777 (R;US)
Application of accident progression event tree technology to the Savannah River Site Defense Waste Processing Facility SAR analysis, 19:11771 (R;US)
Characterization of projected DWPF glasses heat treated to simulate canister centerline cooling: Revision 1, 19:11786 (R;US)
Consolidated incineration facility technical support, 19:11790 (R;US)
Criticality accident detector coverage analysis using the Monte Carlo Method, 19:11867 (R;US)
Decontamination and treatment of high level liquid mixed waste to meet regulatory compliance issues outlined in Federal Facilities Agreements, 19:11773 (R;US)
Deuterium absorption and material phase characteristics of SAES St 198 Zr-Fe Alloy: Revision 1, 19:12592 (R;US)
Dynamic simulation of the in-tank precipitation process, 19:11779 (R;US)
F- and H-Area Sewage Sludge Application Sites Groundwater Monitoring Report: Third quarter 1993, 19:13117 (R;US)
Filming in decontamination by mopping, 19:11784 (R;US)
Flowpath evaluation and reconnaissance by remote field Eddy current testing (FERRET), 19:12781 (R;US)
Generation of low-divergence laser beams, 19:12811 (PA;US)
Glass melter off-gas system, 19:12618 (PA;US)
Heat transfer modelling of the saltstone pouring and curing process: Task Number: 93-016-0, 19:11789 (R;US)
High level radioactive waste management facility design criteria, 19:11776 (R;US)
Interim report on testing of off-gas treatment technologies for abatement of atmospheric emissions of chlorinated volatile organic compounds, 19:11785 (R;US)
Justification for change in AXAIR dispersion coefficients, 19:11814 (R;US)
K-Area and Par Pond Sewage Sludge Application Sites Groundwater Monitoring Report: Third quarter 1993, 19:13118 (R;US)
Lid heater for glass melter, 19:12736 (PA;US)
Light absorption cell combining variable path and length pump, 19:12662 (PA;US)
Managing performance of DB2 Ad Hoc Reports, 19:14280 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report: Third quarter 1993, 19:13119 (R;US)
Method and device for disinfecting a toilet bowl, 19:12738 (PA;US)

Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2(Rev.1), *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

ALUMINIUM ARSENIDES
The features of production of In As_{1-x_z} Sb_x P_z-Ga_{1-Y} Al_Y Sb_{1-n} As_n hetero lasers by the liquid-phase epitaxy method, 19:12605 (IA;IR)

ALUMINIUM BASE ALLOYS
Electron beam welding and post-weld treatments of 2219-T6-Al alloy, 19:12492 (R;IT)
Electron microscope, metallurgical and mechanical investigations of the decagonal phase in the Al-Co-Cu(-S1) system, 19:12528 (R;DE;In German)
Work hardening behavior in aluminum alloy 2090, 19:12531 (R;US)

ALUMINIUM COMPOUNDS
See also ALUMINIUM ARSENIDES
ALUMINIUM NITRIDES
ALUMINIUM OXIDES
ALUMINIUM PHOSPHATES
Fabrication, phase transformation studies and characterization of SiC-AlN-Al_2OC ceramics: [Annual report, February 1, 1993–July 30, 1993], 19:12569 (R;US)

ALUMINIUM NITRIDES
Electrical conductivity of ceramic insulators during extended ion irradiation with an applied electric field, 19:14123 (RA;US)
Fabrication, phase transformation studies and characterization of SiC-AlN-Al_2OC ceramics: [Annual report, February 1, 1993–July 30, 1993], 19:12569 (R;US)
Formation of electrically insulating coatings on aluminided vanadium-base alloys in liquid lithium, 19:14118 (RA;US)

ALUMINIUM OXIDES
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, September 20, 1993–December 20, 1993, 19:11448 (R;US)
Cost-effective ceramic machining: Summary of three-body wear experiments, 19:12589 (R;US)
Effect of irradiation spectrum of the microstructural evolution in oxide ceramics, 19:14122 (RA;US)
Electrical conductivity of ceramic insulators during extended ion irradiation with an applied electric field, 19:14123 (RA;US)
Hot coal gas desulfurization with manganese-based sorbents, 19:12086 (RA;US)
Irradiation of $MgAl_2O_4$ spinel in FFTF-MOTA, 19:14124 (RA;US)
Measurement of DC electrical conductivity of alumina during spallation-neutron irradiation, 19:14126 (RA;US)
Nanocrystalline AL_2 O_3 powder produced by laser induced gas phase reactions, 19:12571 (R;IT)
Summary of ionizing and displacive irradiation fields in various facilities, 19:14079 (RA;US)
Surfactant loss control in chemical flooding: Spectroscopic and calorimetric study of adsorption and precipitation on reservoir minerals: Quarterly technical progress report, July 1, 1993–September 30, 1993 (Sodium dodecyl sulfate, octaethylene glycol mono n-decyl ether, and tetradecyl trimethyl ammonium chloride), 19:11546 (R;US)
Surfactant loss control in chemical flooding: Spectroscopic and calorimetric study of adsorption and precipitation on reservoir minerals: Quarterly technical progress report, April 1, 1993–June 30, 1993, 19:11545 (R;US)
Time-resolved site-selection spectroscopy investigation of $Y_3(Al_{1-x}$ $Ga_x)_5$ O_12:Nd^{3+} crystals, 19:12647 (IA;IR)
[Studies of the fundamental nature of catalytic acidity, sites and intermediates]: Final performance (technical progress) report, 19:12673 (R;US)

ALUMINIUM PHOSPHATES
Double rotation NMR studies of zeolites and aluminophosphate molecular sieves, 19:12614 (R;US)

ALVEOLI (PULMONARY)
See LUNGS

AMBERLITE
See ORGANIC ION EXCHANGERS

AMERICIUM
Determination of actinides in urine and fecal samples, 19:12661 (PA;US)
Thermodynamic analysis of actinide volatilities for the thermal processor units in the ITTS study, 19:11763 (R;US)

AMINES
See also OXIMES
RHODAMINES
Electronic and nuclear factors in intramolecular charge and excitation transfer processes: [Annual report], October 1992–September 1993, 19:13837 (R;US)

AMINO ACID SEQUENCE
Protein structure prediction using hybrid AI methods, 19:13136 (R;US)

AMINO ACIDS
See also THYROXINE
Chiral interaction in molecular systems, 19:13251 (RA;XA)
Cosmological sources of molecular chirality, 19:13254 (RA;XA)
Electroweak interactions and chirality of aminoacids, 19:13244 (RA;XA)
Finding necessary condition and scope of surviving L-amino acid under beta electron irradiation, 19:13260 (RA;XA)
Formation of amino acid precursors by cosmic radiation in primitive terrestrial and extraterrestrial environments, 19:13253 (RA;XA)
AMINO ALCOHOLS
See AMINES
AMINO SUGARS
See AMINES

See AMINES
AMINOPROPIONIC ACID-BETA
See ALANINE-BETA
AMMONIA
Chemisorbed-molecule potential-energy surfaces and electronically- stimulated processes, 19:13888 (R;US)
NH_3/H_2S advances, 19:12083 (RA;US)
AMORPHOUS STATE
Anisotropic phase separation through the metal-insulator transition in amorphous Mo-Ge and Fe-Ge alloys, 19:12623 (R;US)
Anomalous small angle x-ray scattering studies of amorphous metal-germanium alloys, 19:12624 (R;US)
Production of amorphous metal layers using ion implantation and investigation of the related modification of some surface properties, 19:12551 (R;VN)
ANGIOSPERMS
See MAGNOLIOPHYTA
ANGRA-1 REACTOR
Periods of high intensity rainfall and the safety of the Angra dos Reis nuclear power plant, 19:13040 (I;BR;In Portuguese)
ANIMAL CELLS
See also TUMOR CELLS
Assessment of components of radiation action by relativistic nuclei, 19:13298 (RA;FR)
Malignant transformation of human fibroblasts by neutrons and by gamma radiation: Relationship to mutations induced: Progress report, [January 1, 1993–December 31, 1993], 19:13230 (R;US)
X-ray imaging and x-ray source development at Lawrence Livermore National Laboratory, 19:13149 (R;US)
ANIMAL SHELTERS
Building for animal production, 19:13235 (R;SE;In Swedish)
ANIMALS
See also WILD ANIMALS
Bison and fire: Landscape analysis of ungulate response to Yellowstone's fires, 19:13065 (R;US)
ANNIHILATION
On the spectacular large asymmetry in $\bar{p}p \rightarrow \pi^-\pi^+$ and $\bar{p}p \rightarrow K^-K^+$ reactions, 19:13538 (RA;US)
ANNULAR CORE PULSE REACTOR
See ACPR REACTOR
ANNULAR CORE RESEARCH REACTOR
See ACPR REACTOR
ANODES
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells, 19:12367 (RA;US)
ANTENNAS
Phaedrus-T results on impurity and density control with rf an on diagnostic development, 19:13968 (IA;XA)
ANTILAMBDA PARTICLES
Inclusive production of neutral strange particles in antideuteron-nuclei interactions at 12.2 GeV/c, 19:13787 (RA;RU)
ANTIMUONS
See MUONS PLUS
ANTINEUTRINO-ELECTRON INTERACTIONS
Another possibility of conserved-vector-current hypothesis verification, 19:13608 (RA;RU)
ANTIPROTON BEAMS
Low energy $\bar{p}$ for hadron spectroscopy, 19:12848 (RA;US)
ANTIPROTON REACTIONS
Measurement of the Pontecorvo reaction p-bar + d $\rightarrow \pi^-$ + p for the antiproton annihilation at rest, 19:13788 (RA;RU)
ANTIPROTONIC ATOMS
See HADRONIC ATOMS
ANTIPROTONS
Antiproton production in heavy ion collisions, 19:13802 (R;US)
ANTIREFLECTION COATINGS
Sol-gel coatings for high power laser optics-past, present and future, 19:12821 (R;US)
ANYONS
Exact multiplicities in the three-anyon spectrum, 19:13465 (R;UA)
APPARATUS
See EQUIPMENT
APPLICATORS (RADIOTHERAPY)
See RADIATION SOURCES
APS STORAGE RING
See ADVANCED PHOTON SOURCE
AQUATIC ORGANISMS

Toxicological benchmarks for screening of potential contaminants of concern for effects on aquatic biota on the Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program ESD Publication 3940, 19:13122 (R;US)
AQUEOUS HUMOR
See EYES
AQUEOUS SOLUTIONS
On the generation of H_2 from formaldehyde in basic aqueous solutions, 19:12666 (R;US)
Recovery of propylene glycol from dilute aqueous solutions via reversible reaction with aldehydes, 19:12656 (R;US)
ARALEX PROCESS
See RADIOACTIVE WASTE PROCESSING
ARC FURNACES
Ferrous scrap preheating system: Phase 2, Final report, 19:12412 (R;US)
ARC WELDING
Congress of the International Welding Institute, 19:12515 (IA;RU;In Russian)
Development of the model for consumable electrode arc welding in the vicinity of optimum point and control parameter selection, 19:12518 (IA;RU;In Russian)
Gas environment effect on main parameters of metal drop transition during consumable electrode welding with short-circuit current, 19:12517 (IA;RU;In Russian)
ARCHAEOLOGICAL SITES
Annual review of cultural resource investigations by the Savannah River Archaeological Research Program: Fiscal year 1993, 19:12299 (R;US)
ARCTIC REGIONS
Simulation of the effect of wind on clothing by measurements and calculations, 19:12758 (R;FI)
ARGON
Calculation of ionization loss fluctuations of fast heavy charged particles, 19:13818 (R;RU;In Russian)
Modelling of the structure and physical properties of simple disordered systems, 19:13863 (R;UA)
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation, 19:13053 (R;US)
ARGON 36 REACTIONS
Investigation of reabsorption effects in subthreshold π^0 production, 19:13765 (R;DE)
ARGON 40 TARGET
Particle production in heavy-ion collisions at intermediate energies, 19:13768 (R;DE)
ARGON 41
Hanford radioactive waste management plans, 19:11670 (R;US)
ARKANSAS
US hydropower resource assessment for Arkansas, 19:11922 (R;US)

ARMOR
Three-dimensional shock wave physics simulations with PCTH on the paragon parallel computer, 19:13006 (R;US)

ARMS CONTROL
Advances in passive neutron instruments for safeguards use, 19:12468 (R;US)
Director's Series on Proliferation, 19:12465 (R;US)
Non-intrusive, nuclear component discrimination with a microchannel plate gamma-ray detector, 19:12980 (R;US)
Nuclear disarmament verification, 19:12466 (R;US)
Portable, solid state, fiber optic coupled Doppler interferometer system for detonation and shock diagnostics, 19:13020 (R;US)
Random patterns and biometrics for counterfeit deterrence, 19:12470 (R;US)
Rockbursts as opportunities for the concealment of nuclear tests?, 19:12472 (R;US)
Sensitive field alpha contamination monitoring for special inspections and nonproliferation verification, 19:12467 (R;US)

AROMATIC COMPOUNDS
See AROMATICS

AROMATICS
See also BENZENE
CONDENSED AROMATICS
POLYCYCLIC AROMATIC HYDROCARBONS
Aromatic carbonium ions in liquid alkanes and alcohols from laser photoionization and pulse radiolysis, 19:12684 (R;US)
Effect of community structure on the kinetics of anaerobic degradation of aromatic compounds: Progress report, March 1989–June 1991, 19:11898 (R;US)
Electronic and nuclear factors in intramolecular charge and excitation transfer processes: [Annual report], October 1992–September 1993, 19:13837 (R;US)
High-energy chemical processes: Laser irradiation of aromatic hydrocarbons, 19:12687 (R;US)

ARRAY PROCESSORS
An $\Omega(\sqrt{\log \log n})$ lower bound for routing in optical networks, 19:14266 (R;US)

ARSENIC
Heavy-metal contamination on training ranges at the Grafenwoehr Training Area, Germany, 19:13064 (R;US)
Trace element emissions, 19:12087 (RA;US)

ARSENIC SULFIDES
Fabrication of diffraction gratings in As-S thin films, 19:13384 (IA;IR)

ARTHUR D LITTLE COAL LIQUEFACTION PROCESS
See COAL LIQUEFACTION

ASBESTOS
Proceedings of the workshop on transite decontamination dismantlement and recycle/disposal, 19:11700 (R;US)

ASCO-1 REACTOR
Assessment of a pressurizer spray valve faulty opening transient at Asco Nuclear Power Plant with RELAP5/MOD2: International Agreement Report, 19:12277 (R;US)

ASCO-2 REACTOR
Assessment of a pressurizer spray valve faulty opening transient at Asco Nuclear Power Plant with RELAP5/MOD2: International Agreement Report, 19:12277 (R;US)

ASDEX TOKAMAK
Fast sweep multiple broadband reflectometers on ASDEX and ASDEX-Upgrade, 19:14003 (IA;XA)
Measurements of MHD activity with reflectometry on ASDEX, 19:14015 (IA;XA)
Profile evaluation techniques for O-mode broadband microwave reflectometry on ASDEX, 19:14007 (IA;XA)

ASHES
See also FLY ASH
Bed material agglomeration during fluidized bed combustion: Technical progress report, 1 July, 1993–30 September, 1993, 19:11526 (R;US)
Coal ash behavior in reducing environments, 19:12068 (RA;US)
Suppression of fine ash formation in pulverized coal flames: Quarterly technical progress report No. 5, October 1, 1993–December 31, 1993, 19:12102 (R;US)
Truck ramp construction from clean coal technology waste products, 19:12416 (R;US)

ASPHALTENES
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, September 20, 1993–December 20, 1993, 19:11448 (R;US)

ASSE SALT MINE
Simulated waste package test in salt, 19:11717 (R;US)

ASTATINE 196
Fission barrier heights for ultra neutron-deficient nuclides ^{188}Pb and ^{196}Po, 19:13790 (RA;RU;In Russian)

ASTATINE 211
Method of thermal separation of ^{211}At from the alpha-particle activated Bi_2O_3 target, 19:12699 (R;PL)

ASTROPHYSICS
Nuclear physics and astrophysics: Progress report for period June 15, 1992–June 14, 1993, 19:13396 (R;US)

ATF TORSATRON
Application of the stationary neoclassical sources adjustable model to the ATF torsatron plasma heating, 19:14045 (IA;RU;In Russian)

ATGAS PROCESS

See also SPENT FUEL CASKS
An economic evaluation of a storage system for casks with burnup credit, 19:12167 (IA;JP)
Burnup credit issues in transportation and storage, 19:11636 (IA;JP)
Development of the GA-4 and GA-9 legal weight truck spent fuel casks, 19:12726 (IA;JP)
OECD-NEA criticality working group - a status report and the burnup credit challenge, 19:12723 (IA;JP)
Safety evaluation of shipping cask for loading 4 PWR spent fuel, 19:12725 (IA;JP)
The German cask-concept for intermediate storage and final disposal of spent fuel, 19:11646 (IA;JP)
The convenient Monte Carlo code MULTI-KENO for criticality safety analysis of transport casks, 19:12724 (IA;JP)
Transportation and disposal of low-and medium level waste using fiber reinforced concrete overpacks, 19:11647 (IA;JP)
Upgrading spent fuel shipping casks to meet higher burn-up, 19:12722 (IA;JP)

CAST IRON
Robotic weld overlay coatings for erosion control: [Quarterly report, July–September 1993], 19:12488 (R;US)

CASTING
LLNL casting technology, 19:12754 (R;US)

CASTOR TOKAMAK
Correlation and dimensional analysis of density fluctuations on CASTOR tokamak, 19:13975 (IA;XA)
Diagnostic arc source of neutral lithium beam, 19:13977 (IA;XA)
Hard X-ray intensity reduction during lower hybrid current drive experiments, 19:13974 (IA;XA)
Regimes with improved particle confinement on CASTOR tokamak, 19:13970 (IA;XA)

CATALYSTS
Coal liquefaction process streams characterization and evaluation: Quarterly technical progress report, January 1–March 31, 1993, 19:11444 (R;US)
Fundamental studies of catalytic processing of synthetic liquids: Quarterly progress report, April 1, 1992–June 30, 1992, 19:11443 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts: Quarterly report, July–September 1993, 19:11493 (R;US)
Organic or organometallic template mediated clay synthesis, 19:12617 (PA;US)
The economical production of alcohol fuels from coal-derived synthesis gas: Quarterly technical progress report Number 8, 1 July, 1993–30 September, 1993, 19:11445 (R;US)
[Studies of the fundamental nature of catalytic acidity, sites and intermediates]: Final performance (technical progress) report, 19:12673 (R;US)

CATHODES
Emission from ferroelectric cathodes: Revision 1, 19:13389 (R;US)
Perovskite $La_{1-x}Sr_xMnO_{3-\delta}$ as cathode material for high-temperature fuel cells: Powder fabrication, shaping and characterization, 19:12581 (R;DE;In German)
Research and development of alternative components at Argonne National Laboratory for molten carbonate fuel cells, 19:12367 (RA;US)

CATION EXCHANGE CAPACITY
See CATIONS

CATIONS
Metal ion complexation by ionizable crown ethers: Progress report, January 1, 1991–December 31, 1993, 19:12640 (R;US)

CAULIFLOWER
See BRASSICA

CAUSTIC FLOODING
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods: Technical progress report, July–September 1993, 19:11543 (R;US)

CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
Study on SHF ferrites under conditions of operation of frequency-retuned resonators, 19:12857 (R;RU;In Russian)

CCD
See CHARGE-COUPLED DEVICES

CDF
See FERMILAB COLLIDER DETECTOR

CE ENTRAINED FUEL PROCESS
CE IGCC Repowering Project char filters: Topical report, November 1990–May 1993, 19:11426 (R;US)
CE IGCC Repowering plant sulfuric acid plant: Topical report, June 1993, 19:11427 (R;US)

CELL CULTURES
Biological conversion of synthesis gas: [Quarterly] project status report, July 1, 1992–September 30, 1992, 19:11916 (R;US)

CELL FLOW SYSTEMS
DNA fragment sizing and sorting by laser-induced fluorescence, 19:13153 (PA;US)

CELL GROWTH (ANIMAL)
See ANIMAL CELLS

CELL MEMBRANES
Membrane phase separations, asymmetry and implications in the origin of life, 19:13250 (RA;XA)

CELLS (ANIMAL)
See ANIMAL CELLS

CELLS (BACTERIAL)
See BACTERIA

CELLULOSE
Mechanistic studies of the alkaline degradation of cellulose in cement, 19:12682 (R;GB)

CEMENT INDUSTRY
Capture of green-house carbon dioxide in Portland cement, 19:13032 (R;US)

CEMENTS
Capture of green-house carbon dioxide in Portland cement, 19:13032 (R;US)
Cement minerals at elevated temperature: Thermodynamic and structural characteristics, 19:12631 (R;US)
Evaluation and utilization of Illinois FBC residues for construction materials: Final technical report, September 1, 1992–August 31, 1993, 19:11471 (R;US)
Mechanistic studies of the alkaline degradation of cellulose in cement, 19:12682 (R;GB)
User's guide for simplified computer models for the estimation of long-term performance of cement-based materials, 19:11723 (R;US)

CENTAURO-TYPE EVENTS
Minimax: Multiparticle physics at the TeVatron collider, 19:13630 (R;US)

CENTRAL RECEIVERS
A compendium of solar dish/Stirling technology, 19:11952 (R;US)

CENTRAL REGION

CENTRIFUGE ENRICHMENT PLANTS
Safety Evaluation Report for the Claiborne Enrichment Center, Homer, Louisiana (Docket No. 70-3070), 19:11609 (R;US)
CEPFR-1 REACTOR
See ZERO POWER REACTORS
CERAMIC MELTERS
Glass melter off-gas system, 19:12618 (PA;US)
Lid heater for glass melter, 19:12736 (PA;US)
CERAMICS
Ceramic Technology Project database: September 1993 summary report, 19:12586 (R;US)
Ceramics radiation effects issues for ITER, 19:14121 (RA;US)
Compositions and chemical bonding in ceramics by quantitative electron energy-loss spectrometry, 19:12566 (R;US)
Energetics, bonding mechanism and electronic structure of ceramic/ceramic and metal/ceramic interfaces: Annual progress report, April 1, 1993–March 31, 1994, 19:13882 (R;US)
Irradiation effects in ceramics: Transition from low to high dose behavior, 19:14128 (RA;US)
Post irradiation study and in-reactor study for fundamental researches in open university facility, 19:12229 (RA;JP)
CERCLA
See US SUPERFUND
CEREALS
See also MAIZE
WHEAT
Technical action plan at former Commodity Credit Corporation grain storage sites in Nebraska, Kansas, Iowa, and Missouri: Revision 2, 19:13063 (R;US)
CERIUM OXIDES
Conductivity measurements of ceria-based solid electrolytes using AC impedance, 19:12591 (R;US)
Continuous Oxidation/Reduction System (CORS), 19:11765 (R;US)
Development of novel copper-based sorbents for hot-gas cleanup: Final technical report, 1 September 1992–31 August, 1993, 19:11459 (R;US)
Selective catalytic reduction of sulfur dioxide to elemental sulfur: Quarterly technical progress report No. 6, October–December 1993, 19:12100 (R;US)
CERN
Cooperation Agreement between the Government of Australia and the European Organization for Nuclear Research (CERN) concerning the further development of scientific and technical co-operation in the research projects of CERN, 19:14284 (I;AU)
Travel to Switzerland and Germany to participate in WA98 at CERN and WA98 meeting in Darmstadt: Foreign trip report, November 7–28, 1993, 19:12975 (R;US)
CERN II SYNCHROTRON
See CERN SPS SYNCHROTRON
CERN LEAR
New electron beam collector for LEAR, 19:12914 (R;RU;In Russian)
CERN SPS SYNCHROTRON
New control architecture for the SPS accelerator at CERN, 19:12883 (RA;JP)
CESIUM
An investigation of the radiolytic stability of a resorcinol-formaldehyde ion exchange resin, 19:11777 (R;US)
Lifetimes-measurements of selectively excited molecular levels, 19:13845 (IA;IR)
Pre-design safety analyses of cesium ion-exchange compact processing unit, 19:11735 (R;US)
The study of spectral line profiles in excimer molecules, 19:13848 (IA;IR)
CESIUM 133 TARGET
Spectra of light particles and gamma-quanta in the neutron reactions on ^{133}Cs and ^{127}In in the neutron energy range from 6 up to 30 MeV, 19:13805 (R;RU;In Russian)
CESIUM 134
Technogenic and Natural Radionuclides in the Black Sea bottom Sediments, 19:13127 (I;BG)
CESIUM 137
Environmental surveillance data report for the first quarter of 1993, 19:11732 (R;US)
Environmental surveillance data report for the second quarter of 1993, 19:11809 (R;US)
Estimation of internal dose from radiocesium and phantom, 19:13291 (RA;JP;In Japanese)
Hazard analysis for cesium shipments, 19:11847 (R;US)
Radioactivity survey data in Japan, part 1: Environmental materials, 19:13130 (R;JP)
Radioactivity survey data in Japan, part 2: Dietary materials, 19:13223 (R;JP)
Radionuclide concentrations in game (surface feeders) and nongame (bottom feeders) fish upstream and downstream of Los Alamos National Laboratory, 19:13128 (R;US)
Results of the radiological characterization survey of the Building 7819 Decontamination Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:11808 (R;US)
Technogenic and Natural Radionuclides in the Black Sea bottom Sediments, 19:13127 (I;BG)
CESIUM COMPOUNDS
Dynamic simulation of the in-tank precipitation process, 19:11779 (R;US)
CHALKS
See LIMESTONE
CHANNELS (REACTOR)
See REACTOR CHANNELS
CHARGE COLLECTION
Analytical solutions of minimum ionization particle induced current shapes of silicon detectors and simulation of charge collection properties, 19:12925 (R;US)
CHARGE-COUPLED DEVICES
Programmable CCD imaging system, 19:12786 (R;US)
CHARGED PARTICLE DETECTION
See also BETA DETECTION
Light particle emission in the reaction $^{144}Sm(^{32}S,fission)$ at E_{lab}=838 MeV, 19:13803 (R;FR)
CHARGED PARTICLES

Talking points for clean coal conference-IPP perspective, 19:11410 (RA;US)

Coal Preparation
Non-intrusive measurement of particle charge: Electrostatic dry coal cleaning: Technical progress report #9, July 1, 1993-September 30, 1993, 19:11414 (R;US)

Cocombustion
Integrated methods for production of clean char and its combustion properties: Interim final technical report, September 1, 1992–August 31, 1993, 19:11523 (R;US)

Combustion
A computational model for coal transport and combustion: Quarterly technical progress report, September 1, 1993–November 30, 1993, 19:11514 (R;US)
Advanced coal-fueled gas turbine systems: Quarterly report, January–March 1993, 19:11517 (R;US)
Gas reburning and low NO_x burners on a wall-fired boiler, 19:12041 (RA;US)
Integrated Low Emissions Cleanup system for direct coal fueled turbines, (moving bed, fluid bed contactor/ceramic filter): Twenty-fourth quarterly status report, July–September 1993, 19:12053 (R;US)
Measurement and modeling of advanced coal conversion processes, 19:11999 (RA;US)
Measurement of air toxic emissions from a coal-fired boiler equipped with a tangentially-fired low NOx combustion system, 19:12039 (RA;US)
On the measurement of volatile metal species at elevated temperatures, 19:11528 (R;FI)
Performance and operating results from the demonstration of advanced combustion techniques for wall-fired boilers, 19:12038 (RA;US)
Results of Babcock & Wilcox's clean coal technology combustion modification projects: Coal reburning for cyclone boiler NO_x control and low NO_x cell$_{TM}$ burner demonstrations, 19:12040 (RA;US)
The development of coal-based technologies for Department of Defense Facilities: Semiannual technical progress report, March 28, 1993–September 27, 1993, 19:11521 (R;US)

Combustion Kinetics
Particulate behavior in a controlled-profile pulverized coal-fired reactor: A study of coupled turbulent particle dispersion and thermal radiation transport: Quarterly technical progress report, 15 September, 1993–14 December, 1993, 19:11519 (R;US)
Task 3.0: Advanced power systems: Semi-annual report, April 1–June 30, 1993, 19:11986 (R;US)

Combustion Properties
Coal combustion under conditions of blast furnace injection: Final technical report, September 1, 1992–August 31, 1993, 19:11466 (R;US)
Combustion and emissions characterization of pelletized coal fuels: Final technical report, September 1, 1992–August 31, 1993, 19:11524 (R;US)
Integrated methods for production of clean char and its combustion properties: Interim final technical report, September 1, 1992–August 31, 1993, 19:11523 (R;US)

Consumption Rates
Quarterly coal report, July–September 1993, 19:11506 (R;US)
State coal profiles, January 1994, 19:11504 (R;US)

Coprocessing
Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1991–March 27, 1992, 19:11438 (R;US)
Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 28, 1992–June 30, 1992, 19:11439 (R;US)
Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1991–December 26, 1991, 19:11437 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1990–June 26, 1990, 19:11432 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 27, 1990–December 26, 1990, 19:11433 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 26, 1989–March 26, 1990, 19:11431 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1990–March 26, 1991, 19:11434 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Final report, September 26, 1989–March 31, 1993, 19:11440 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1991–June 26, 1991, 19:11435 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, June 27, 1991–September 26, 1991, 19:11436 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1989–December 26, 1989, 19:11430 (R;US)

Decomposition
Analysis of organic sulfur and nitrogen in coal via tandem degradation methods: Final technical report, September 1, 1992–August 31, 1993, 19:11486 (R;US)

Desulfurization
An attrition-resistant zinc titanate sorbent for sulfur: Final technical report, September 1, 1992–August 31, 1993, 19:11498 (R;US)
Microbial strain improvement for organosulfur removal from coal: Final technical report, 1 September, 1992–31 August, 1993, 19:11454 (R;US)
Molecular biological enhancement of coal biodesulfurization: Quarterly technical report, September 1, 1993–November 30, 1993, 19:11461 (R;US)
Protocols for the selective cleavage of carbon-sulfur bonds in coal: Interim final technical report, September 1, 1992–August 31, 1993, 19:11451 (R;US)
Reactivity of target compounds for chemical coal desulfurization: Quarterly technical report, September 1, 1993–November 30, 1993, 19:11460 (R;US)

Electron Spin Resonance
Magnetic relaxation – coal swelling, extraction, pore size: Quarterly technical progress report, October 1, 1993–December 31, 1993, 19:11481 (R;US)
VHF EPR analysis of organic sulfur in coal: Final technical report, September 1, 1992–August 31, 1993, 19:11484 (R;US)

Electrostatic Separation
Non-intrusive measurement of particle charge: Electrostatic dry coal cleaning: Technical progress report #9, July 1, 1993-September 30, 1993, 19:11414 (R;US)

Energy Policy
Government policy impact on coal and coal technology, 19:11531 (RA;US)

Fluidized-Bed Combustion
Bed material agglomeration during fluidized bed combustion: Technical progress report, 1 July, 1993–30 September, 1993, 19:11526 (R;US)
Coal future, the impact of IGCCs and PFBCs, 19:11990 (RA;US)
Evaluation and utilization of Illinois FBC residues for construction materials: Final technical report, September 1, 1992–August 31, 1993, 19:11471 (R;US)
Nitrous oxide emissions: Topical report, July 1, 1990–June 30, 1993, 19:11502 (R;US)
Overview: Utility market for advanced coal-fired systems, 19:11987 (RA;US)
PCFB environmental performance and efficiency, the Pyropower perspective, 19:12056 (RA;US)
Perspective of the market for PFBC, 19:11989 (RA;US)
PyGas™ design support, 19:12001 (RA;US)
Second-generation PFBC systems research and development – Phase 2, best efficiency approach in light of current data, 19:11992 (RA;US)
The systems and the developmental targets for PFBC, 19:11991 (RA;US)

Gaseous Wastes
Nitrous oxide emissions: Topical report, July 1, 1990–June 30, 1993, 19:11502 (R;US)

Inventories
Quarterly coal report, July–September 1993, 19:11506 (R;US)

Macerals
Adventures in maceral separation, 19:11474 (R;US)

Market
Evolution of domestic utility market structure into the 21st century, 19:11409 (RA;US)
Foreign markets and a case study of international deployment of CCTs, 19:11411 (RA;US)
Talking points for clean coal conference-IPP perspective, 19:11410 (RA;US)

Mass Spectra
Mass spectral study of organic sulfur in the polymeric matrix of coal: Final technical report, September 1, 1992–August 31, 1993, 19:11485 (R;US)

Materials Handling
CE IGCC repowering project: Bins and lockhoppers: Topical report, 1 January, 1992–28 February, 1993, 19:11513 (R;US)

Materials Handling Equipment
Blast furnace granular coal injection, 19:11512 (RA;US)

Microstructure
Mass spectral study of organic sulfur in the polymeric matrix of coal: Final technical report, September 1, 1992–August 31, 1993, 19:11485 (R;US)

Molecular Structure
Investigation of coal structure: Quarterly report No. 7, October 1, 1993–December 31, 1993, 19:11479 (R;US)

Nuclear Magnetic Resonance
Advanced NMR-based techniques for pore structure analysis of coal: Quarterly report No. 9, October 1, 1993–December 30, 1993, 19:11480 (R;US)

Pelletizing
Carbonation as a binding mechanism for coal/calcium hydroxide pellets: Final technical report, 1 September, 1992–31 August, 1993, 19:11416 (R;US)
Combustion and emissions characterization of pelletized coal fuels: Final technical report, September 1, 1992–August 31, 1993, 19:11524 (R;US)

Photochemical Reactions
Protocols for the selective cleavage of carbon-sulfur bonds in coal: Interim final technical report, September 1, 1992–August 31, 1993, 19:11451 (R;US)

Pore Structure
Advanced NMR-based techniques for pore structure analysis of coal: Quarterly report No. 9, October 1, 1993–December 30, 1993, 19:11480 (R;US)
Magnetic relaxation – coal swelling, extraction, pore size: Quarterly technical progress report, October 1, 1993–December 31, 1993, 19:11481 (R;US)

Prices
Quarterly coal report, July–September 1993, 19:11506 (R;US)
State coal profiles, January 1994, 19:11504 (R;US)

Production
Quarterly coal report, July–September 1993, 19:11506 (R;US)
State coal profiles, January 1994, 19:11504 (R;US)

Public Opinion
CCT conference address, 19:11408 (RA;US)
Planting the CEED for success, 19:11407 (RA;US)

Pulse Combustion
Status of the demonstration of pulse combustion in steam gasification, 19:11420 (RA;US)

Pyrolysis
Integrated production/use of ultra low-ash coal, premium liquids and clean char: Interim final technical report, 1 September, 1992–31 August, 1993, 19:11469 (R;US)
Task 4.0 – Advanced fuel forms and co-products: Semi-Annual report, April 1–June 30, 1993, 19:11413 (R;US)

Qualitative Chemical Analysis
Characterization of available coals from Illinois mines: Final technical report, September 1, 1992–August 31, 1993, 19:11483 (R;US)

Quantitative Chemical Analysis
Analyzing organic sulfur in coal/char: Integrated mild degradation/XANES methods: [Quarterly] technical report, September 1–November 30, 1993, 19:11462 (R;US)

Reserves
Plenary Session 1, 19:11503 (RA;US)

Sample Preparation
Establishment and maintenance of a coal sample bank and data base: Final report, April 8, 1988–September 28, 1993, 19:11505 (R;US)

Sampling
A perspective on the status of coal research from shipments of samples, 19:11475 (R;US)
Establishment and maintenance of a coal sample bank and data base: Final report, April 8, 1988–September 28, 1993, 19:11505 (R;US)

Solvent Extraction
Investigation of coal structure: Quarterly report No. 7, October 1, 1993–December 31, 1993, 19:11479 (R;US)

Structural Chemical Analysis
NMR imaging of heterogeneous coal macromolecular networks, 19:11473 (R;US)
Organic structure components within the Argonne premium coal samples, 19:11476 (R;US)
Scanning transmission x-ray microscopy: A new "looking glass" into coal chemical structure, 19:11472 (R;US)

Structural Models
The role of model compound studies in coal research, 19:11478 (R;US)

Sulfur Content
Analyzing organic sulfur in coal/char: Integrated mild degradation/XANES methods: [Quarterly] technical report, September 1–November 30, 1993, 19:11462 (R;US)
State coal profiles, January 1994, 19:11504 (R;US)

Swelling
Investigation of coal structure: Quarterly report No. 7, October 1, 1993–December 31, 1993, 19:11479 (R;US)

Thermal Degradation
Analysis of organic sulfur and nitrogen in coal via tandem degradation methods: Final technical report, September 1, 1992–August 31, 1993, 19:11486 (R;US)

Two-Phase Flow
A computational model for coal transport and combustion: Quarterly technical progress report, September 1, 1993–November 30, 1993, 19:11514 (R;US)

Waste Disposal
Geochemistry of FBC waste-coal slurry solid mixtures: Final technical report, September 1, 1992–August 31, 1993, 19:11494 (R;US)

Waste Processing
Microbial stabilization of sulfur-laden sorbents: Final technical report, September 1, 1992–August 31, 1993, 19:11496 (R;US)

Water Pollution Control
A novel, integrated treatment system for coal waste waters: Quarterly report, September 2, 1993–December 1, 1993, 19:11492 (R;US)

Wettability
New concept for coal wettability evaluation and modulation: Technical progress report, October 1, 1993–December 31, 1993, 19:11489 (R;US)

COAL DEPOSITS
A perspective on the status of coal research from shipments of samples, 19:11475 (R;US)
Establishment and maintenance of a coal sample bank and data base: Final report, April 8, 1988–September 28, 1993, 19:11505 (R;US)
Extensive utilization of Argonne Premium Coals in research, 19:11477 (R;US)

COAL FINES
Carbonation as a binding mechanism for coal/calcium hydroxide pellets: Final technical report, 1 September, 1992–31 August, 1993, 19:11416 (R;US)
Combustion properties of coal-char blends: NO_x emission characteristics: Interim final technical report, September 1, 1992–August 31, 1993, 19:11525 (R;US)
Design methodology for micronized coal reburn system using modeling, 19:12042 (RA;US)
Physical cleaning of waste coal by dissolved-CO_2 flotation: Final technical report, September 1, 1992–August 31, 1993, 19:11457 (R;US)

COAL GAS
CE IGCC Repowering Project char filters: Topical report, November 1990–May 1993, 19:11426 (R;US)
CE IGCC repowering project preliminary hazard analysis: Topical report, November 1, 1990–May 31, 1993, 19:11425 (R;US)
Hot Coal Gas Desulfurization with manganese based sorbents: Quarterly report, August 1, 1993–September 30, 1993, 19:11429 (R;US)
Subpilot scale gasifier evaluation of ceramic cross flow filter: Final report, February 1, 1988–December 31, 1992, 19:11422 (R;US)

COAL GASIFICATION
See also CE ENTRAINED FUEL PROCESS
TEXACO GASIFICATION PROCESS
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, July–September 1993, 19:11424 (R;US)
Fundamental studies of the mechanism of catalytic reactions with catalysts effective in the gasification of carbon solids and the oxidative coupling of methane: Quarterly report, October 1–December 31, 1993, 19:11463 (R;US)
Hot Coal Gas Desulfurization with manganese based sorbents: Quarterly report, August 1, 1993–September 30, 1993, 19:11429 (R;US)
Investigation of a sulfur reduction technique for mild gasification char: Final technical report, September 1, 1992–August 31, 1993, 19:11470 (R;US)
Measurement and modeling of advanced coal conversion processes, 19:11999 (RA;US)
Mild temperature gasification: Partitioning sulfur to gas as H_2S: Interim final technical report, 1 September, 1992–31 August, 1993, 19:11455 (R;US)
Na/Ca catalyzation of Illinois coals for gasification: Final technical report, September 1, 1992–August 31, 1993, 19:11449 (R;US)
Production of low-cost hydrogen: Final report, September 1989–August 1993, 19:11892 (R;US)
Stabilization of spent sorbents from coal gasification: Final technical report, September 1, 1992–August 31, 1993, 19:11500 (R;US)
Task 3.0: Advanced power systems: Semi-annual report, April 1–June 30, 1993, 19:11986 (R;US)
Utilization of Illinois coal gasification slags for production of ultra-lightweight aggregates: Final technical report, September 1, 1992–August 31, 1993, 19:11467 (R;US)

COAL GASIFICATION PLANTS
Advanced hybrid gasification facility, 19:12065 (RA;US)
CE IGCC repowering project preliminary hazard analysis: Topical report, November 1, 1990–May 31, 1993, 19:11425 (R;US)
CE IGCC repowering project: Bins and lockhoppers: Topical report, 1 January, 1992–28 February, 1993, 19:11513 (R;US)
CE IGCC repowering project: Clean Coal II Project: Annual report, 1 January, 1992–31 December, 1992, 19:11983 (R;US)
CE IGCC repowering project: Controls & instrumentation: Topical report, June 1993, 19:11984 (R;US)
CE IGCC repowering project: Materials for coal gasification environment: Topical report, June 1993, 19:11982 (R;US)
PyGas™ design support, 19:12001 (RA;US)
Status of the demonstration of pulse combustion in steam gasification, 19:11420 (RA;US)
The economical production of alcohol fuels from coal-derived synthesis gas: Quarterly technical progress report Number 8, 1 July, 1993–30 September, 1993, 19:11445 (R;US)

COAL INDUSTRY
Regulatory climate for clean coal technology into the next century, 19:11405 (RA;US)
The directory of United States coal & technology export resources: Profiles of domestic US corporations, associations and public entities, nationwide, which offer products or services suitable for export, relating to coal and its utilization, 19:11529 (R;US)

COAL LIQUEFACTION
See also TSL PROCESS
Changes in organic sulfur compounds in coal macerals during liquefaction, 19:11419 (R;US)
Liquefaction behavior of separated coal macerals, 19:12634 (R;US)
Low severity coal liquefaction promoted by cyclic olefins: Quarterly report, July–September 1993, 19:11447 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts: Quarterly report, July–September 1993, 19:11493 (R;US)
Task 4.0 – Advanced fuel forms and co-products: Semi-Annual report, April 1–June 30, 1993, 19:11413 (R;US)

Trip to Japan to participate in the Eighth Coordinating Committee Meeting in Coal Energy Research and Development: Foreign trip report, October 12, 1993, 19:11421 (R;US)
[Enhancement of coal liquefaction efficiency with ceramic membrane reactors]: First quarterly report, May–July 1993, 19:11450 (R;US)

COAL LIQUIDS
Biodesulfurization of mild gasification liquid products: Final technical report, 1 September, 1992–31 August, 1993, 19:11458 (R;US)
Coal liquefaction process streams characterization and evaluation: Quarterly technical progress report, January 1–March 31, 1993, 19:11444 (R;US)
Development of an extraction process for removal of heteroatoms from coal liquids: Technical progress report No. 6, 1 July, 1993–30 September, 1993, 19:11446 (R;US)
Fundamental studies of catalytic processing of synthetic liquids: Quarterly progress report, January 1, 1992–March 31, 1992, 19:11442 (R;US)
Fundamental studies of catalytic processing of synthetic liquids: Quarterly progress report, April 1, 1991–June 30, 1991, 19:11441 (R;US)
Fundamental studies of catalytic processing of synthetic liquids: Quarterly progress report, April 1, 1992–June 30, 1992, 19:11443 (R;US)
Upgrading mild gasification liquids to produce electrode binder pitch: Final technical report, 1 September, 1992–31 August, 1993, 19:11456 (R;US)
Value-added co-products from K-M/IGT facility, 19:11428 (R;US)

COAL MINING
Physical cleaning of waste coal by dissolved-CO_2 flotation: Final technical report, September 1, 1992–August 31, 1993, 19:11457 (R;US)

COAL PREPARATION
Bench-scale testing of on-line control of column flotation using a novel analyzer: Revised final report, [October 1992–October 1993]: Volume 1, 19:11415 (R;US)
Electrostatic beneficiation of coal: Quarterly technical progress report, October 1, 1993–December 31, 1993, 19:11417 (R;US)
Task 4.0 – Advanced fuel forms and co-products: Semi-Annual report, April 1–June 30, 1993, 19:11413 (R;US)

COAL PREPARATION PLANTS
CE IGCC repowering project: Controls & instrumentation: Topical report, June 1993, 19:11984 (R;US)
Development of an on-line image analysis for assessment of pyrite liberation: Final technical report, 1 September, 1992–31 August, 1993, 19:11487 (R;US)

COAL TAR
Vapor pressures and heats of vaporization of primary coal tars: Quarterly technical progress report, 1 October 1993–31 December 1993, 19:11488 (R;US)

COAL-DERIVED GASES
See COAL GAS

COAL-DERIVED LIQUIDS
See COAL LIQUIDS

COAL-FIRED GAS TURBINES
Advanced coal-fueled gas turbine systems: Subscale combustion testing: Topical report, Task 3.1, 19:11516 (R;US)
Recovery and utilization of gypsum and limestone from scrubber sludge: Final technical report, September 1, 1992–August 31, 1993, 19:11495 (R;US)
Tidd PFBC Demonstration Project: Quarterly report, July 1–September 30, 1993, 19:11491 (R;US)

COAL-OIL MIXTURES
See COAL
FUEL OILS
FUEL SLURRIES

COALESCENCE
Coalescence in dense water/oil dispersions, 19:11560 (R;NO)

COALTEK PROCESS
See FUEL FEEDING SYSTEMS

COATED FUEL PARTICLES
Methods and data for HTGR fuel performance and radionuclide release modeling during normal operation and accidents for safety analysis, 19:12269 (R;DE)
Target particle internal pressure study, 19:12201 (R;US)

COATINGS
See also ANTIREFLECTION COATINGS
PROTECTIVE COATINGS
REFLECTIVE COATINGS
The role of defects in laser damage of multilayer coatings, 19:12626 (R;US)

COBALT
Element-specific magnetic hysteresis measurements, a new application of circularly polarized soft x-rays, 19:12548 (R;US)
Summary report for nanoscale magnetics, 19:12545 (R;US)

COBALT 60
Environmental surveillance data report for the first quarter of 1993, 19:11732 (R;US)
Environmental surveillance data report for the second quarter of 1993, 19:11809 (R;US)
Results of the radiological characterization survey of the Building 7819 Decontamination Facility at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:11808 (R;US)
Transport of Co-60 from Argentina to abroad, 19:11645 (IA;JP)

COBALT ALLOYS
Electron microscope, metallurgical and mechanical investigations of the decagonal phase in the Al-Co-Cu(-S1) system, 19:12528 (R;DE;In German)

COBALT COMPLEXES
Progress report for subcontract 9-X33-LO152-1, 19:12681 (R;US)

COBALT COMPOUNDS
See also COBALT OXIDES
COBALT SILICIDES
Technology development for cobalt F-T catalysts: Quarterly technical progress report No. 4, July 1, 1993–September 30, 1993, 19:11918 (R;US)
Technology development for cobalt F-T catalysts: Quarterly technical progress report No. 3, April 1, 1993–June 30, 1993, 19:12677 (R;US)

COBALT OXIDES
Implications of Hund's second rule for the insulating behavior of FeO and CoO, 19:12560 (R;US)
Microanalysis of an oxidized cobalt oxide: Zirconia eutectic, 19:12563 (R;US)

COBALT SILICIDES
Ion beam synthesis of monocrystalline $CoSi_2$ layers in Si and their electrical and structural characterization, 19:12611 (R;DE;In German)

COGENERATION
High performance steam cogeneration (proof-of-concept phases): Phase 2, HRSG 500-hour test report: Final report, 19:12411 (R;US)

COGENERATION PLANTS
See DUAL-PURPOSE POWER PLANTS

COHERENT ANTI-STOKES RAMAN SPECTROSCOPY
See RAMAN SPECTROSCOPY

COIL PROCESS
See COAL LIQUEFACTION

COILS (MAGNETIC)
See MAGNET COILS

COINCIDENCE METHODS
An experiment to study CP violation in the B system using an internal target at the HERA proton ring, 19:12932 (R;DE)

COKE
Development of an advanced, continuous mild gasification process for the production of co-products, 19:11423 (R;US)
Quarterly coal report, July–September 1993, 19:11506 (R;US)
Relating feedstock composition to product slate and composition in catalytic cracking: 1. Bench scale experiments with liquid chromatographic fractions from Wilmington, CA, >650°F resid, 19:11561 (R;US)
Value-added co-products from K-M/IGT facility, 19:11428 (R;US)

COKE-OVEN GAS
See COAL GAS

COLD FUSION
Accelerating-crack model of cold fusion, 19:14042 (IA;RU;In Russian)
Fine structure in cold fission mass distribution of $^{249}Cf(n_{th},f)$ reaction, 19:13789 (RA;RU)
Measuring neutrons and tritium yield in cold fusion reactions, 19:13947 (R;RU;In Russian)
Mechanism of diabatic excitation of electrons in crack propagation in metals, 19:13409 (IA;RU;In Russian)
Possibility of optimal planning of complex experiment for revealing effect of cold fusion and its mechanism, 19:14040 (IA;RU;In Russian)
Possible role of cold fusion induced by catalysis of ersions in the physics of Sun and planets, 19:14044 (IA;RU;In Russian)

COLD NEUTRONS
Study of neutron focusing at the Texas Cold Neutron Source: Progress report, 19:13813 (R;US)

COLLECTIVE EXCITATIONS
Decay modes of high-lying excitations in nuclei: Probing the microscopic structure or the statistical model, 19:13703 (R;FR)
Single-particle and collective states in transfer reactions, 19:13776 (R;FR)

COLLEGES
See EDUCATIONAL FACILITIES

COLLIDER DETECTOR AT FERMILAB
See FERMILAB COLLIDER DETECTOR

COLLIDING BEAMS
International workshop on emittance preservation in linear colliders: Emittance93, 19:12898 (R;JP)
Proceedings of JLC-FFIR92, 19:12897 (R;JP;In Japanese, English)
Proceedings of the SLAC/KEK ATF lattice workshop, 19:12895 (R;JP)
Proceedings of the workshop on the PS-spin collider, 19:12896 (R;JP;In Japanese, English)
Progress report on B physics task force activities, 1992, 19:12863 (R;JP)

COLORADO
Mercury audit at Rocky Mountain Arsenal, 19:13102 (R;US)

COLUMBIA RIVER
Idaho habitat and natural production monitoring: Part 1: Annual report 1992, 19:11934 (R;US)
Idaho habitat and natural production monitoring: Part 2: Annual report 1992, 19:11935 (R;US)
Minutes of the meeting between Richland Operations Office and United States Public Health Service on Columbia River contamination at Richland, Washington on July 16, 1964, 19:13123 (R;US)
Summary of radiological monitoring of Columbia River water along the Hanford Reach, 1980 through 1989, 19:11810 (R;US)

COLUMBIA RIVER BASIN
Columbia River Basin Fish and Wildlife Program Annual Implementation Work Plan for fiscal year 1993, 19:13131 (R;US)

COMBINED-CYCLE POWER PLANTS
Boilers
Status of coal tech's air cooled slagging combustor, 19:12051 (RA;US)
Coal Gasification Plants
CE IGCC repowering project preliminary hazard analysis: Topical report, November 1, 1990–May 31, 1993, 19:11425 (R;US)
Control Systems
CE IGCC repowering project: Controls & instrumentation: Topical report, June 1993, 19:11984 (R;US)
Cost Estimation
CE IGCC repowering project: Clean Coal II Project: Annual report, 1 January, 1992–31 December, 1992, 19:11983 (R;US)
Data Acquisition Systems
CE IGCC repowering project: Controls & instrumentation: Topical report, June 1993, 19:11984 (R;US)
Demonstration Programs
Toms Creek integrated gasification combined cycle demonstration project: Quarterly report, July 1–September 30, 1993, 19:11985 (R;US)
Design
CE IGCC repowering project: Clean Coal II Project: Annual report, 1 January, 1992–31 December, 1992, 19:11983 (R;US)
Pressurized circulating fluidized bed demonstration project, 19:12044 (RA;US)
Toms Creek integrated gasification combined cycle demonstration project: Quarterly report, July 1–September 30, 1993, 19:11985 (R;US)
Economic Analysis
Coproduction of electric power and Fischer-Tropsch products (CATL-078), 19:12035 (R;US)
Environmental Impacts
Externalities: Impacts on IGCCs and PFBCs, 19:12055 (RA;US)
Proposed Tenaska Washington II Generation Project: Final Environmental Impact Statement: Volume 1: Environmental analysis and technical appendices, 19:12106 (R;US)
Proposed Tenaska Washington II Generation Project: Final Environmental Impact Statement: Summary, 19:12105 (R;US)
Gas Turbines
Advanced turbine systems - studies and conceptual design, 19:12007 (RA;US)
Advanced turbine systems program, 19:12006 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel and a rich-quench-lean combustor, 19:11996 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel from a fixed bed gasifier, 19:12026 (RA;US)
Development of advanced gas turbine systems, 19:12003 (RA;US)
Direct coal-fired gas turbines for combined cycle plants, 19:12024 (RA;US)
GE power generation technology challenges for advanced gas turbines, 19:12004 (RA;US)
Gas fired advanced turbine system, 19:12005 (RA;US)
Heavy duty gas turbine combustion tests with simulated low BTU coal gas, 19:12025 (RA;US)
High pressure ceramic air heater for indirectly-fired gas turbine applications, 19:12023 (RA;US)
METC combustion research facility, 19:12008 (RA;US)
Premixed burner studies of NO_x formation and control, 19:12032 (RA;US)
Toms Creek integrated gasification combined cycle demonstration project: Quarterly report, July 1–September 30, 1993, 19:11985 (R;US)
Hoppers
CE IGCC repowering project: Bins and lockhoppers: Topical report, 1 January, 1992–28 February, 1993, 19:11513 (R;US)
Hot Gas Cleanup
Advanced hybrid gasification facility, 19:12065 (RA;US)
American electric power presssurized fluidized bed combustion technology status, 19:11981 (RA;US)
Applications of moving granular-bed filters to advanced systems, 19:12088 (RA;US)
Ceramic filter material issues, 19:12093 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel and a rich-quench-lean combustor, 19:11996 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel from a fixed bed gasifier, 19:12026 (RA;US)
DSRP, direct sulfur production, 19:12085 (RA;US)
Desulfurization of hot fuel gas with Z-Sorb III sorbent, 19:12064 (RA;US)
Evaluation of options for CO_2 capture/utilization/disposal, 19:12079 (RA;US)
Fixed-bed testing of a molybdenum-promoted zinc titanate sorbent for hot gas desulfurization, 19:12076 (RA;US)

Fluid-bed HGD PDU, 19:12075 (RA;US)
High temperature hydrogen sulfide removal with tin oxide, 19:12084 (RA;US)
Hollow fiber catalytic membranes, 19:12066 (RA;US)
IGCC database and hot gas cleanup systems studies, 19:12081 (RA;US)
Integrated low emissions cleanup system for multi-contaminant control, 19:12089 (RA;US)
METC fluid-bed test rigs/test program, 19:12077 (RA;US)
NH_3/H_2S advances, 19:12083 (RA;US)
Novel concept for an on-line alkali monitoring probe, 19:12070 (RA;US)
Pressurized circulating fluidized bed demonstration project, 19:12044 (RA;US)
Testing of zinc titanate desulfurization sorbents for moving-bed applications, 19:12061 (RA;US)
Thermal/chemical degradation of inorganic membrane materials, 19:12067 (RA;US)
Trace element emissions, 19:12087 (RA;US)
Westinghouse filter update, 19:12092 (RA;US)

Market
A utility's perspective of the market for IGCC, 19:11988 (RA;US)
Overview: Utility market for advanced coal-fired systems, 19:11987 (RA;US)

Materials Testing
CE IGCC repowering project: Materials for coal gasification environment: Topical report, June 1993, 19:11982 (R;US)

Peat
New alternatives for electricity production: Performance of peat-fuelled air gasification combined-cycle power plants, 19:12036 (R;FI)

Technology Assessment
A utility's perspective of the market for IGCC, 19:11988 (RA;US)
American electric power presssurized fluidized bed combustion technology status, 19:11981 (RA;US)
Coal future, the impact of IGCCs and PFBCs, 19:11990 (RA;US)
Overview: Utility market for advanced coal-fired systems, 19:11987 (RA;US)
The systems and the development targets for IGCC, 19:11995 (RA;US)

COMBUSTION CHAMBERS
A coal-water slurry fueled internal combustion engine and method for operating same, 19:12451 (PA;US)

COMBUSTION CONTROL
Concept selection for advanced low-emission coal fired boiler, 19:12037 (R;US)

COMBUSTION ENGINEERING GASIFICATION PROCESS
See CE ENTRAINED FUEL PROCESS

COMBUSTION KINETICS
Analysis of forward and inverse problems in chemical dynamics and spectroscopy: Progress performance report, November 1, 1992–October 31, 1993, 19:12705 (R;US)
Combustion-related studies using weakly-bonded complexes, 19:12706 (R;US)
Rate coefficient for the reaction $H + O_2 \rightarrow OH + O$: Results from 2000 to 5300 K, 19:12703 (R;US)

COMBUSTION PRODUCTS
See also ASHES
Behavior of sulfur and chlorine in coal during combustion and boiler corrosion: Final technical report, 1 September, 1992–31 August, 1993, 19:11522 (R;US)
Integrated Low Emissions Cleanup system for direct coal fueled turbines, (moving bed, fluid bed contactor/ceramic filter): Twenty-fourth quarterly status report, July–September 1993, 19:12053 (R;US)

COMBUSTORS
See also CYCLONE COMBUSTORS
FLUIDIZED-BED COMBUSTORS
PULSE COMBUSTORS
Advanced coal-fueled gas turbine systems: Quarterly report, January–March 1993, 19:11517 (R;US)
Advanced coal-fueled gas turbine systems: Subscale combustion testing: Topical report, Task 3.1, 19:11516 (R;US)
Combustion tests of a turbine simulator burning low Btu fuel and a rich-quench-lean combustor, 19:11996 (RA;US)
Development and demonstration of a wood-fired gas turbine system, 19:12000 (RA;US)
Premixed burner studies of NO_x formation and control, 19:12032 (RA;US)
Pressurized burner test facility, 19:12074 (RA;US)
Ultra-low gas turbine emissions using catalytic and noncatalytic porous combustors, 19:12097 (RA;US)

COMMERCE (NUCLEAR)

COPROCESSING
Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1991–March 27, 1992, 19:11438 (R;US)
Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1991–December 26, 1991, 19:11437 (R;US)
Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 28, 1992–June 30, 1992, 19:11439 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1990–June 26, 1990, 19:11432 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1989–December 26, 1989, 19:11430 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1990–March 26, 1991, 19:11434 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, June 27, 1991–September 26, 1991, 19:11436 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1991–June 26, 1991, 19:11435 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 27, 1990–December 26, 1990, 19:11433 (R;US)
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Final report, September 26, 1989–March 31, 1993, 19:11440 (R;US)
CORALS
Comparison of the ossification kinetics after implantation of a radioactivated coral and a natural coral, 19:13172 (R;FR)

Study by X-ray diffraction of the crystalline structure versus time of a radioactive implanted coral and of a non radioactive implanted coral, 19:13171 (R;FR)
Study of the mineralization of coral implanted in vivo by radioactive tracers, 19:13173 (R;FR)

CORES (REACTOR)
See REACTOR CORES

CORN (MAIZE)
See MAIZE

CORN STOVER
See AGRICULTURAL WASTES
MAIZE

CORNEA
Noninvasive spectroscopic diagnosis of superficial ocular lesions and corneal infections, 19:13165 (R;US)

CORRELATION FUNCTIONS
Variational approach to multi-time correlation functions, 19:13363 (R;FR)

CORROSION
See also STRESS CORROSION
Corrosion data base for the fuel cycle (phase 2): Final report, 19:14278 (R;DE;In German)

CORROSION RESISTANT ALLOYS
See also STEEL-CR18NI11
STEEL-CR18NI9TI
STEEL-CR19NI10-L
Problems of nuclear science and technology: Scientific-technical collection, 19:12503 (I;RU;In Russian)

COSMIC GAMMA BURSTS
Gamma-ray optical counterpart search experiment (GROCSE), 19:13423 (R;US)

COTTON
The structure of pectins from cotton suspension culture cell walls: Progress report, 19:13137 (R;US)

COULOMB EXCITATION
Relativistic Coulomb excitation by a deformed projectile, 19:13769 (R;DE)

COUNTERS (RADIATION)
See RADIATION DETECTORS

COVERINGS
In situ testing to determination field-saturated hydraulic conductivity of UMTRA Project disposal cell covers, liners, and foundation areas: Special study, 19:11672 (R;US)

CP INVARIANCE
An experiment to study CP violation in the B system using an internal target at the HERA proton ring, 19:12932 (R;DE)
CKM parameter fits, the B_s^0- anti B_s^0 mixing ratio x_s and CP-violating phases in B decays, 19:13646 (R;DE)

CRACK GROWTH
See CRACK PROPAGATION

CRACK PROPAGATION
Underwater manipulator, 19:12735 (PA;US)

CRACKING
The effect of gamma radiation on reference electrodes and platinum and carbon steel bare metal electrodes in a simulated waste solution, 19:11734 (R;US)

CRACKS
Crack detection using resonant ultrasound spectroscopy, 19:12993 (PA;US)

CRANES
Department of Energy Hoisting and Rigging Manual, 19:13325 (R;US)

CRESOLS
Oxidation of phenolics in supercritical water: Quarterly technical progress report, September 1, 1993–November 30, 1993, 19:12678 (R;US)

CRESYLIC ACID
See CRESOLS

CRITICAL ASSEMBLIES
See ZERO POWER REACTORS

CRITICAL FIELD
Landau quantization and superconductivity at high magnetic fields, 19:13916 (R;US)

CRITICAL HEAT FLUX
Representation of critical heat flux in rod bundles, 19:12771 (I;DE;In German)

CRITICALITY
A manual for QUICRI, a computer code for simply evaluating nuclear criticality condition data, 19:12730 (R;JP;In Japanese)
Criticality accident detector coverage analysis using the Monte Carlo Method, 19:11867 (R;US)
Los Alamos Critical Experiments Facility: Quarterly progress report, January 1–March 31, 1993, 19:12734 (R;US)
Thermal-spectrum recriticality energetics, 19:11860 (R;US)

CRITICALITY ACCIDENTS
See CRITICALITY
RADIATION ACCIDENTS

CROSS SECTIONS
A manual for RABTH, a code module to build effective cross section by solving one-dimensional ultra-fine energy group transport equation, 19:14252 (R;JP;In Japanese)

CROSSED BEAMS
See COLLIDING BEAMS

CROWN ETHERS
Metal ion complexation by ionizable crown ethers: Progress report, January 1, 1991–December 31, 1993, 19:12640 (R;US)
The intramolecular cyclization of bis-2,5-dimethylene-2,5-dihydrofurans and bis-2,5-dimethylene-2,5-dihydrothiophenes: An approach to macrocycles, 19:12680 (R;US)

CRUDE OIL
See PETROLEUM

CRYSTAL FIELD
D and f electrons in a qp-quantized cubical field, 19:13418 (R;FR)

CRYSTAL PHASE TRANSITIONS
See CRYSTAL-PHASE TRANSFORMATIONS

CRYSTAL STRUCTURE
Applied Chemistry Division progress report for the period 1990-1992, 19:12668 (R;IN)
Site populations analysis of the $Sm_2(Co,Fe)_{17}$ alloys using Moessbauer spectroscopy, 19:13893 (I;BR;In Portuguese)

CRYSTAL-PHASE TRANSFORMATIONS
Cubic to tetragonal crystal lattice reconstruction during ordering or decomposition, 19:12544 (R;US)

CRYSTALLIZATION
Improvement of melt crystallization's efficiency for industrial applications, 19:12420 (RA;FR)

CRYSTALS
See also MONOCRYSTALS
POLYCRYSTALS
Proceedings of 21. All-Union conference on physics of charged particles interaction with crystals: Part 1. Physics of orientational effects, 19:13905 (I;RU;In Russian)
Simulated quenching in the grand-canonical ensemble, 19:13878 (R;US)

CSF PROCESS
See COAL LIQUEFACTION

CSIRO PROCESS
See COAL GASIFICATION

CULTURES (CELLS)
See CELL CULTURES

CUMULATIVE EFFECT
See PARTICLE PRODUCTION

CUPRATES
About mid-infrared optical spectrum of high-T_c superconducting compounds, 19:12579 (R;UA)
Properties of doped and undoped $(Ca,Sr)CuO_2$ thin films, 19:12567 (R;US)
Twin spacing and the structural phase transitions in 1:2:3 high-T_c superconductors, 19:12580 (R;UA)

CURING
Heat transfer modelling of the saltstone pouring and curing process: Task Number: 93-016-0, 19:11789 (R;US)

CURRENT-DRIVE HEATING
Travel to Japan to participate in RF meetings for plasma heating: Foreign trip report, November 8–21, 1993, 19:14137 (R;US)

CYANIDES
Waste minimization at Lawrence Livermore National Laboratory: A case study of environmentally conscious manufacturing, 19:12438 (R;US)
CYCLASES
[Regulation of terpene metabolism]: Progress report, [March 15, 1993–March 14, 1994], 19:13138 (R;US)
CYCLOALKANES
Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 26, 1989–March 26, 1990, 19:11431 (R;US)
CYCLONE COMBUSTORS
Results of Babcock & Wilcox's clean coal technology combustion modification projects: Coal reburning for cyclone boiler NO_x control and low NO_x cell$_{TM}$ burner demonstrations, 19:12040 (RA;US)
Status of coal tech's air cooled slagging combustor, 19:12051 (RA;US)
CYCLONE SEPARATORS
Particulate control for coal-fueled diesel engine exhaust, 19:12449 (RA;US)
Sub-scale development of an acoustically enhanced cyclone for PFBC, 19:12098 (RA;US)
CYCLOTRONS
A study of thallium-201 preparation at IPEN-CNEN/SP, 19:12700 (R;BR;In Portuguese)
Upgrading the control system for the Accelerators at the Svedberg Laboratory, 19:12886 (RA;JP)
CYTRIPHOS
See AMINES

DECISION MAKING
Ethics and rationality in information-enriched decisions: A model for technical communication, 19:14257 (R;US)
Using the National Information Infrastructure for social science, education, and informed decision making, 19:14279 (R;US)
DECOMMISSIONING
Decommissioning of the Risoe Hot Cell facility: 6. Periodic report covering January 1 to June 30, 1993, 19:13315 (R;DK)
DECONTAMINATION
Applied Chemistry Division progress report for the period 1990-1992, 19:12668 (R;IN)
Decontamination and dismantlement, 19:12280 (RA;US)
Waste processing operations, 19:11748 (RA;US)
DECONTAMINATION FACTOR
See DECONTAMINATION
DEEP INELASTIC HEAVY ION REACTIONS
Kinetics of an expanding pion gas and low-mass dilepton emission, 19:13492 (R;DE)
DEEP INELASTIC SCATTERING
A note on the BFKL Pomeron and the 'Hot Spot' cross section, 19:13569 (R;DE)
Absorptive corrections to structure functions at small-x, 19:13573 (R;DE)
Partons and QCD effects in the pomeron, 19:13487 (R;DE)
QCD parametrizations of the parton distribution of deep inelastic scattering, 19:13463 (R;UA)
The longitudinal structure function $F_L(x,Q^2)$ at small x, 19:13577 (R;DE)
DEFECTS
The threshold energy for defect production in SiC: A molecular dynamic study, 19:14202 (R;US)
DEFORMATION
See also NUCLEAR DEFORMATION
BARS/SSC/SPHINX4.0: BARS Bibliographic Data Retrieval System, 19:14246 (CM;US)

DEFORMED NUCLEI
An improved choice of oscillator basis for banana shaped nuclides, 19:13664 (R;US)
Cranking model conserving to mean square of angular momentum, 19:13686 (R;RU;In Russian)
Vibrational states in deformed nuclei. Chaos, order and individual nature of nuclei, 19:13688 (R;RU)
DELETIONS (CHROMOSOMAL)
See CHROMOSOMAL ABERRATIONS
DELPHI METHOD
German Delphi report on the development of science and technology, 19:12321 (I;DE;In German)
DELTA RESONANCES (MESON)
See MESONS
DEMOCRITUS REACTOR
Analyses of Greek Research Reactor with mixed HEU-LEU Be reflected core, 19:12196 (R;US)
DENATURED FUEL
A simple method for rapidly processing HEU from weapons returns, 19:12460 (R;US)
DENMARK
Conservation and retrieval of information: Elements of a strategy to inform future societies about nuclear waste repositories, 19:11719 (R;DK)
DENSITY (ELECTRON)
See ELECTRON DENSITY
DENSITY (ENERGY-LEVEL)
See ENERGY-LEVEL DENSITY
DENSITY (PLASMA)
See PLASMA DENSITY
DENSITY MATRIX
Relaxation of the density matrix for an arbitrary spin in random external fields, 19:13431 (R;RU)
DEOXYCYTIDINURIA
See URINE
DEOXYPENTOSE NUCLEIC ACID
See DNA
DEOXYRIBONUCLEIC ACID
See DNA
DEPARTMENT OF DEFENSE
See US DOD
DEPLETED URANIUM
Thermal performance of a depleted uranium shielded storage, transportation, and disposal package, 19:11756 (R;US)
DEPLETION (NUCLEAR FUELS)
See BURNUP
DEPOSITION
Contributions to CNR-International Workshop on laser deposition of advanced materials, 19:12601 (R;IT)
DEPOSITS
Hydrogeochemical and production controls on NORM in oil- and gas- field operations: Technical progress report, January 1, 1993–March 31, 1993, 19:11575 (R;US)
DEPTH DOSE DISTRIBUTIONS
Calculations of cross sections and depth-dose distributions when using heavy ion beams, 19:13181 (RA;FR)
Radiobiological aspects of radiotherapy treatment planning, 19:13234 (R;IT)
DEPTH DOSES
See DEPTH DOSE DISTRIBUTIONS
DESERTRON
See SUPERCONDUCTING SUPER COLLIDER
DESIGN
The limits of intelligence in design, 19:14261 (R;US)
DESIGN BASIS ACCIDENTS
Fabrication test of thoria tube, 19:11624 (R;JF;In Japanese)
DESOXYRIBONUCLEIC ACID
See DNA
DESY
Deutsches Elektronen-Synchrotron DESY. Scientific annual report 1992, 19:12823 (I;DE;In German)

EXCIMER LASERS
Contributions to 9th international symposium on gas flow and chemical lasers, 19:12788 (R;IT)
Investigation of potential laser systems for the LIDAR Thomson scattering technique, 19:13408 (IA;XA)
Parametric study of x-ray pre-ionizer with plasma cathode, 19:12791 (R;IT)
Short-pulse, high-intensity lasers at Los Alamos, 19:12809 (R;US)

EXCITATION
See also COLLECTIVE EXCITATIONS
COULOMB EXCITATION
On the mechanisms of the laser optogalvanic (L O G) signal production in N_2 discharge, 19:13846 (IA;IR)

EXCITED STATES
See also ROTATIONAL STATES
RYDBERG STATES
Spin determination of valence and inner hole states via the ^{208}Pb(d-vector,t)^{207}Pb reaction at E_d=200 MeV, 19:13777 (R;FR)

EXCRETION ANALYSIS
See PERSONNEL MONITORING

EXHAUST GASES
Particulate control for coal-fueled diesel engine exhaust, 19:12449 (RA;US)
Synergistic effects in mice of trichloroethylene and copper overload on pulmonary clara cells injury, 19:13317 (R;IT)

EXHAUST SYSTEMS
SNM holdup assessment of Los Alamos exhaust ducts: Final report, 19:11849 (R;US)

EXOTIC ATOMS
See HADRONIC ATOMS

EXOTIC RESONANCES
Evidence for exotic dibaryons, 19:13540 (RA;US)
Nuclei at the limits of particle stability, 19:13706 (R;FR)

EXPERIMENTAL BREEDER REACTOR-2
See EBR-2 REACTOR

EXPERIMENTAL FACILITIES (ACCELERATOR)
See ACCELERATOR FACILITIES
EXPERIMENTAL NEOPLASMS
C3H10T1/2 cell transformation after fractionated doses of neutrons of different energies, 19:13233 (R;IT)
Specification of fast neutron radiation quality from cell transformation data, 19:12202 (R;IT)
EXPLOSIONS
See also CHEMICAL EXPLOSIONS
NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS
Using Monte Carlo techniques and parallel processing for debris hazard analysis of rocket systems, 19:13007 (R;US)
EXPLOSIVE FRACTURING
A numerical study of bench blast row delay timing and its influence on percent-cast, 19:11510 (R;US)
EXPOSURE (RADIATION DOSES)
See RADIATION DOSES
EXTERNAL IRRADIATION
Requirements for the approval of dosimetry services under the Ionising Radiations Regulations 1985: Pt. 1: External radiations, 19:13265 (I;GB)
EXTRACTION (SOLVENT)
See SOLVENT EXTRACTION
EXTRACTION COLUMNS
Purex pulse column designs for capacity factor of 3.0 to 3.5, 19:11615 (R;US)
EYES
See also CORNEA
Noninvasive spectroscopic diagnosis of superficial ocular lesions and corneal infections, 19:13165 (R;US)

F

F CODES
FIELD 3 - code complex for electrostatic field calculation in three-dimensional ranges as applied tc ion and electron sources, 19:14262 (R;RU;In Russian)

Environmental assessment of remedial action at the Naturita uranium processing site near Naturita, Colorado: Revision 3, 19:11833 (R;US)
Minimally invasive three-dimensional site characterization system: Final report, 19:11832 (R;US)
Notes on nitric acid oxide absorption system, 19:11606 (R;US)
Uranium Mill Tailings Remedial Action Project Annual Environmental Monitoring Report calendar year 1992: Volume 1, 19:11693 (R;US)
Uranium Mill Tailings Remedial Action Project Annual Environmental Monitoring Report calendar year 1992: Volume 2, 19:11694 (R;US)
FEED MATERIALS PRODUCTION CENTER
An integrated approach to the characterization and decontamination of uranium contaminated soils, 19:11812 (R;US)
Automated container transportation using self-guided vehicles: Fernald site requirements, 19:12720 (R;US)

Determining uranium speciation in contaminated soils by molecular spectroscopic methods: Examples from the Uranium in Soils Integrated Demonstration, 19:11850 (R;US)
Identifying environmental safety and health requirements for an Environmental Restoration Management Contractor, 19:11846 (R;US)
Soil decontamination using aqueous biphasic separation, 19:11795 (R;US)
Supporting soil remediation at Fernald by electron beam methods, 19:11817 (R;US)

FERMILAB ACCELERATOR
Beam dynamics issues at Fermilab, 19:12840 (R;US)

FERMILAB COLLIDER DETECTOR
CDF End Plug calorimeter Upgrade Project, 19:12939 (R;US)
The D0 upgrade, 19:12938 (R;US)
Travel to Japan to participate in 9th Topical Workshop on Proton- Antiproton Collider Physics: Foreign trip report, October 15, 1993–October 25, 1993, 19:13587 (R;US)

FERMILAB TEVATRON
A new architecture for Fermilab's cryogenic control system, 19:12890 (RA;JP)
Minimax: Multiparticle physics at the TeVatron collider, 19:13630 (R;US)
Travel to Japan to participate in 9th Topical Workshop on Proton- Antiproton Collider Physics: Foreign trip report, October 15, 1993–October 25, 1993, 19:13587 (R;US)

FERMIONS
See also BARYONS
LEPTONS
QUARKS
Pairing and low temperature properties of 2 D Fermi-systems with attraction between particles, 19:12526 (R;UA)
The realization of Nambu-Jona-Lasinio type model on physical fields, 19:13468 (RA;RU)

FERNALD PRODUCTION PLANT
See FEED MATERIALS PRODUCTION CENTER

FERRIC COMPOUNDS
See IRON COMPOUNDS

FERRITE
Characterization of the corrosion resistance of duplex stainless steels using local current density mapping techniques, 19:12481 (R;US)

FERRITES
Enhanced durability of desulfurization sorbents for fluidized-bed applications, 19:12062 (RA;US)
High temperature hydrogen sulfide removal with tin oxide, 19:12084 (RA;US)

FERRITIC STEELS
Effect of vanadium and titanium on mechanical properties of low-chromium, reduced-activation ferritic steels, 19:14092 (RA;US)

FERROELECTRIC MATERIALS
Emission from ferroelectric cathodes: Revision 1, 19:13389 (R;US)

FERROMAGNETISM
Cold cluster ferromagnetism, 19:13880 (R;US)

FERROUS COMPOUNDS
See IRON COMPOUNDS

FETUSES
Transfer of significant radionuclides to fetuses, 19:13289 (RA;JP;In Japanese)

FEYNMAN PATH INTEGRAL
On the path integral in imaginary Lobachevsky space, 19:13351 (R;DE;In German)

FIBERS
Anisotropic fiber alignment in composite structures, 19:12616 (PA;US)

FIBROBLASTS
Chromosomal instability induced by heavy ions in human fibroblasts, 19:13302 (RA;FR)
Malignant transformation of human fibroblasts by neutrons and by gamma radiation: Relationship to mutations induced: Progress report, [January 1, 1993–December 31, 1993], 19:13230 (R;US)

FIELD ALGEBRA
Extended Kac-Moody algebras and applications, 19:13472 (R;FR)
On the completeness of the set of classical W-algebras obtained from DS reductions, 19:13430 (R;DE)

FIELD PRODUCTION EQUIPMENT
Hydrogeochemical and production controls on NORM in oil- and gas- field operations: Technical progress report, January 1, 1993–March 31, 1993, 19:11575 (R;US)

FIELD THEORIES
See also QUANTUM FIELD THEORY
Is it possible to assign physical meaning to field theory with higher derivatives?, 19:13470 (R;RU)
Old and new topics in conformal field theory, 19:13432 (R;FR)

FIELDS (ELECTROMAGNETIC)
See ELECTROMAGNETIC FIELDS

FIELDS (MAGNETIC)
See MAGNETIC FIELDS

FILAMENT (PLASMA)

FILTERS
See also AIR FILTERS

Design
A gas stream clean-up filter and method for forming same, 19:11464 (PA;US)
A sorbent injection and filtration process for H_2S removal from hot gas, 19:12069 (RA;US)
CE IGCC Repowering Project char filters: Topical report, November 1990–May 1993, 19:11426 (R;US)
Specific filter designs for PFBC, 19:12057 (RA;US)
The development of a porous silicon nitride crossflow filter: Final report, September 1988–September 1992, 19:12054 (R;US)

Fabrication
A gas stream clean-up filter and method for forming same, 19:11464 (PA;US)
The development of a porous silicon nitride crossflow filter: Final report, September 1988–September 1992, 19:12054 (R;US)

Materials
CE IGCC Repowering Project char filters: Topical report, November 1990–May 1993, 19:11426 (R;US)
The development of a porous silicon nitride crossflow filter: Final report, September 1988–September 1992, 19:12054 (R;US)

Nonradioactive Waste Disposal
An innovative method for mixed waste disposal at the Savannah River Site's high level liquid waste tank farms, 19:11772 (R;US)

Operation
Effects of operating conditions on dust cake behavior in filters with high surface-to-volume ratios, 19:12073 (RA;US)

Performance
Ceramic filter material issues, 19:12093 (RA;US)
Ceramic filters for removal of particles from hot gas streams, 19:12095 (RA;US)
Effects of operating conditions on dust cake behavior in filters with high surface-to-volume ratios, 19:12073 (RA;US)
Evaluation of ceramic filter material, selection for application, 19:12094 (RA;US)
Initial operation of the Tidd PFBC hot gas clean up filter, 19:12091 (RA;US)
Particulate characterization for PFBC filter systems, 19:12058 (RA;US)

Performance Testing
CE IGCC Repowering Project char filters: Topical report, November 1990–May 1993, 19:11426 (R;US)
Some ceramic options, 19:12096 (RA;US)
Subpilot scale gasifier evaluation of ceramic cross flow filter: Final report, February 1, 1988–December 31, 1992, 19:11422 (R;US)
Westinghouse filter update, 19:12092 (RA;US)

Silicon-germanium/gallium phosphide material in high power density thermoelectric modules: Final report, February 1980–September 1981, 19:12353 (R;US)
GALLIUM SELENIDES
Brillouin scattering study of the phase transition in Tl In S_2 and Tl Ga Se_2, 19:12572 (IA;IR)
Photoconductivity in Ga Se under dye laser excitation, 19:12494 (IA;IR)
Raman scattering in gallium selenide and sulfide films, 19:12646 (IA;IR)
Study of optical anisotropic conductivity of Ga Se crystal under intense optical excitations, 19:13871 (IA;IR;In Persian)
GALLIUM SULFIDES
Raman scattering in gallium selenide and sulfide films, 19:12646 (IA;IR)
GAMMA CAMERAS
Hydrogenated amorphous silicon (a-Si:H) based gamma camera: Monte Carlo simulations, 19:13170 (R;US)
GAMMA RADIATION
Biological effects of ^{20}Ne ion irradiation on tumoral and healthy rodent cells, 19:13300 (RA;FR)
Comment on: "Interference effects between independent gamma rays", 19:13809 (R;US)
GAMMA REACTIONS
See PHOTONUCLEAR REACTIONS
GAMMA SOURCES
Use of self absorption in a radioactive gamma-source for determination of its effective thickness, 19:11886 (I;BG;In Bulgarian)
GAMMA SPECTROMETERS
An in-beam Compton-suppressed Ge spectrometer for nondestructive neutron activation analysis, 19:12962 (R;DE)
GANIL
See GANIL CYCLOTRON
GANIL CYCLOTRON
The next generation control system of GANIL, 19:12884 (RA;JP)
GAS CHROMATOGRAPHY
Utility programs used for EPA Contract Laboratory Program computations, 19:14276 (R;US)
GAS COOLANTS
See GASES
GAS DYNAMIC LASERS
Gain estimation in gasdynamic lasers using an indirect coupled method, 19:12800 (IA;IR)
GAS ENGINES
See INTERNAL COMBUSTION ENGINES
GAS TUNGSTEN-ARC WELDING
System for power density stabilization on argon tnngsten-arc welding, 19:12519 (IA;RU;In Russian)
GAS TURBINE ENGINES
Advanced turbine systems program: Conceptual design and product development: Topical report, November 1993, 19:11597 (R;US)
GAS TURBINE POWER PLANTS
Evaluation of the Gas Turbine Modular Helium Reactor, 19:12143 (R;US)
On-site power generation for the future, 19:11906 (RA;FI)
GAS TURBINES
See also COAL-FIRED GAS TURBINES
Air Heaters
High pressure ceramic air heater for indirectly-fired gas turbine applications, 19:12023 (RA;US)
Coatings
Functionally gradient materials for thermal barrier coatings in advanced gas turbine systems, 19:12017 (RA;US)
Combustors
Advanced coal-fueled gas turbine systems: Quarterly report, January–March 1993, 19:11517 (R;US)
Combustion tests of a turbine simulator burning low Btu fuel and a rich-quench-lean combustor, 19:11996 (RA;US)
Development and demonstration of a wood-fired gas turbine system, 19:12000 (RA;US)
Integrated Low Emissions Cleanup system for direct coal fueled turbines, (moving bed, fluid bed contactor/ceramic filter): Twenty-fourth quarterly status report, July–September 1993, 19:12053 (R;US)
Premixed burner studies of NO_x formation and control, 19:12032 (RA;US)
Pressurized burner test facility, 19:12074 (RA;US)
Ultra-low gas turbine emissions using catalytic and noncatalytic porous combustors, 19:12097 (RA;US)
Control Systems
Interface between a gas turbine and PFBC, 19:12021 (RA;US)
Corrosion Protection
Functionally gradient materials for thermal barrier coatings in advanced gas turbine systems, 19:12017 (RA;US)
Damage
Life prediction of advanced materials for gas turbine applications, 19:12019 (RA;US)
Design
Advanced turbine systems - studies and conceptual design, 19:12007 (RA;US)
Ceramic retrofit program, 19:12009 (RA;US)
Development of advanced gas turbine systems, 19:12003 (RA;US)
Direct coal-fired gas turbines for combined cycle plants, 19:12024 (RA;US)
GE power generation technology challenges for advanced gas turbines, 19:12004 (RA;US)
Interface between a gas turbine and PFBC, 19:12021 (RA;US)
Reduction of turbine endwall total pressure loss and heat transfer using the iceformation design method, 19:12016 (RA;US)
Toms Creek integrated gasification combined cycle demonstration project: Quarterly report, July 1–September 30, 1993, 19:11985 (R;US)
U.S. Navy intercooled recuperated (ICR) engine, 19:12012 (RA;US)
Fluidized-Bed Combustors
Advanced coal-fueled gas turbine systems: Quarterly report, January–March 1993, 19:11517 (R;US)
Fuel Feeding Systems
Development of a dry-feed system for a coal-fired gas turbine, 19:12029 (RA;US)
Heat Transfer
Vortex-generator induced enhanced heat transfer in gas turbine blade coolant channels with rotation, 19:12018 (RA;US)
Laser Beam Machining
Laser material processing in gas turbine industries, 19:11885 (IA;IR)
Manufacturing
Materials/manufacturing element of the advanced turbine system program, 19:12010 (RA;US)
Operation
Air extraction in gas turbines burning coal-derived gas, 19:12028 (RA;US)
Performance
Air extraction in gas turbines burning coal-derived gas, 19:12028 (RA;US)
Combustion tests of a turbine simulator burning low Btu fuel from a fixed bed gasifier, 19:12026 (RA;US)
GE power generation technology challenges for advanced gas turbines, 19:12004 (RA;US)
NO_x abatement in advanced gas turbines, 19:12020 (RA;US)
Reduction of turbine endwall total pressure loss and heat transfer using the iceformation design method, 19:12016 (RA;US)
U.S. Navy intercooled recuperated (ICR) engine, 19:12012 (RA;US)
Performance Testing
Full-scale and bench-scale testing of a coal-fueled gas turbine system, 19:12022 (RA;US)
Heavy duty gas turbine combustion tests with simulated low BTU coal gas, 19:12025 (RA;US)
Pulse Combustors
Pressure-gain combustion, 19:12031 (RA;US)

Research Programs
Collaborative advanced gas turbine program, 19:12011 (RA;US)
Industry/University consortium for ATS research, 19:12013 (RA;US)
METC combustion research facility, 19:12008 (RA;US)
University participation in the ATS program, 19:12015 (RA;US)
Retrofitting
Ceramic retrofit program, 19:12009 (RA;US)
Reviews
Welcome - ATS University Workshop, 19:12014 (RA;US)
Service Life
Life prediction of advanced materials for gas turbine applications, 19:12019 (RA;US)
Specifications
Toms Creek integrated gasification combined cycle demonstration project: Quarterly report, July 1–September 30, 1993, 19:11985 (R;US)
Technology Assessment
Direct coal-fired gas turbines for combined cycle plants, 19:12024 (RA;US)
Gas fired advanced turbine system, 19:12005 (RA;US)
The systems and the development targets for IGCC, 19:11995 (RA;US)
Thermal Efficiency
Advanced turbine systems program, 19:12006 (RA;US)
Development of advanced gas turbine systems, 19:12003 (RA;US)
Toms Creek integrated gasification combined cycle demonstration project: Quarterly report, July 1–September 30, 1993, 19:11985 (R;US)
Thermodynamic Cycles
Advanced turbine systems - studies and conceptual design, 19:12007 (RA;US)
Advanced turbine systems program, 19:12006 (RA;US)
Gas fired advanced turbine system, 19:12005 (RA;US)
GAS UTILITIES
Primer on gas integrated resource planning, 19:12338 (R;US)
GAS WELLS

RARE GASES
SYNTHESIS GAS
VAPORS
A gas stream clean-up filter and method for forming same, 19:11464 (PA;US)
Treatment of toxic gases SO_2 and NO_x by electron beam irradiation, 19:12693 (R;BR;In Portuguese)
GASIFICATION
See also COAL GASIFICATION
Production of low-cost hydrogen: Final report, September 1989–August 1993, 19:11892 (R;US)
GASOLINE
Alcohols and ethers for improving air quality, 19:12459 (RA;FI)
Energy and crude oil input requirements for the production of reformulated gasolines, 19:11559 (R;US)
Fuel ethanol for oxygenated gasoline in Finland, 19:12458 (RA;FI)
Reformulated gasoline: Costs and refinery impacts, 19:11573 (R;US)
Relating feedstock composition to product slate and composition in catalytic cracking: 1. Bench scale experiments with liquid chromatographic fractions from Wilmington, CA, >650°F resid, 19:11561 (R;US)
GASOLINE ENGINES
See INTERNAL COMBUSTION ENGINES
GAUSS NUCLEAR MODEL
See GAUSS POTENTIAL
GAUSS POTENTIAL
The asymptotics of matrix elements of Gaussian potential between the basis functions of three-dimensional harmonic oscillator, 19:13464 (R;UA)
GENE PROMOTORS
See GENE REPRESSORS
GENE RECOMBINATION PROTEINS
Rearrangement of RAG-1 recombinase gene in DNA-repair deficient "wasted" mice, 19:13135 (R;US)
GENE REPRESSORS
[Genetic engineering with a gene encoding a soybean storage protein to identify DNA sequences to control its expression]: Annual report, 1993, 19:13140 (R;US)
GENERAL CIRCULATION MODELS
Studies in regional climate sensitivity, predictability, and temporal response: Progress report, September 1992–February 1993, 19:13035 (R;US)
GENERATORS (ELECTRIC)
See ELECTRIC GENERATORS
GENERATORS (STEAM)
See STEAM GENERATORS
GENETIC RADIATION EFFECTS
Genetic monitoring of persons subjected to increased impact of mutagenic and carcinogenic factors - prophylaxis of late effects, 19:13278 (I;BG;In Bulgarian)
Nuclear Industry Family Study, 19:13268 (I;GB)
Proceedings of a Workshop on Genetic Effects of Ionizing Radiation, 19:13224 (R;CA)
GEOCHEMICAL SURVEYS
Development of light hydrocarbon gas lithogeochemistry and its response to different styles of mineralization, 19:11958 (RA;FR)
GEOCHEMISTRY
Testing geochemical modeling codes using New Zealand hydrothermal systems, 19:11956 (R;US)
GEOCHRONOLOGY
See AGE ESTIMATION
GEOLOGIC FAULTS
Hydrologic characterization of faults and other potentially conductive geologic features in the unsaturated zone, 19:13334 (RA;US)
GEOLOGIC FISSURES
Normal joint stiffness a a function of spatial geometry, 19:11718 (RA;US)
GEOLOGIC FORMATIONS
DOE Waste Package Project: Quarterly progress report, October 1, 1993–December 31, 1993, 19:11683 (R;US)
GEOLOGIC FRACTURES
See also GEOLOGIC FAULTS
Application of geophysical methods for fracture characterization, 19:13337 (RA;US)
Flow channeling in a single fracture as a two-dimensional strongly heterogeneous permeable medium, 19:13333 (RA;US)
Mass transport with chemical reactions in a varying thermal field, 19:13335 (RA;US)
Seismic characterization of fracture properties, 19:13336 (RA;US)
GEOLOGIC JOINTS

METHANE

GOLD 197
The reactions $pN \rightarrow pN\eta$ and $pA \rightarrow \eta X$ at SATURNE with the PINOT spectrometer, 19:13748 (RA;US)

GOLD 197 REACTIONS
QMD simulation of multifragment production in heavy ion collisions at E/A=600 MeV, 19:13766 (R;DE)
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter, 19:13722 (R;US)

GOLD 197 TARGET
Investigation of reabsorption effects in subthreshold π^0 production, 19:13765 (R;DE)
Multifragmentation in ^{4}He+Au collisions at relativistic energies, studied with the 4π-setup FASA, 19:13796 (R;RU)
Particle production in heavy-ion collisions at intermediate energies, 19:13768 (R;DE)
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter, 19:13722 (R;US)

GRAIN BOUNDARIES
Atomic scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM, 19:12638 (R;US)
Attempts to model the generation of new grain boundaries during the deformation of polycrystals, 19:12529 (R;US)
On the relation between sliding and migration of symmetrical tilt grain boundaries, 19:13877 (R;US)

GRAINS (CEREAL)
See CEREALS
SEEDS

GRAND UNIFIED THEORY
Radiative corrections to leptoquark pair production in e^+e^- annihilation, 19:13585 (R;DE)

GRANITES
Laboratory and in situ determination of the migration processes of actinide complexes and colloids in a fissured granitic environment. El Berrocal project (preliminary activities - phase 0), 19:13080 (R;XE)

GRANULAR BED FILTERS
Applications of moving granular-bed filters to advanced systems, 19:12088 (RA;US)

GRAPHITE
Corrosion of graphitic high temperature reactor materials in steam/helium mixtures at total pessures of 3-55 bar and temperatures of 900-1150 C (1173-1423K): Comprehensive report of Institute of Nuclear Safety Research (ISF) now Institute of Safety Research and Reactor Technology (ISR) experimental work, 19:12612 (R;DE;In German)
Influence of He^+ ion implantation on hydrogen retention in graphites types USB-15 and MPG-8, 19:12610 (IA;RU;In Russian)
Operation of DIII-D with all-graphite walls, 19:14161 (R;US)
Outgassing tests on graphites in temperature range 100-1600 degrees C, 19:14160 (R;IT)

GRAPHITE MODERATOR

GROUND DISPOSAL
Design document for landfill capping Prototype Decision Support System: Draft 1.0, 19:11714 (R;US)
Groundwater monitoring plan for the proposed state-approved land disposal structure, 19:11769 (R;US)

GROUND WATER
Chemical Analysis
Data validation report for the 100-HR-3 Operable Unit, fifth round groundwater samples, 19:13112 (R;US)
Environmental surveillance data report for the first quarter of 1993, 19:11732 (R;US)
F- and H-Area Sewage Sludge Application Sites Groundwater Monitoring Report: Third quarter 1993, 19:13117 (R;US)
Fingerprinting of groundwater by ICP-MS: Progress report, October 1, 1992–December 31, 1992, 19:13073 (R;US)
Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 19:11840 (R;US)

Computerized Simulation
Modeling groundwater flow on MPPs, 19:13110 (R;US)

Configuration
Groundwater maps of the Hanford Site, June 1993, 19:13111 (R;US)

Contamination
Combining expedited cleanup with innovative technology demonstrations, 19:11859 (R;US)
DNAPLs at DOE sites: Background and assessment of characterization technologies, 19:13097 (R;US)
Remedial Investigation/Feasibility Study Work Plan for the 200-UP-1 Groundwater Operable Unit, Hanford Site, Richland, Washington: Revision, 19:11839 (R;US)
Technical action plan at former Commodity Credit Corporation grain storage sites in Nebraska, Kansas, Iowa, and Missouri: Revision 2, 19:13063 (R;US)
UMTRA Project water sampling and analysis plan, Falls City, Texas, 19:13067 (R;US)

Flow Models
Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 19:11840 (R;US)
Swedish activities in the Oklo natural analogue project, 19:13079 (RA;XE)

Hydrodynamics
Conclusions on the possible variations of chemical and isotopic composition of groundwater systems in response to changed hydrodynamic conditions (based on investigations of deep groundwater systems and thermal-mineral waters and brines in tectonic active areas), 19:13089 (RA;XA)

Liquid Flow
Analysis of the regional groundwater flow in the Finssjoen area, 19:13108 (R;SE)

Maps
Groundwater maps of the Hanford Site, June 1993, 19:13111 (R;US)

Monitoring
F- and H-Area Sewage Sludge Application Sites Groundwater Monitoring Report: Third quarter 1993, 19:13117 (R;US)
Ground water protection management program plan, 19:11829 (R;US)
Ground-water monitoring under RCRA: RCRA Information Brief, 19:12308 (R;US)
Groundwater monitoring plan for the proposed state-approved land disposal structure, 19:11769 (R;US)
K-Area and Par Pond Sewage Sludge Application Sites Groundwater Monitoring Report: Third quarter 1993, 19:13118 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report: Third quarter 1993, 19:13119 (R;US)
Quarterly report of RCRA groundwater monitoring data for period July 1, 1993–September 30, 1993, 19:11805 (R;US)
RCRA corrective action permit requirements and modifications under Subpart F regulations: RCRA Information Brief, 19:12303 (R;US)
The direct sampling ion trap mass spectrometer for the rapid analysis of volatile organic contaminants in groundwater samples, 19:13116 (R;US)
UMTRA Project water sampling and analysis plan, Falls City, Texas, 19:13067 (R;US)
Waste Isolation Pilot Plant Groundwater Protection Management Program Plan, 19:13075 (R;US)

Quantitative Chemical Analysis
The direct sampling ion trap mass spectrometer for the rapid analysis of volatile organic contaminants in groundwater samples, 19:13116 (R;US)

Radiation Monitoring
Results of the fourth quarter tritium survey of the F- and H-Area seeplines: March–April 1993, 19:13115 (R;US)

Radioactivation
Analysis of tritium production in the vicinity of Linac and LEB tunnels at the Superconducting Super Collider Laboratory, 19:12845 (R;US)

Radiochemical Analysis
Environmental Monitoring Plan for Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:11687 (R;US)
Preoperational radiation surveillance of the WIPP project by EEG during 1992, 19:11671 (R;US)

Radionuclide Migration
Groundwater quality assessment for the Upper East Fork Poplar Creek Hydrogeologic Regime at the Y-12 Plant: 1991 groundwater quality data and calculated rate of contaminant migration, 19:11793 (R;US)
Laboratory and field studies related to the Hydrologic Resources Management Program: Progress report, October 1, 1992–September 30, 1993, 19:13099 (R;US)
N Springs expedited response action proposal, 19:11803 (R;US)
Results of the fourth quarter tritium survey of the F- and H-Area seeplines: March–April 1993, 19:13115 (R;US)
Use of a comprehensive calibration "gauntlet" approach for improved contaminants transport modeling at the F and H Area Seepage Basins, 19:11778 (R;US)

Remedial Action
Integrated test plan for crosswell compressional and shear wave seismic tomography for site characterization at the VOC Arid Site, 19:13113 (R;US)
RCRA corrective action permit requirements and modifications under Subpart F regulations: RCRA Information Brief, 19:12303 (R;US)

Sampling
Technical approach for the management of UMTRA ground water investigation-derived wastes, 19:11831 (R;US)
UMTRA project water sampling and analysis plan – Shiprock, New Mexico, 19:11827 (R;US)

HANFORD PRODUCTION REACTORS
Production of zirconium-niobium-95 and scandium-46 at Hanford, 19:12222 (R;US)
Capacity
Redox Phase 3 capacity, 19:12218 (R;US)
Cleaning
100-B Unit purge June 14, 1945, 19:12205 (R;US)
Failed Element Detection
Pile discharge water monitoring: Final report, IDS-19, 19:12203 (R;US)
Fuel Elements
Fission product formation in fuel elements, 19:12266 (R;US)
Fuel Rods
Corrosion limits on pile power levels, 19:12215 (R;US)
Removal of ruptured P-10 target slug from tube No. 1584-H, 19:12210 (R;US)
Removal of ruptured slug from tube 1174-D, 19:12209 (R;US)
Removal of ruptured slug from tube No. 2278-H, 19:12208 (R;US)
Removal of ruptured slug from tube No. 3486-H, 19:12211 (R;US)
The corrosion of Hanford fuel elements: Method for the treatment and analyses of in-pile corrosion data, 19:12217 (R;US)
Historical Aspects
Nuclear safety experience – Hanford production reactors, 19:12265 (R;US)
Isotope Production
Production of zirconium-niobium-95 and scandium-46 at Hanford, Addendum to HW-79404, 19:12223 (R;US)
Loss Of Flow
Presentation charts for 3560-KW incident, 19:12261 (R;US)
Neutron Flux
Thermal and fission neutron flux measurements in process tubing and in neutron activation test locations, 19:12221 (R;US)
Performance
High-capacity Purex study flowsheet, 19:11619 (R;US)
Power Distribution
Corrosion limits on pile power levels, 19:12215 (R;US)
Primary Coolant Circuits
Presentation charts for 3560-KW incident, 19:12261 (R;US)
Radioactive Effluents
Calculation of activity induced in diatomaceous earth, 19:12190 (R;US)
Selected radioisotopes' concentrations in integrated reactor effluent water samples, 19:13124 (R;US)
Reactor Channels
100-B unit purge May 20, 1945, 19:12206 (R;US)
100-F unit purge May 20, 1945, 19:12204 (R;US)
Production Test 105-3-MR: The use of dicalite diatomaceous earth as a purge material in the 100 areas, 19:12214 (R;US)
Reactor Cooling Systems
Reduction of rear face Zn^{65} activity, 19:12191 (R;US)
Reactor Cores
Coring pattern for K Pile, 19:12216 (R;US)
Production Test 105-389-P graphite sample boring from process channels: Final report, 19:12212 (R;US)
Reactor Kinetics
Thermal and fission neutron flux measurements in process tubing and in neutron activation test locations, 19:12221 (R;US)
Reactor Operation
Nuclear health and safety technical specifications: Revision 1, 19:12264 (R;US)
Pile operations: Preparation for starting, 19:12248 (R;US)
Reactor Safety
Nuclear safety experience – Hanford production reactors, 19:12265 (R;US)
Reactor Shutdown
Section IV reactor incident file: General information from 1945, 19:12260 (R;US)
Reactor Start-Up
Pile operations: Preparation for starting, 19:12248 (R;US)
Scram
Section IV reactor incident file: General information from 1945, 19:12260 (R;US)

HANFORD RESERVATION
Environmental Effects
Summary of radiological monitoring of Columbia River water along the Hanford Reach, 1980 through 1989, 19:11810 (R;US)
Ground Water
Quarterly report of RCRA groundwater monitoring data for period July 1, 1993–September 30, 1993, 19:11805 (R;US)
Historical Aspects
Four years at Hanford, 19:12213 (R;US)
Land Use
Hanford Federal Facility state of Washington leased land, 19:11689 (R;US)
Liquid Wastes
Plan and schedule for disposition and regulatory compliance for all remaining Miscellaneous Streams, 19:11690 (R;US)
Mapping
Using the global positioning system in support of environmental characterization at the Hanford Site in Washington State, 19:11855 (R;US)
Operation
Four years at Hanford, 19:12213 (R;US)
Hanford Laboratories Operation monthly activities report, March 1959, 19:12320 (R;US)
Technical report to the general advisory committee, 19:12207 (R;US)
Personnel
Using Gagne's Chain in OJT, 19:14230 (R;US)
Property Management
Contamination surveys for release of material, 19:13305 (R;US)
Radiation Monitoring
Regional survey monthlies 1947, 19:12192 (R;US)
Radioactive Waste Disposal
Criticality safety analysis of Hanford Waste Tank 241-101-SY, 19:11708 (R;US)
Radioactive Waste Facilities
303-K Storage Facility closure plan: Revision 2, 19:11688 (R;US)
Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 19:11691 (R;US)
Field characterization plan for the 216-U-8 vitrified clay pipeline, 19:11863 (R;US)
Radioactive Waste Management
Hanford radioactive waste management plans, 19:11670 (R;US)

Management of radioactive wastes at the Hanford Plant, 19:11665 (R;US)
RCRA permitting strategies for the development of innovative technologies: Lessons from Hanford, 19:11882 (R;US)
Results of groundwater quality assessment program at Low-Level Waste Management Area 3 of the low-level burial grounds, 19:11770 (R;US)
Tri-Party Agreement databases, access mechanism and procedures, 19:14277 (R;US)

Radioactive Waste Processing
Pre-design safety analyses of cesium ion-exchange compact processing unit, 19:11735 (R;US)

Radioactive Waste Storage
Birch recovery from stored waste, 19:11702 (R;US)
Criticality safety analysis of Hanford Waste Tank 241-101-SY, 19:11708 (R;US)
Pre-design safety analyses of cesium ion-exchange compact processing unit, 19:11735 (R;US)

Radiometric Surveys
100-DR-1 radiological surveys, 19:11865 (R;US)

Remedial Action
1993 Hanford Site-Specific Science and Technology Plan: Hanford integrated planning process, Executive summary, 19:11842 (R;US)
Combining expedited cleanup with innovative technology demonstrations, 19:11859 (R;US)
Distributions of 14 elements into 10 liquid extractants from simulated acid-dissolved sludge and acidified supernate solutions of Hanford high-level waste, 19:13028 (R;US)
Hanford Integrated Planning Process: 1993 Hanford Site-specific science and technology plan, 19:11841 (R;US)
N Springs expedited response action proposal, 19:11803 (R;US)
North Slope (Wahluke Slope) expedited response action cleanup plan, 19:11804 (R;US)
Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 19:11840 (R;US)
Remedial Investigation/Feasibility Study Work Plan for the 200-UP-1 Groundwater Operable Unit, Hanford Site, Richland, Washington: Revision, 19:11839 (R;US)
Tri-Party Agreement databases, access mechanism and procedures, 19:14277 (R;US)

Research Programs
Hanford Laboratories Operation monthly activities report, March 1959, 19:12320 (R;US)

Risk Assessment
Managing risk at Hanford, 19:11858 (R;US)
Riverland ERA maintenance pad site diesel contamination risk assessment, 19:11864 (R;US)

Seismic Surveys
Preliminary results of a seismic borehole test using downhole shaped charges at the DOE Hanford Site, 19:11861 (R;US)

Separation Equipment
TBX plant study, 19:11612 (R;US)

Separation Processes
Addendum to Production Test 221-T-19 reduction of time cycle in dissolver section, 19:11614 (R;US)
TBX plant study, 19:11612 (R;US)

Site Characterization
North Slope (Wahluke Slope) expedited response action cleanup plan, 19:11804 (R;US)

Surplus Nuclear Facilities
Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 19:11691 (R;US)

Tanks
Distributions of 14 elements into 10 liquid extractants from simulated acid-dissolved sludge and acidified supernate solutions of Hanford high-level waste, 19:13028 (R;US)
Radioactive waste tank Initial Pretreatment Module (IPM) technology development and selection, 19:11740 (R;US)

Waste Management

Strong magnetic fluctuations due to an ablating pellet, and fueled particle response to the SOL and divertor, 19:13962 (IA;XA)

HELIUM
Direct photoionization of excited helium, 19:13856 (R;RU;In Russian)
Elimination of two atomic electrons by a single high energy photon, 19:13867 (R;US)
Resonance photoionization of the excited helium, 19:13857 (R;RU;In Russian)
The angular and energy distributions of ejected electrons in electron-impact ionization of helium, 19:13864 (R;RU;In Russian)

HELIUM 3 REACTIONS
Measurement of the transverse, longitudinal and transverse-longitudinal structure functions for the reaction $^3He(e,e'p)^2H$, 19:13752 (R;FR)

HELIUM 3 TARGET
Advantages of cooled, stored polarized beams for precision symmetry tests at multi-GeV energies, 19:13527 (RA;US)
Measurement of the spin structure of the nucleon at HERA, 19:13733 (RA;US)
Measuring the spin-dependent neutron structure function at SLAC: Status report, 19:13734 (RA;US)
Past, present and future of (π, η) experiments, 19:13749 (RA;US)
Pions on polarized nuclei, 19:13737 (RA;US)

HELIUM 4 REACTIONS
See ALPHA REACTIONS

HELIUM 4 TARGET
Elastic p-^{4}He scattering at intermediate energies, 19:13627 (R;RU)
Measurement of the left-right asymmetry in the electrofission of the deuteron, 19:13751 (R;DE;In German)

HELIUM 6
Basis functions and matrix elements of the effective Hamiltonian in the model of four rotators, 19:13683 (R;UA;In Russian)
Matrix elements of unitary and Hamiltonian operator between the generating wave packages of the three-body channel a+n+n, 19:13682 (R;UA;In Russian)

HELIUM COMPLEXES
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes, 19:13832 (R;US)

HELIUM COMPOUNDS
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes, 19:13832 (R;US)

HELIUM COOLED REACTORS
Evaluation of the Gas Turbine Modular Helium Reactor, 19:12143 (R;US)

HELIUM GENERATION
See INTERSTITIAL HELIUM GENERATION

HELIUM IONS
Electrical conductivity of ceramic insulators during extended ion irradiation with an applied electric field, 19:14123 (RA;US)
Fast negative helium ions produced by double electron capture in single He^+ - He collision, 19:13866 (R;FR)

HERA STORAGE RING
An experiment to study CP violation in the B system using an internal target at the HERA proton ring, 19:12932 (R;DE)
First measurements at HERA of deep inelastic scattering at low x, 19:12912 (R;DE)
The H1 forward muon spectrometer, 19:12931 (R;DE)
ZEUS contributions to the Real-Time 93 conference, Vancouver, Canada, 19:12933 (R;DE)

HFIR REACTOR
Total quality management for addressing suspect parts at the Oak Ridge High Flux Isotope Reactor, 19:12199 (R;US)

HHIRF
See HHIRF ACCELERATOR

HHIRF ACCELERATOR
Ion sources for initial use at the Holifield Radioactive Ion Beam Facility, 19:12852 (R;US)

HIGGS BOSONS
Complete tree-level calculation of the reaction $e^+e^- \rightarrow \mu^+\mu^-b$ anti b and the Higgs boson signal at LEP200 and NLC energies, 19:13575 (R;DE)
Higgs signal in the $e^+e^- \rightarrow Zbb\text{-bar}$ process at LEP200, 19:13654 (R;RU)
Higgs->two photon decay: QCD radiative correction, 19:13644 (R;RU)
Implications of radiative corrections for the supersymmetric Higgs search at the NLC, 19:13579 (R;DE)
Left-right components of bosonic field and electroweak theory, 19:13511 (RA;RU)
New perturbative upper bound on M_H from fermionic Higgs decays at two loops, 19:13582 (R;DE)
Theoretical problems of Higgs-boson physics at the next linear collider, 19:13574 (R;DE)
Two-photon decay widths of Higgs particles, 19:13565 (R;DE)

HIGH ALTITUDE (STRATOSPHERE)
See STRATOSPHERE

HIGH ENERGY PHYSICS
A guide to experimental elementary particle physics literature, 1988–1992: Revision, 19:13427 (R;US)
Cooperation Agreement between the Government of Australia and the European Organization for Nuclear Research (CERN) concerning the further development of scientific and technical co-operation in the research projects of CERN, 19:14284 (I;AU)
Minimax: Multiparticle physics at the TeVatron collider, 19:13630 (R;US)

HIGH ENERGY RADIOTHERAPY

HIGH EXPLOSIVES
See CHEMICAL EXPLOSIVES

HIGH FLUX ISOTOPE REACTOR
See HFIR REACTOR

HIGH TEMPERATURE GAS COOLED AND GRAPHITE MODERATED REACTORS
See HTGR TYPE REACTORS

HIGH-FREQUENCY HEATING
See also ECR HEATING
Travel to Japan to participate in RF meetings for plasma heating: Foreign trip report, November 8–21, 1993, 19:14137 (R;US)

HIGH-LEVEL RADIOACTIVE WASTES

Filtration
An innovative method for mixed waste disposal at the Savannah River Site's high level liquid waste tank farms, 19:11772 (R;US)

Gamma Spectroscopy
Distributions of 14 elements into 10 liquid extractants from simulated acid-dissolved sludge and acidified supernate solutions of Hanford high-level waste, 19:13028 (R;US)

Radioactive Waste Disposal
Initial performance assessment of the disposal of spent nuclear fuel and high-level waste stored at Idaho National Engineering Laboratory: Volume 2: Appendices, 19:11751 (R;US)
Yucca Mountain Site Characterization Project Technical Data Catalog (Quarterly supplement), 19:11692 (R;US)

Radioactive Waste Facilities
Conservation and retrieval of information: Elements of a strategy to inform future societies about nuclear waste repositories, 19:11719 (R;DK)

Radioactive Waste Processing
Application of accident progression event tree technology to the Savannah River Site Defense Waste Processing Facility SAR analysis, 19:11771 (R;US)
Decontamination and treatment of high level liquid mixed waste to meet regulatory compliance issues outlined in Federal Facilities Agreements, 19:11773 (R;US)
Dynamic simulation of the in-tank precipitation process, 19:11779 (R;US)
MFT homogeneity study at TNX: Final report on the low weight percent solids concentration, 19:11782 (R;US)
Pilot scale benzene stripping column testing: Review of test data and application to the ITP columns, 19:11788 (R;US)
Production and remediation of low sludge simulated Purex waste glasses, 2: Effects of sludge oxide additions on glass durability, 19:11787 (R;US)

Radioactive Waste Storage
Distributions of 14 elements into 10 liquid extractants from simulated acid-dissolved sludge and acidified supernate solutions of Hanford high-level waste, 19:13028 (R;US)
Initial laboratory studies into the chemical and radiological aging of organic materials in underground storage tanks at the Hanford Complex, 19:11738 (R;US)
Radioactive waste tank Initial Pretreatment Module (IPM) technology development and selection, 19:11740 (R;US)
Repository relevant testing applied to the Yucca Mountain Project, 19:11658 (R;US)
Tank waste remediation system milestone report magnetic separation of tank waste: Surrogate system separations report, 19:11851 (R;US)

Records Management
Conservation and retrieval of information: Elements of a strategy to inform future societies about nuclear waste repositories, 19:11719 (R;DK)

Sampling
Sampling the contents of High-Level Waste tanks, 19:11774 (R;US)

Separation Processes
Tank waste remediation system milestone report magnetic separation of tank waste: Surrogate system separations report, 19:11851 (R;US)

Underground Disposal
Appropriateness of one-dimensional calculations for repository analysis, 19:11755 (R;US)
Carbon-14 releases from an unsaturated repository: A senseless but expensive dilemma, 19:11667 (R;US)
Mineralogy and clinoptilolite K/Ar results from Yucca Mountain, Nevada, USA: A potential high-level radioactive waste repository site, 19:11706 (R;US)
Simulated waste package test in salt, 19:11717 (R;US)
Using an Augmented Lagrangian Method and block fracturing in the DDA method, 19:11742 (R;US)

Underground Storage
Initial laboratory studies into the chemical and radiological aging of organic materials in underground storage tanks at the Hanford Complex, 19:11738 (R;US)
Potential for erosion corrosion of SRS high level waste tanks, 19:12554 (R;US)

Vitrification
Characterization of projected DWPF glasses heat treated to simulate canister centerline cooling: Revision 1, 19:11786 (R;US)
High level radioactive waste management facility design criteria, 19:11776 (R;US)

Waste Processing
Initial performance assessment of the disposal of spent nuclear fuel and high-level waste stored at Idaho National Engineering Laboratory: Volume 2: Appendices, 19:11751 (R;US)

HIGH-TC SUPERCONDUCTORS
Effect of grain size on strain in $YBa_2CU_3O_{7-x}$ using neutron diffraction, 19:12556 (R;US)
Evidence for symmetry breaking local distortions in thallium barium copper oxide, 19:12585 (R;US)
Investigation of HTSC; influence of microstructure, magnetic and of non-magnetic impurities; synthesis of new systems: Final report, 19:12577 (R;DE;In German)
Isothermal sintering, microstructure and superconducting properties of $Y_1Ba_2Cu_3O_{7-x}$ compound, 19:12558 (R;US)
Preliminary investigation of force-reduced superconducting magnet configurations for advanced technology applications, 19:13913 (R;US)
Short coherence length superconductors: Intermediate regime between BCS and bosons, 19:13914 (R;US)
Strongly anisotropic s-wave vs d-wave gap in cuprate superconductors: Evidence and theory, 19:13920 (R;US)
Structural characterization of high-Tc superconductors, 19:12576 (R;DE;In German)
Temperature dependence of superconduction bands in HTSC, 19:13918 (R;UA)
The equilibrium magnetization of granular high temperature superconductors in low fields. Pt. 1: The Meissner effect of $YBa_2(Cu_{1-x}Fe_x)_3O_{7-y}$, 19:13912 (R;DE)
Use of neutron diffraction to determine grain-size effects on strain in $YBa_2CU_3O_{7-x}$, 19:12557 (R;US)

HIGHLY ENRICHED URANIUM
A simple method for rapidly processing HEU from weapons returns, 19:12460 (R;US)
Benchmark calculations for some Los Alamos oralloy critical experiments, 19:12733 (R;US)

HIGHWAYS
See ROADS

HIRFL
See HIRFL CYCLOTRON

HIRFL CYCLOTRON
The control system of HIRFL, 19:12879 (RA;JP)

HIROSHIMA
Radon concentrations in residential housing in hiroshima and nagasaki, 19:13059 (R;JP)

HITREX-2 REACTOR
See ZERO POWER REACTORS

HL-1 TOKAMAK
Relation between periphery phenomena of the plasma and perturbed poloidal magnetic field during the L-H transition on HL-1 tokamak, 19:13971 (IA;XA)

HODOSCOPES
Wide aperture scintillation hodoscope with FEU-143 photomultipliers, 19:12959 (R;RU)

HOFFMAN PROCESS
See COAL GASIFICATION

HOISTING
Department of Energy Hoisting and Rigging Manual, 19:13325 (R;US)

HOISTS
Assessment of hoist failure rate for Payload Transporter III, 19:13008 (R;US)
Department of Energy Hoisting and Rigging Manual, 19:13325 (R;US)

HOLIFIELD HEAVY ION RESEARCH FACILITY
See HHIRF ACCELERATOR

HOLMIUM OXIDES
An indigenously developed photoacoustic spectrometer for study of actinide spectroscopy, 19:12989 (R;IN)

HOPPERS
CE IGCC repowering project: Bins and lockhoppers: Topical report, 1 January, 1992–28 February, 1993, 19:11513 (R;US)

HORIZONTAL AXIS TURBINES
Mechanical noise from wind turbines, 19:11971 (RA;GB)

HOSES
Vacuum tool manipulator, 19:12737 (PA;US)

HOT CELLS
Operation results and investigations on decommissioning of the molybdenum-99 production plant Rossendorf - AMOR-I, 19:12696 (R;DE;In German)

HOT GAS CLEANUP
An attrition-resistant zinc titanate sorbent for sulfur: Final technical report, September 1, 1992–August 31, 1993, 19:11498 (R;US)
CE IGCC Repowering plant sulfuric acid plant: Topical report, June 1993, 19:11427 (R;US)
CE IGCC repowering project: Materials for coal gasification environment: Topical report, June 1993, 19:11982 (R;US)
Desulfurization of hot fuel gas with Z-Sorb III sorbent, 19:12064 (RA;US)
Development of novel copper-based sorbents for hot-gas cleanup: Final technical report, 1 September 1992–31 August, 1993, 19:11459 (R;US)
IGCC database and hot gas cleanup systems studies, 19:12081 (RA;US)
Task 3.0: Advanced power systems: Semi-annual report, April 1–June 30, 1993, 19:11986 (R;US)
Task 4.0 – Advanced fuel forms and co-products: Semi-Annual report, April 1–June 30, 1993, 19:11413 (R;US)

HOT LABS
Annual report on operation, utilization and technical development of hot laboratories: From April 1, 1992 to March 31, 1993, 19:12241 (R;JP;In Japanese)
Current status and further advancement of NDC fuel hot laboratory, 19:12230 (RA;JP)
Overview of Department of Hot Laboratories, 19:12232 (RA;JP)
Present status of mechanical testing technology at the Research Hot Laboratory, 19:12235 (RA;JP)
Present status of the Research Hot Laboratory, 19:12234 (RA;JP)

HOT WATER HEATERS
See WATER HEATERS

HOT-DRY-ROCK SYSTEMS
Hot Dry Rock geothermal energy moving towards practical applications, 19:11963 (R;US)

HOUSES
Thermal performance of residential duct systems in basements, 19:12404 (R;US)

HTGR TYPE REACTORS
Applications of Monte Carlo methods for the analysis of MHTGR case of the VHTRC benchmark, 19:12146 (R;US)
Design trends and major technical issues of advanced non-water cooled nuclear reactors, 19:12156 (IA;XA)
MORECA-GT: Interactive simulator for gas-turbine modular HTGR transients and heatup accidents with ATWS options, 19:12259 (R;US)
Target particle internal pressure study, 19:12201 (R;US)

KAONS PLUS
Muon polarization in K^+ decays, 19:13547 (RA;US)
Status and future plans for BNL experiment E787 ($K^+ \rightarrow \pi^+ \nu\bar{\nu}$), 19:13543 (RA;US)
The chiral anomaly in non-leptonic radiative kaon decays, 19:13662 (R;AT)

KAPPA-725 RESONANCES
See MESONS

KEK INTERS. STORAGE ACCELERATOR
See TRISTAN STORAGE RINGS

KEK PHOTON FACTORY
Photon factory activity report, 1992., 19:12869 (R;JP)

KEK SYNCHROTRON
Physics with primary beams of the KEK-PS, 19:12868 (R;JP;In Japanese)

KIESELGUHR
See DIATOMACEOUS EARTH

KILN INCINERATORS
See INCINERATORS

KINK INSTABILITY
Kinetic stability of internal kink mode, 19:13941 (R;IT)
Performance of the PBX-M passive plate stabilization system, 19:14066 (R;US)

KLEIN-GORDON EQUATION
Nuclearity, split-property and duality for the Klein-Gordon field in curved spacetime, 19:13443 (R;DE)

KLYSTRONS
A second report on the experimental progress of the one microsecond, one kilojoule per pulse L-band relativistic klystron at Los Alamos, 19:12903 (R;US)
Status of experiments at LLNL on high-power x-band microwave generators, 19:12908 (R;US)

KNK-2 REACTOR
The history of the construction und operation of the KNK II German Fast Breeder Power Plant, 19:12159 (R;DE;In German)

KNOCK-ON ELECTRONS
See ELECTRONS

KOBAYASHI-MASKAWA MATRIX
Measurement of the mean lifetime of bottom hadrons by the reaction $Z^0 \rightarrow b$ anti b $\rightarrow J/\psi X$ by usage of the silicon vertex detector in ALEPH at the LEP storage ring, 19:13620 (R;DE;In German)

KONDO EFFECT
Competition of interactions in the Kondo systems and anomalous magnetism of heavy fermions, 19:13927 (RA;RU;In Russian)
JINR rapid communications: Collection, 19:13926 (R;RU;In Russian)

KRYPTON
Deactivation of two-photon excited Xe ($5\ p^5\ 6\ p$, $6\ p'$, $7\ p$) and Kr($4\ p^5\ 5\ p$) in Xenon and krypton, 19:13852 (IA;IR)
Interim storage of radioactive xenon and krypton gas, 19:11663 (R;US)
The study of spectral line profiles in excimer molecules, 19:13848 (IA;IR)

KRYPTON 84 BEAMS
Interactions of 1.3 GeV/nucl ^{84}Kr nuclei in emulsions, 19:13719 (RA;FR)

KRYPTON 86 REACTIONS
Fragmentation of a 500 MeV/nucleon ^{86}Kr beam, investigated at the GSI projectile fragment separator, 19:13770 (R;DE)

KRYPTON ISOTOPES
Hanford radioactive waste management plans, 19:11670 (R;US)

KYRGYZSTAN
Oil and gas resources of the Fergana basin (Uzbekistan, Tadzhikistan, and Kyrgyzstan): Advance summary, 19:11535 (R;US)

KYSHTYM PLANT
Peculiarities of Sr-90 migration in the environment, 19:12836 (RA;XE)

MONOCRYSTALS
Some results of simulation on radiation effects in crystals, 19:13909 (R;FR)

MONTANA
US hydropower resource assessment for Montana, 19:11926 (R;US)

MONTMORILLONITE
A novel, integrated treatment system for coal waste waters: Quarterly report, September 2, 1993–December 1, 1993, 19:11492 (R;US)

MOROCCO
Project of introducing irradiation methods into food preservation in Morocco, 19:13217 (IA;MA;In French)

MOUND LABORATORY
Mound facility physical characterization, 19:13100 (R;US)

MOVING COIL MAGNETOMETERS
Magnetic field measurements and data acquisition of a model magnet for the B-factory, 19:12864 (R;JP)

MT-1 TOKAMAK
Micro-pellet injection by blow-off method into MT-1M tokamak plasmas, 19:13973 (IA;XA)

MULTIPARTICLE SPECTROMETERS
Fast multifunctional spectrometer-identificator for charged particle study on satellites, 19:12973 (R;RU;In Russian)

MULTIPHASE FLOW
A flow-regime independent multiphase flowrate meter, 19:11579 (R;NO)
High-resolution numerical methods for compressible multiphase flow in hierarchical porous media: Progress report, September 1993–September 1994, 19:12778 (R;US)
[Particle dispersion by ordered motion in mixing layers]: [Annual report], 19:12760 (R;US)

MULTIPROCESSING
See PARALLEL PROCESSING

MULTIPROCESSORS
See ARRAY PROCESSORS

MULTIWIRE PROPORTIONAL CHAMBERS
Travel to Switzerland to attend the Compact Muon Solenoid Collaboration week: Foreign trip report, February 7, 1994–February 14, 1994, 19:12928 (R;US)

MUNICIPAL WASTES
Proceedings of waste stream minimization and utilization innovative concepts: An experimental technology exchange: Volume 1, Industrial solid waste processing municipal waste reduction/recycling, 19:12431 (R;US)

MUON REACTIONS
J/ψ absorption effects in the coherent production on nuclei, 19:13600 (R;PL)
Muon induced reactions in the KARMEN neutrino detector, 19:13876 (R;DE;In German)

MUON-CATALYZED FUSION
Unification of I C F-μD T fusion systems, 19:13984 (IA;IR;In Persian)

MUON-PROTON INTERACTIONS
Semileptonic weak interactions, 19:13521 (RA;US)

MUONIC ATOMS
Muon induced reactions in the KARMEN neutrino detector, 19:13876 (R;DE;In German)

MUONIUM
The first results of the muonium to antimuonium conversion experiment at Dubna phasotron, 19:13875 (RA;RU)

MUONS
See also MUONS PLUS
A new precision measurement of g - 2, 19:13634 (RA;US)
Lepton charge asymmetry from W decay and search for new gauge bosons at D0, 19:13595 (R;US)
Lepton physics at hadron beam facilities, 19:13633 (RA;US)
Radiative and rare μ and π decays, 19:13611 (R;RU)
Rare decays of muons and kaons as a probe of new fundamental symmetries of nature, 19:13548 (RA;US)
Rare muon processes, 19:13549 (RA;US)
The muon anomalous magnetic moment and the future muon trap experiments, 19:13635 (RA;US)

MUONS PLUS
Muon polarization in K^+ decays, 19:13547 (RA;US)

MUSEUMS

NATO
The history of NATO TNF policy: The role of studies, analysis and exercises conference proceedings: Volume 3: Papers by Gen. Robert C. Richardson III (Ret.), 19:12328 (R;US)

NATURAL ANALOGUE
Swedish activities in the Oklo natural analogue project, 19:13079 (RA;XE)

NATURAL GAS
Detailed design of the 2MW Demonstration Plant: Topical report, Task 2, 19:12355 (R;US)
Low-quality natural gas sulfur removal/recovery: Task 2: Topical report, September 30, 1992–August 29, 1993, 19:11592 (R;US)
Natural Gas Strategic Plan and Multi-Year Program Crosscut Plan, FY 1994–1999, 19:11584 (R;US)
Natural gas monthly, February 1994, 19:11596 (R;US)
Plenary Session 1, 19:11503 (RA;US)
Primer on gas integrated resource planning, 19:12338 (R;US)
Reservoir engineering studies of the Gladys McCall geopressured-geothermal resource: Final report, 19:11587 (R;US)
The domestic natural gas and oil initiative: Energy leadership in the world economy, 19:11577 (R;US)
Winter fuels report week ending, February 11, 1994 (Contains glossary), 19:11568 (R;US)
Winter fuels report week ending, February 18, 1994 (Contains glossary), 19:11569 (R;US)
Winter fuels report, week ending February 25, 1994 (Contains glossary), 19:11570 (R;US)
Winter fuels report, week ending March 11, 1994 (Contains glossary), 19:11572 (R;US)
Winter fuels report, week ending March 4, 1994 (Contains glossary), 19:11571 (R;US)

NATURAL GAS DEPOSITS
Evaluation of using cyclocranes to support drilling and production of oil and gas in wetland areas: Fifth quarterly technical progress report, Third quarter, 1993, 19:11582 (R;US)
Oil and gas resources of the Fergana basin (Uzbekistan, Tadzhikistan, and Kyrgyzstan): Advance summary, 19:11535 (R;US)
Preliminary results on the characterization of Cretaceous and lower Tertiary low-permeability (tight) gas-bearing rocks in the Wind River Basin, Wyoming, 19:11586 (R;US)
Reserves in Western Basins, 19:11585 (R;US)

NATURAL GAS INDUSTRY
Natural gas monthly, February 1994, 19:11596 (R;US)

NATURAL GAS WELLS
CO_2/sand fracturing in Devonian shales, 19:11594 (R;US)
Environmental and economic assessment of discharges from Gulf of Mexico Region oil and gas operations: Quarterly technical progress report, 23 June 1992–30 September 1992, 19:11576 (R;US)
Horizontal drilling in shallow reservoirs, 19:11590 (R;US)
Hydrogeochemical and production controls on NORM in oil- and gas- field operations: Technical progress report, January 1, 1993–March 31, 1993, 19:11575 (R;US)
Regulating toxicity in drilling mud: An innovative approach using pollution prevention, 19:11574 (R;US)
Reserves in Western Basins, 19:11585 (R;US)
Slant Hole Completion Test, Cozzette and Paludal production testing, 19:11589 (R;US)

NATURAL STEAM
Community Geothermal Technology Program: Cloth dyeing by geothermal steam: An experiment in technology transfer from Japan to Hawaii, Final report, 19:11965 (R;US)
Community Geothermal Technology Program: Media steam pasteurization using geothermal fluid at NELHA, Noi'i O Puna laboratory: Final report, 19:11968 (R;US)
Transient adsorption experiment: Salinity and noncondensible gas effects: Quarterly report, July–September 1993, 19:11957 (R;US)

NATURE RESERVES
Oregon Trust Agreement Planning Project: Potential mitigations to the impacts on Oregon wildlife resources associated with relevant mainstem Columbia River and Willamette River hydroelectric projects, 19:11938 (R;US)

NAVIGATIONAL INSTRUMENTS
An investigation of airborne GPS/INS for high accuracy position and velocity determination, 19:12997 (R;US)

NEGATONS
See ELECTRONS

NEGATRONS

NEODYMIUM IONS
Metal-ion spin-on glasses: Novel materials for active waveguides, 19:12817 (R;US)
Time-resolved site-selection spectroscopy investigation of $Y_3(Al_{1-x}\ Ga_x)_5\ O_1 2{:}Nd^{3+}$ crystals, 19:12647 (IA;IR)

NEODYMIUM LASERS
High average power pulsed phase conjugate laser with birefringence correction, 19:12822 (R;US)
Investigation of potential laser systems for the LIDAR Thomson scattering technique, 19:13408 (IA;XA)
LD pumped yttrium aluminium garnet micro-chip lasers, 19:12796 (IA;IR)
NP:PH glass laser and registration system for LIDAR Thomson scattering, 19:13988 (IA;XA)
Powerful multichannel Nd:Glass laser tunable in wide spectral range, 19:12801 (IA;IR)
Precision operation of the Nova laser for fusion experiments, 19:14203 (R;US)

NEODYMIUM OXIDES
Analysis of neodymium oxide for rare earth impurities by inductively coupled plasma atomic emission spectrometry, 19:12652 (R;BR;In Portuguese)

NEON 20
The calculation of isoscalar and isovector electromagnetic transitions probabilities in nucleus with opened shells based on the model SU_3 x SU_3, 19:13698 (R;UA;In Russian)
The construction of the wave functions of nuclear states in microscopical two axial rotators model, 19:13699 (R;UA;In Russian)

NEON 20 BEAMS
Biological effects of ^{20}Ne ion irradiation on tumoral and healthy rodent cells, 19:13300 (RA;FR)

NEON 20 REACTIONS
Antiproton production in heavy-ion collisions at energies below the threshold, 19:13767 (R;DE;In German)

NEON 20 TARGET
Particle production in heavy-ion collisions at intermediate energies, 19:13768 (R;DE)

NEON COMPLEXES
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes, 19:13832 (R;US)

NEON COMPOUNDS
Wave packet studies of the vibrational predissociation of three and four-atom van der Waals complexes, 19:13832 (R;US)

NEOPLASMS
See also CARCINOMAS
LEUKEMIA
Radiogenic neoplasia in thyroid and mammary clonogens: Progress report, January 1, 1993–December 31, 1993, 19:13229 (R;US)

NEPA
See US NATIONAL ENVIRONMENTAL POLICY ACT
NEPTUNIUM
Solubility of the redox-sensitive radionuclides ^{99}Tc and ^{237}Np under reducing conditions in neutral to alkaline solutions. Effect of carbonate, 19:11760 (R;SE)
NET TOKAMAK
Completion of testing of full size 40 kA conductor for NET, 19:14157 (RA;IT)
Further neutronic analyses of European ceramic B.I.T. blanket for DEMO, 19:14155 (RA;IT)
Preliminary occupational radiation dose assessment for NET/ITER plant, 19:14150 (RA;IT)
NETWORKS (COMPUTER)
See COMPUTER NETWORKS
NEURAL NETWORKS
Optical pattern recognition using neural network, 19:13269 (IA;IR)
NEUTRALIZATION (PHYSICAL)
See RECOMBINATION
NEUTRINO BEAMS
The technical issues of neutrino beams, 19:12846 (RA;US)
NEUTRINO OSCILLATION
Accelerator-based neutrino oscillation searches, 19:13636 (RA;US)
Neutrino physics at Fermilab in the 1990s, 19:13647 (R;US)
NEUTRINO-ELECTRON INTERACTIONS
See also ANTINEUTRINO-ELECTRON INTERACTIONS
Investigation of neutrino-electron scattering using of high-intensity neutrino sources, 19:13607 (RA;RU)
NEUTRINO-NUCLEON INTERACTIONS
Semileptonic weak interactions, 19:13521 (RA;US)
NEUTRINOS
See also ELECTRON NEUTRINOS
SOLAR NEUTRINOS
Cerenkov radiation of neutrinos, 19:13660 (R;AT)
Neutrino physics at Fermilab in the 1990s, 19:13647 (R;US)
Nonadiabatic neutrino oscillations revisited, 19:13451 (R;BR)
NEUTRON ACTIVATION ANALYSIS
An in-beam Compton-suppressed Ge spectrometer for nondestructive neutron activation analysis, 19:12962 (R;DE)
NEUTRON BEAMS
Materials research using a high energy intense neutron irradiation facility -ESNIT program, 19:14190 (RA;JP)
Study of neutron focusing at the Texas Cold Neutron Source: Progress report, 19:13813 (R;US)
NEUTRON CAPTURE
See NEUTRON REACTIONS
NEUTRON CAPTURE THERAPY
INEL BNCT Research Program, Program publications 1992, 19:13158 (E;US)
Some progress in boron neutron capture therapy, 19:13177 (RA;FR)
NEUTRON DETECTORS
See also HE-3 COUNTERS
Advances in passive neutron instruments for safeguards use, 19:12468 (R;US)
JINR rapid communications: Collection, 19:13467 (R;RU;In English, Russian)
Position-sensitive neutron detector as a module of neutron multidetector system, 19:12958 (RA;RU)
NEUTRON DOSIMETRY
Fast neutron dosimetry: Progress report, 30 August 1992–1 September 1993, 19:13228 (R;US)
Microdosimetry of monoenergetic neutrons, 19:13226 (R;US)
Numerical modeling of working of a multicellular proportional counter aimed to individual dosimetry of neutrons, 19:12930 (R;FR;In French)
NEUTRON ECONOMY
See NEUTRON FLUX
NEUTRON EMISSION
Acoustic localization of active regions of a palladium target in a neutron-acoustic correlation experiment, 19:12949 (IA;RU;In Russian)
Experimental study on the nuclear emission in phase transitions in systems with heavy water, 19:14029 (IA;RU;In Russian)
NEUTRON EVAPORATION
See NEUTRON EMISSION
NEUTRON FLUENCE
Measured thermal and fast neutron fluence rates ATR Cycle 101-B, October 11, 1993–November 27, 1993, 19:12171 (R;US)
Methods and assumptions for determination of neutron fluence onto the WWER pressure vessel, 19:12498 (I;BG;In Bulgarian)
NEUTRON FLUX
The reference neutron field - a standard neutron source for neutron measurements at the research reactor IRT-2000 in Sofia, 19:11887 (I;BG;In Bulgarian)
NEUTRON FLUX DENSITY

FAST NEUTRONS
Irradiation
Comparison of microstructural evolution in reactor-irradiated austenitic stainless steels with and without spectrally tailoring, 19:14099 (RA;US)
Crack-arrest tests on two irradiated high-copper welds: Phase 2: Results of duplex-type experiments, 19:12532 (R;US)
Defect production in irradiated metals, 19:14088 (RA;US)
Density changes induced by neutron irradiation in dynamically compacted tungsten and PCA, 19:14103 (RA;US)
Density changes observed in Nb-1Zr after irradiation in FFTF-MOTA, 19:14104 (RA;US)
Density changes observed in pure molybdenum and Mo-41Re after irradiation in FFTF/MOTA, 19:14095 (RA;US)
Density measurements performed on Ispra second generation AMCR alloys irradiated in MOTA-2A, 19:14097 (RA;US)
Dose dependence of the microstructural evolution in neutron-irradiated austenitic stainless steel, 19:14101 (RA;US)

Fracture toughness of irradiated candidate materials for ITER first wall/blanket structures: Preliminary results, 19:14102 (RA;US)
Irradiation creep and swelling of the fusion heats of HT9 and 9Cr-1Mo to 208 DPA at ~400°C, 19:14091 (RA;US)
Irradiation creep of Russian Federation Pressurized tubes in MOTA-2B, 19:14096 (RA;US)
Irradiation of $MgAl_2O_4$ spinel in FFTF-MOTA, 19:14124 (RA;US)
Irradiation of copper alloys in the SM-3 reactor, 19:14113 (RA;US)
Measurement of AC electrical conductivity of single crystal Al_2O_3 during spallation-neutron irradiation, 19:14127 (RA;US)
Measurement of DC electrical conductivity of alumina during spallation-neutron irradiation, 19:14126 (RA;US)
Microstructural evolution induced by boron transmutation in neutron-irradiated vanadium-base alloys, 19:14106 (RA;US)
Microstructures of a welded joint using an irradiated wrapper tube, 19:14100 (RA;US)
Neutron-induced swelling observed in copper alloys irradiated in MOTA's 2A and 2B, 19:14112 (RA;US)
Neutron-induced swelling of pure nickel and nickel binary alloys, 19:14087 (RA;US)
Relationship between swelling and irradiation creep in cold worked PCA stainless steel to 178 DPA at~400°C, 19:14094 (RA;US)
Status of fatigue studies on irradiated copper alloys, 19:14110 (RA;US)
Status of the dynamic helium charging experiment (DHCE), 19:14107 (RA;US)
The effect of radiation induced electrical conductivity (RIC) on the thermal conductivity, 19:14129 (RA;US)
The influence of details of reactor history on microstructural development during neutron irradiation, 19:14086 (RA;US)
The response of dispersion-strengthened copper alloys to high fluence neutron irradiation at 415°C, 19:14111 (RA;US)

Scattering
Investigations into the fast ionic conductors γ-CuBr, Li_2S, Na_2S, Ba_2NH, $NaTaN_2$ and Li_3HoCl_6 by means of neutron scattering, 19:13899 (R;CH;In German)

Structure Functions
Measurement of the spin structure of the nucleon at HERA, 19:13733 (RA;US)
Measuring the spin-dependent neutron structure function at SLAC: Status report, 19:13734 (RA;US)
Nucleon's internal spin, 19:13772 (IA;IR;In Persian)

NEVADA TEST SITE
Archaeological investigations at a toolstone source area and temporary camp: Sample Unit 19-25, Nevada Test Site, Nye County, Nevada: Technical report No. 77, 19:11800 (R;US)
Hydrogeologic data for existing excavations and the Area 5 Radioactive Waste Management Site, Nevada Test Site, Nye County, Nevada, 19:11686 (R;US)
Summary of wells validated during fiscal years 1991 to 1992, 19:11682 (R;US)

NICKEL
Gettering of metal impurities by cavities in silicon, 19:12535 (R;US)
Laser hardening of electroless nickel deposit, 19:12495 (IA;IR)
Microbial recovery of metals from spent coal liquefaction catalysts: Quarterly report, July–September 1993, 19:11493 (R;US)
Neutron-induced swelling of pure nickel and nickel binary alloys, 19:14087 (RA;US)
On the shape of X-ray spectra excited by heavy ions, 19:13865 (R;RU;In Russian)
Trace element emissions, 19:12087 (RA;US)

NICKEL 58 REACTIONS
Antiproton production in heavy-ion collisions at energies below the threshold, 19:13767 (R;DE;In German)

NICKEL 58 TARGET
Antiproton production in heavy-ion collisions at energies below the threshold, 19:13767 (R;DE;In German)
Particle production in heavy-ion collisions at intermediate energies, 19:13768 (R;DE)

NICKEL 64 REACTIONS
Spectroscopy of simple shell model states in ^{208}Pb, 19:13680 (R;DE;In German)

NICKEL ALLOYS
See also CHROMIUM-NICKEL STEELS
NICKEL BASE ALLOYS
Factors which control the swelling of Fe-Cr-Ni ternary austenitic alloys, 19:14084 (RA;US)
Neutron-induced swelling observed in copper alloys irradiated in MOTA's 2A and 2B, 19:14112 (RA;US)
Radiation-induced swelling and the principles of alloying, 19:12511 (IA;RU;In Russian)

NICKEL BASE ALLOYS
Boron and hydrogen in Ni_3Al: Part 2, Mechanical testing of bicrystals, 19:12547 (R;US)
Compatibility of candidate structural materials with static gallium, 19:14116 (RA;US)
Effects of phosphorus and other impurities in materials from steam turbines on the mechanical and corrosion properties. Pt. 1 and 2: COST 505 - final report, 19:12500 (R;DE)
Neutron-induced swelling of pure nickel and nickel binary alloys, 19:14087 (RA;US)
Robotic weld overlay coatings for erosion control: [Quarterly report, July–September 1993], 19:12488 (R;US)

NICKEL OXIDES
Implications of Hund's second rule for the insulating behavior of FeO and CoO, 19:12560 (R;US)

NIMONIC 80A
Effects of phosphorus and other impurities in materials from steam turbines on the mechanical and corrosion properties. Pt. 1 and 2: COST 505 - final report, 19:12500 (R;DE)

NIOBIUM
Assessment of niobium-base alloys for structural applications in the ITER divertor, 19:14105 (RA;US)

NIOBIUM 93 TARGET
Evaluation of the ^{93}Nb (n,n')^{93m}Nb reaction cross section from the threshold up to 20 MeV, 19:13758 (R;RU;In Russian)
Particle production in heavy-ion collisions at intermediate energies, 19:13768 (R;DE)

NIOBIUM ALLOYS
See also NIOBIUM BASE ALLOYS
Heterogenous electron beam welding of niobium C-103 base alloy with titanium Ti-6Al-4V base alloy, 19:12491 (R;IT;In French)
Production of zirconium-niobium-95 and scandium-46 at Hanford, 19:12222 (R;US)

NIOBIUM BASE ALLOYS
Assessment of niobium-base alloys for structural applications in the ITER divertor, 19:14105 (RA;US)
Compatibility of candidate structural materials with static gallium, 19:14116 (RA;US)
Density changes observed in Nb-1Zr after irradiation in FFTF-MOTA, 19:14104 (RA;US)

NIOBIUM OXIDES
An indigenously developed photoacoustic spectrometer for study of actinide spectroscopy, 19:12989 (R;IN)

NITRIC OXIDE
Notes on nitric acid oxide absorption system, 19:11606 (R;US)

NITROGEN
On the mechanisms of the laser optogalvanic (L O G) signal production in N_2 discharge, 19:13846 (IA;IR)

NITROGEN 13
Boron in nuclear medicine: New synthetic approaches to PET and SPECT: Progress report, May 1, 1993–April 30, 1994, 19:13156 (R;US)

NITROGEN 14
Methyl quantum tunneling and nitrogen-14 NQR NMR studies using a SQUID magnetic resonance spectrometer, 19:13921 (R;US)

NITROGEN 14 TARGET
R-matrix analysis for nitrogen and oxygen, 19:13800 (R;US)
NITROGEN 15
Method of N-15 analysis by mass-spectroscopy on ion implanter MPB-200, 19:12982 (R;VN)
NITROGEN 15 TARGET
Pions on polarized nuclei, 19:13737 (RA;US)
NITROGEN DIOXIDE
Impairment of the rat lung surfactant system by inhalation of nitrogen dioxide: example of an environmental oxidative agent, 19:13321 (R;DE;In German)
NITROGEN NITRIDES

Rocky Mountain area petroleum product availability with reduced PADD IV refining capacity, 19:11562 (R;US)

PETROLEUM RESIDUES

Catalytic Cracking

Relating feedstock composition to product slate and composition in catalytic cracking: 1. Bench scale experiments with liquid chromatographic fractions from Wilmington, CA, >650°F resid, 19:11561 (R;US)

Coprocessing

Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1991–March 27, 1992, 19:11438 (R;US)

Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 28, 1992–June 30, 1992, 19:11439 (R;US)

Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1991–December 26, 1991, 19:11437 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 27, 1990–December 26, 1990, 19:11433 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 26, 1989–March 26, 1990, 19:11431 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Final report, September 26, 1989–March 31, 1993, 19:11440 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1991–June 26, 1991, 19:11435 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1989–December 26, 1989, 19:11430 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1990–June 26, 1990, 19:11432 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, June 27, 1991–September 26, 1991, 19:11436 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1990–March 26, 1991, 19:11434 (R;US)

Fractionation

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1990–March 26, 1991, 19:11434 (R;US)

Hydrogenation

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 26, 1989–March 26, 1990, 19:11431 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1990–March 26, 1991, 19:11434 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, September 26, 1989–December 26, 1989, 19:11430 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, March 27, 1991–June 26, 1991, 19:11435 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Final report, September 26, 1989–March 31, 1993, 19:11440 (R;US)

Reduction

Coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Quarterly report, December 27, 1991–March 27, 1992, 19:11438 (R;US)

Improved performance in coprocessing through fundamental and mechanistic studies in hydrogen transfer and catalysis: Final report, September 26, 1989–March 31, 1993, 19:11440 (R;US)

PETT

See POSITRON COMPUTED TOMOGRAPHY

PHANTOMS

Phantoms for calculations of absorbed organ dose, 19:13290 (RA;JP;In Japanese)

PHARMACEUTICALS

See DRUGS

PHI4-FIELD THEORY

High temperature phase transitions without infrared divergences, 19:13446 (R;DE)

The ϕ^4 model near the critical point: the Gaussian variational approximation, 19:13462 (R;FR)

PHOSGENE

Thermal decomposition studies of chlorocarbon molecules in a shock tube using the Cl-atom ARAS method, 19:12701 (R;US)

PHOSPHATES

See also ALUMINIUM PHOSPHATES

Waste minimization at Lawrence Livermore National Laboratory: A case study of environmentally conscious manufacturing, 19:12438 (R;US)

PHOSPHINIC ACIDS

Neutron diffraction by monocrystals of inorganic and elementary organic compounds: Interim report, 19:12650 (R;DE;In German)

PHOSPHONIC ACIDS

Neutron diffraction by monocrystals of inorganic and elementary organic compounds: Interim report, 19:12650 (R;DE;In German)

PHOSPHORIC ACID

Mild temperature gasification: Partitioning sulfur to gas as H_2S: Interim final technical report, 1 September, 1992–31 August, 1993, 19:11455 (R;US)

PHOSPHORS

See also PLASTIC SCINTILLATORS

Design and characterization of a pulsed x-ray source for fluorescent lifetime measurements, 19:12969 (R;US)

PHOSPHORUS

Determination of BPSG thin-film properties using IR reflection spectroscopy of product wafers, 19:12663 (R;US)

PHOSPHORUS ADDITIONS

Effects of phosphorus and other impurities in materials from steam turbines on the mechanical and corrosion properties. Pt. 1 and 2: COST 505 - final report, 19:12500 (R;DE)

PHOSPHORUS COMPOUNDS

See also PHOSPHATES

The features of production of In As_{1-x_z} Sb_x P_z-$Ga_{1-}Y$ Al_Y $Sb_{1-}n$ As_n hetero lasers by the liquid-phase epitaxy method, 19:12605 (IA;IR)

PHOTOACOUSTIC SPECTROMETERS

An indigenously developed photoacoustic spectrometer for study of actinide spectroscopy, 19:12989 (R;IN)

PHOTOCHEMISTRY

Radiation Laboratory, University of Notre Dame: Quarterly report, October 1–December 31, 1993, 19:12691 (R;US)

PHOTODETECTORS

High T_c superconductor tunnel junctions for photon detectors, 19:13915 (R;US)

PHOTODIODES

Analysis of the photodiode boundary layer transition indicator, 19:12986 (R;US)

Coupled-mode theory of vertically integrated impedence-matched waveguide/photodetectors, 19:13422 (R;US)

InP/InGaAsP/InGaAs avalanche photodiode (APD), 19:13884 (IA;IR)

PHOTODISINTEGRATION

LIDAR using fundamental and 2nd harmonic Nd-laser light, 19:13990 (IA;XA)

Sensitivity Analysis
One-dimensional full-wave analysis of reflectometry sensitivity and correlations, 19:14011 (IA;XA)

Specifications
Design of a multichannel reflectometer for the RTP tokamak, 19:14022 (IA;XA)

Streak Cameras
LIDAR system combined with streak camera, 19:13994 (IA;XA)

Thomson Scattering
Aspects of LIDAR for the next generation of fusion experiments (ITER), 19:13999 (IA;XA)
Detectors for LIDAR type Thomson scattering diagnostics, 19:13995 (IA;XA)
Experimental investigation of the AGAT streak-camera application possibilities in the LIDAR Thomson scattering diagnostics, 19:13993 (IA;XA)
High repetition rate microchannel-plate photomultipliers, 19:13996 (IA;XA)
High resolution LIDAR Thomson scattering at JET, 19:13987 (IA;XA)
Investigation of potential laser systems for the LIDAR Thomson scattering technique, 19:13408 (IA;XA)
LIDAR Thomson scattering. Report on the IAEA technical committee meeting held at JET Joint Undertaking, Abingdon, UK, 8-10 April 1991, 19:13985 (IA;XA)
Non-linear optical effects in Raman calibrations of Thomson scattering systems, 19:13998 (IA;XA)
Prospects for LIDAR as a real time control system, 19:13997 (IA;XA)
The JET LIDAR system now, 19:13986 (IA;XA)
The JET divertor LIDAR system, 19:14000 (IA;XA)

Time-Of-Flight Method
New approach to microwave reflectometry: Correlation reflectometry via stochastic noise signals, 19:14027 (IA;XA)

Tokamak Devices
Feasibility study for a novel pulsed neutral beam diagnostics for tokamaks, 19:13930 (R;RU)

PLASMA DISRUPTION
Disruption control experiments using external resonant magnetic perturbations in the SINP tokamak, 19:13967 (IA;XA)
Performance of the PBX-M passive plate stabilization system, 19:14066 (R;US)

PLASMA FILAMENT
Influence of inductor on stability of TSP plasma equilibrium along major radius, 19:14047 (IA;RU;In Russian)

PLASMA GUNS
Conversion of light hydrocarbon gases to metal carbides for production of liquid fuels and chemicals: Quarterly technical status report, July 1–September 30, 1993, 19:11595 (R;US)

PLASMA HEATING
See also HIGH-FREQUENCY HEATING
Lower Hybrid Current Drive and ion Bernstein wave heating experiments on PBX-M, 19:14064 (R;US)

PLASMA IMPURITIES
Characterization of atomic and molecular impurity sources and transport at the tokamak edge, 19:13931 (R;US)

PLASMA INSTABILITY
See also PLASMA MACROINSTABILITIES
PLASMA MICROINSTABILITIES
Numerical solution of the second-order complex eigen differential equation and integral equation in plasma physics, 19:13982 (IA;XA)
Numerical study of the axisymmetric ideal MHD stability of Extrap, 19:13933 (R;SE)

PLASMA MACROINSTABILITIES
See also BALLOONING INSTABILITY
KINK INSTABILITY
TEARING INSTABILITY
Effect of the parallel current density on the local ideal 3D MHD stability of HELIAS configuration, 19:14058 (R;CH)

PLASMA MICROINSTABILITIES
See also ION WAVE INSTABILITY
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics, 19:13936 (R;US)

PLASMA OSCILLATIONS
See PLASMA WAVES

PLASMA RADIAL PROFILES
Arbitrary density profile and Shafranov shift reconstruction in large tokamaks via dual-polarization reflectometry and magnetic diagnostics, 19:14024 (IA;XA)
New radar technique applied to electron density measurement on fusion plasmas, 19:14023 (IA;XA)

PLASMA SIMULATION
The Numerical Tokamak Project (NTP) simulation of turbulent transport in the core plasma: A grand challenge in plasma physics, 19:14068 (R;US)

PLASMA WAVES
Initial perturbations and Langmuir waves in electron-positron plasma, 19:14053 (R;RU;In Russian)
Langmuir waves in the electron-positron plasma, 19:14054 (R;RU;In Russian)
Study of wave-particle interaction from the linear regime to dynamical chaos in a magnetized plasma, 19:14059 (R;CH)

PLASMONS
Two-plasmon excitations in metallic clusters, 19:13397 (R;FR)

PLASTIC SCINTILLATION COUNTERS
See PLASTIC SCINTILLATION DETECTORS

PLASTIC SCINTILLATION DETECTORS
Trigger and electronics issues for scintillating fiber tracking, 19:12937 (R;US)

PLASTIC SCINTILLATORS
Design of new polymers to improve radiation stability of plastic scintillators, 19:12940 (R;US)

PLATINUM
Summary report for nanoscale magnetics, 19:12545 (R;US)
The effect of gamma radiation on reference electrodes and platinum and carbon steel bare metal electrodes in a simulated waste solution, 19:11734 (R;US)

PLESIOTHERAPY
See RADIOTHERAPY

PLUTONIUM
A new analysis of the Vixen A Trials, 19:11811 (R;US)
Addendum to Production Test 221-T-19 reduction of time cycle in dissolver section, 19:11614 (R;US)
Assessment of plutonium storage safety issues at Department of Energy facilities, 19:11635 (R;US)
Decontamination and decommissioning assessment for the Waste Incineration Facility (Building 232-Z) Hanford Site, [Hanford], WA, 19:11691 (R;US)
Design scope of the Z Plant Plutonium Reclamation Facility: Project CAC-880, 19:11621 (R;US)
Determination of actinides in urine and fecal samples, 19:12661 (PA;US)
Four years at Hanford, 19:12213 (R;US)

NBC operation manual including the multi-position add-a-source function, 19:12965 (R;US)
Pyrochemical salt scrub, 19:11631 (R;US)
Recovery of plutonium from oxalate bearing solutions using a mixture of CMPO and TBP, 19:12694 (R;IN)
Redox thermodynamic data of plutonium in acidic and carbonate media. Pu(V) stability, 19:12672 (R;FR;In French)

PLUTONIUM 238
Environmental radiation monitoring of the IRT-2000 research reactor in Sofia. Investigation of plutonium concentrations in soils and plants, 19:13096 (I;BG;In Bulgarian)
Radionuclide concentrations in game (surface feeders) and nongame (bottom feeders) fish upstream and downstream of Los Alamos National Laboratory, 19:13128 (R;US)

PLUTONIUM 239
Environmental radiation monitoring of the IRT-2000 research reactor in Sofia. Investigation of plutonium concentrations in soils and plants, 19:13096 (I;BG;In Bulgarian)
Radionuclide concentrations in game (surface feeders) and nongame (bottom feeders) fish upstream and downstream of Los Alamos National Laboratory, 19:13128 (R;US)

PLUTONIUM 240
Environmental radiation monitoring of the IRT-2000 research reactor in Sofia. Investigation of plutonium concentrations in soils and plants, 19:13096 (I;BG;In Bulgarian)

PLUTONIUM CHLORIDES
The continuous chlorination of plutonium dioxide, 19:12697 (R;US)

PLUTONIUM COMPLEXES
Recovery of plutonium from oxalate bearing solutions using a mixture of CMPO and TBP, 19:12694 (R;IN)

PLUTONIUM COMPOUNDS
See also PLUTONIUM CHLORIDES
Thermodynamic analysis of actinide volatilities for the thermal processor units in the ITTS study, 19:11763 (R;US)

PLUTONIUM DIOXIDE
The continuous chlorination of plutonium dioxide, 19:12697 (R;US)

PLUTONIUM PRODUCTION REACTORS
See also HANFORD PRODUCTION REACTORS
Classification 100 Areas chemical discharges, 19:12200 (R;US)
Four years at Hanford, 19:12213 (R;US)

PLZT
Thin-film decoupling capacitors for multi-chip modules, 19:12818 (R;US)

PNA
See POLYCYCLIC AROMATIC HYDROCARBONS

PNL
See BATTELLE PACIFIC NORTHWEST LABORATORIES

POINT CHARGE
Huygens principle amd the moving charge field: Maxwell equations, 19:13690 (R;RU;In Russian)

POINT DEFECTS
Defect production in irradiated metals, 19:14088 (RA;US)
Molecular dynamics calculations of defect energetics in β-SiC, 19:14089 (RA;US)

POISONS (CHEMICAL)
See HAZARDOUS MATERIALS

POISSON EQUATION
POISSONSUPERFISH4.12: POISSON, SUPERFISH, Magnet and RF cavity design, 19:14245 (CM;US)

POLARIZED BEAMS
Prospects of polarization at high energies, 19:12832 (RA;US)

POLARIZED TARGETS
Fusion with highly spin polarized HD and D_2: Final report, December 14, 1991–June 30, 1993, 19:14139 (R;US)

POLLUTANTS
Groundwater quality assessment for the Upper East Fork Poplar Creek Hydrogeologic Regime at the Y-12 Plant: 1991 groundwater quality data and calculated rate of contaminant migration, 19:11793 (R;US)

POLLUTION ABATEMENT
See also AIR POLLUTION ABATEMENT
German Delphi report on the development of science and technology, 19:12321 (I;DE;In German)

POLLUTION CONTROL

SHIELDS
Problems of nuclear science and technology: Scientific-technical collection, 19:12117 (I;RU;In Russian)

SHIPS
U.S. Navy intercooled recuperated (ICR) engine, 19:12012 (RA;US)

SHOCK WAVES
BARS/SSC/SPHINX4.0: BARS Bibliographic Data Retrieval System, 19:14246 (CM;US)

SHOTFIRING
See EXPLOSIVE FRACTURING

SHOWER COUNTERS
A 4π photon detector for neutral η decays and baryon spectroscopy, 19:12927 (RA;US)
Analytical calculation of the fluctuation compensation of longitudinal energy leaks of calorimeters, 19:12960 (R;RU;In Russian)
CDF End Plug calorimeter Upgrade Project, 19:12939 (R;US)
CSC panel mass production technology R&D plan for SSC GEM Detector Muon Subsystem, 19:12978 (R;US)

Conceptual design for the STAR barrel electromagnetic calorimeter support rings, 19:12923 (R;US)
Large acceptance detector for η meson decays, 19:13554 (RA;US)
Neutron fluence calculations for the SDC detector and the results of codes comparison, 19:12922 (R;US)
The superconducting solenoid magnet system for the GEM detector at the SSC, 19:12979 (R;US)
Trip to Europe to participate in international conferences on detectors of particles and photons: Foreign trip report, September 1, 1993–September 26, 1993, 19:12936 (R;US)

SI SEMICONDUCTOR DETECTORS
Analytical solutions of minimum ionization particle induced current shapes of silicon detectors and simulation of charge collection properties, 19:12925 (R;US)

SIALON
See ALUMINIUM OXIDES
SILICON NITRIDES

SIGMA MINUS
See SIGMA MINUS PARTICLES

SIGMA MINUS PARTICLES
Sigma minus-nucleus interactions in emulsion at 350 GeV, 19:13599 (R;PL)

SIGMA-MINUS ATOMS
See HADRONIC ATOMS

SIGNAL CONDITIONING
Bounds on least-squares four-parameter sine-fit errors due to harmonic distortion and noise, 19:12752 (R;US)

SILANES
The decomposition of methyltrichlorosilane: Studies in a high-temperature flow reactor, 19:12708 (R;US)

SILICA
Surfactant loss control in chemical flooding: Spectroscopic and calorimetric study of adsorption and precipitation on reservoir minerals: Quarterly technical progress report, April 1, 1993–June 30, 1993, 19:11545 (R;US)
[Studies of the fundamental nature of catalytic acidity, sites and intermediates]: Final performance (technical progress) report, 19:12673 (R;US)

SILICA GEL
Time-resolved analytical methods for liquid/solid interfaces: Progress report, March 1, 1993–November 15, 1993, 19:12674 (R;US)

SILICEOUS ROCK
See SANDSTONES

SILICON
Ab initio study of the epitaxial growth of Ge on Si(100) surface, 19:12596 (R;US)
Gettering of metal impurities by cavities in silicon, 19:12535 (R;US)
Ion beam synthesis of monocrystalline $CoSi_2$ layers in Si and their electrical and structural characterization, 19:12611 (R;DE;In German)
Proton production cross sections of ^{14}C from silicon and oxygen: Implications for cosmic-ray studies, 19:13801 (R;US)
Research on the stability, electronic properties, and structure of a-Si:H and its alloys: Annual subcontract report, 1 June 1992–31 May 1993, 19:11950 (R;US)
Transverse energy production with Si and Au beams at AGS energy: Towards hot and dense hadronic matter, 19:13722 (R;US)

SILICON 28 REACTIONS
Relativistic hydrodynamics with QHD-I equation of state, 19:13679 (R;DE)

SILICON 28 TARGET
Elastic scattering of a secondary ^{11}Li beam on ^{28}Si at 29 MeV/n, 19:13792 (RA;RU)

SILICON ALLOYS
Electron microscope, metallurgical and mechanical investigations of the decagonal phase in the Al-Co-Cu(-S1) system, 19:12528 (R;DE;In German)
In-situ characterization of growth and interfaces in a-Si:H devices: Annual subcontract report, 1 May 1992–30 April 1993, 19:11949 (R;US)
Neutron-induced swelling of pure nickel and nickel binary alloys, 19:14087 (RA;US)
Research on the stability, electronic properties, and structure of a-Si:H and its alloys: Annual subcontract report, 1 June 1992–31 May 1993, 19:11950 (R;US)
Silicon-germanium/gallium phosphide material in high power density thermoelectric modules: Final report, February 1980–September 1981, 19:12353 (R;US)

SILICON CARBIDES
Engineering scale development of the Vapor-Liquid-Solid (VLS) process for the production of silicon carbide fibrils, 19:12587 (R;US)
Enhancement of oxidation resistance of silicon carbide by high-dose and multi-energy aluminum implantation, 19:12565 (R;US)
Fabrication, phase transformation studies and characterization of SiC-AlN-Al_2OC ceramics: [Annual report, February 1, 1993–July 30, 1993], 19:12569 (R;US)
Green's function methodology for fracture mechanics of SiC-SiC composite structures, 19:14083 (RA;US)
High-temperature properties of SiC/SiC for fusion applications, 19:14125 (RA;US)
Micromechanics of fiber pull-out and crack bridging in SCS-6 SiC- CVD SiC composite system at high-temperature, 19:14131 (RA;US)
Molecular dynamics calculations of defect energetics in β-SiC, 19:14089 (RA;US)
Surface preparation effects in near surface modulus measurement for CVD SiC, 19:14130 (RA;US)
The threshold energy for defect production in SiC: A molecular dynamic study, 19:14202 (R;US)

SILICON HYDRIDES
See SILANES

SILICON NITRIDES
Chemical vapor deposition of metal nitrides, phosphides and arsenides: Final report, 19:12582 (R;US)
Cost-effective ceramic machining: Summary of three-body wear experiments, 19:12589 (R;US)
Effects of oxidation and creep damage mechanisms on creep behavior in HIPed silicon nitrides, 19:12568 (R;US)
Electrical conductivity of ceramic insulators during extended ion irradiation with an applied electric field, 19:14123 (RA;US)
Joining of silicon nitrides using oxynitride glasses, 19:12570 (R;US)
The development of a porous silicon nitride crossflow filter: Final report, September 1988–September 1992, 19:12054 (R;US)

SILICON OXIDES
See also SILICA
'Running' grating at four-wave mixing in photo refractive crystals, 19:13883 (IA;IR)
Chemical vapor deposition of metal nitrides, phosphides and arsenides: Final report, 19:12582 (R;US)
The role of defects in laser damage of multilayer coatings, 19:12626 (R;US)

SILICON SEMICONDUCTOR DETECTORS
See SI SEMICONDUCTOR DETECTORS

SILICON SOLAR CELLS
Amorphous silicon photovoltaic maufacturing technology, Phase 2A: Annual subcontract report, 1 May 1992–30 April 1993, 19:11946 (R;US)
Automated solar cell assembly teamed process research: Semiannual subcontract report, 7 January 1993–30 June 1993, 19:11947 (R;US)
In-situ characterization of growth and interfaces in a-Si:H devices: Annual subcontract report, 1 May 1992–30 April 1993, 19:11949 (R;US)
Research on stable, high-efficiency amorphous silicon multijunction modules: Semiannual subcontract report, 1 March 1993–30 November 1993, 19:11948 (R;US)
Research on the stability, electronic properties, and structure of a-Si:H and its alloys: Annual subcontract report, 1 June 1992–31 May 1993, 19:11950 (R;US)

Silicon-film™ photovoltaic manufacturing technology: Annual subcontract report, 15 January 1992–15 November 1992, 19:11945 (R;US)

SILOXANES
Metal-ion spin-on glasses: Novel materials for active waveguides, 19:12817 (R;US)

SILVER 108 TARGET
Dissipative aspects of intermediate-mass fragment emission in nuclear collisions, 19:13798 (R;DE)

SILVER BASE ALLOYS
On the formation of μ- and ζ-phases in Ag-Al system by mechanical alloying, 19:12543 (R;US)

SIMPLEX PROCESS
See COAL GASIFICATION

SINGLE CRYSTALS
See MONOCRYSTALS

SINGLE-PARTICLE MODES
Decay modes of high-lying excitations in nuclei: Probing the microscopic structure or the statistical model, 19:13703 (R;FR)

SITE CHARACTERIZATION
Cross cutting and advanced technology development, 19:11749 (RA;US)
Integrated test plan for crosswell compressional and shear wave seismic tomography for site characterization at the VOC Arid Site, 19:13113 (R;US)
Remedial Investigation/Feasibility Study (RI/FS) process, elements and techniques guidance, 19:12310 (R;US)

SITE REHABILITATION
See REMEDIAL ACTION

SITE SURVEYS
See SITE CHARACTERIZATION

SKYRME POTENTIAL
The breathing mode in extended Skyrme model, 19:13504 (R;FR)

SKYRMIONS
See SKYRME POTENTIAL
SOLITONS

SLAGS
Utilization of Illinois coal gasification slags for production of ultra-lightweight aggregates: Final technical report, September 1, 1992–August 31, 1993, 19:11467 (R;US)

SLC
See STANFORD LINEAR COLLIDER

SLIGHTLY ENRICHED URANIUM
Detection probabilities for random inspection in variable flow situations, 19:11871 (R;US)

SLUDGES
See also SEWAGE SLUDGE
Industrial waste sludge combustion in fluidized bed boiler, 19:11907 (RA;FI)
Recovery and utilization of gypsum and limestone from scrubber sludge: Final technical report, September 1, 1992–August 31, 1993, 19:11495 (R;US)
Separation of flue-gas scrubber sludge into marketable products: First quarterly technical progress report, 1 September, 1993–30 November, 1993, 19:12103 (R;US)

SLUGS (FUEL)
See FUEL RODS

SLURRIES
See also FUEL SLURRIES
Geochemistry of FBC waste-coal slurry solid mixtures: Final technical report, September 1, 1992–August 31, 1993, 19:11494 (R;US)

SLURRIES (FUEL)
See FUEL SLURRIES

SMALL BUSINESSES
Small-medium scale integrated technology utilization projects: Computerized socio-economic benefits assessment model, 19:12417 (R;IT;In Italian)

SNOW
Snow and glacier ice characteristics measured using Landsat TM data, 19:13056 (R;NO)

SOCIAL SERVICES
Using the National Information Infrastructure for social science, education, and informed decision making, 19:14279 (R;US)

SOCIO-ECONOMIC ASPECTS
See SOCIO-ECONOMIC FACTORS

SOCIO-ECONOMIC FACTORS
Using the National Information Infrastructure for social science, education, and informed decision making, 19:14279 (R;US)

SODIUM
Lifetimes-measurements of selectively excited molecular levels, 19:13845 (IA;IR)
Quantitative estimation of sodium penetration depth in stainless steels, 19:12513 (IA;RU;In Russian)

SODIUM ALLOYS
Reorientations in plastic crystal phases of Zintl alloys, 19:12479 (R;US)

SODIUM CHLORIDES
First quarter technical progress report for Thermally Modified Sand, 19:13068 (R;US)

SODIUM MINERALS
See MINERALS

SODIUM NITRATES
Potential for a solids fire during an ITP waste tank deflagration and the impact on gas pressure, 19:11780 (R;US)

SOFC
See SOLID ELECTROLYTE FUEL CELLS

SOFT X RADIATION
Element-specific magnetic hysteresis measurements, a new application of circularly polarized soft x-rays, 19:12548 (R;US)

SOIL-STRUCTURE INTERACTIONS
Analysis of free and forced excitation tests of 394 KN isolated structure mock-up, 19:12719 (R;IT)

SOILING
See SURFACE CONTAMINATION

SOILS
Chemical Analysis
Environmental surveillance data report for the first quarter of 1993, 19:11732 (R;US)
Phase 1, Remedial investigation report for the 300-FF-5 operable unit: Volume 2, 19:11840 (R;US)
Cleaning
Ventilation of porous media, 19:12660 (PA;US)
Contamination
Combining expedited cleanup with innovative technology demonstrations, 19:11859 (R;US)
Determining uranium speciation in contaminated soils by molecular spectroscopic methods: Examples from the Uranium in Soils Integrated Demonstration, 19:11850 (R;US)
Heavy-metal contamination on training ranges at the Grafenwoehr Training Area, Germany, 19:13064 (R;US)
Decontamination
An integrated approach to the characterization and decontamination of uranium contaminated soils, 19:11812 (R;US)
Aqueous biphasic extraction, 19:13061 (R;US)
Characterization of thorium and uranium contaminated soil from a nuclear fuel facility, 19:11816 (R;US)
Soil decontamination using aqueous biphasic separation, 19:11795 (R;US)
Supporting soil remediation at Fernald by electron beam methods, 19:11817 (R;US)
Denitrification
Characterisation of the biological nitrogen conversions in the unsaturated soil zone by means of the nitrous oxide formation, 19:13098 (R;DE;In German)
Heating
Demonstration testing and evaluation of in situ soil heating: Management Plan, 19:13074 (R;US)
In-Situ Processing
Demonstration testing and evaluation of in situ soil heating: Management Plan, 19:13074 (R;US)
Radiochemical Analysis
Preoperational radiation surveillance of the WIPP project by EEG during 1992, 19:11671 (R;US)
Radionuclide Migration
CASCADER: An M-chain gas-phase radionuclide transport and fate model: Volume 4 – Users guide to CASCADR9, 19:11799 (R;US)

CASCADER: An m-chain gas-phase radionuclide transport and fate model: Volume 2, User's manual for CASCADR8, 19:13070 (R;US)
INTRAVAL Phase 2: Modeling testing at the Las Cruces Trench Site, 19:11721 (R;US)
Remedial Action
Implementation of in situ vitrification for contaminated soils, 19:11854 (R;US)
Riverland ERA maintenance pad site diesel contamination risk assessment, 19:11864 (R;US)
Site-specific analysis of radiological and physical parameters for cobbly soils at the Gunnison, Colorado, processing site: Revision 1, 19:11826 (R;US)
Stabilization
The use of coal fly ash for soil stabilization, 19:12415 (R;US)
Vapors
Ventilation of porous media, 19:12660 (PA;US)
SOLANUM
In vitro selection of plants for resistance to necrotic symptoms, 19:13203 (RA;XA)
SOLAR CELL RECEIVERS
See SOLAR RECEIVERS
SOLAR CELLS
See also SILICON SOLAR CELLS
Role of polycrystallinity in CdTe and $CuInSe_2$ photovoltaic cells: Annual subcontract report, 1 April 1992–31 March 1993, 19:11951 (R;US)
SOLAR CENTRAL RECEIVERS
See CENTRAL RECEIVERS
SOLAR ENERGY
Luz technology: Sratus and future development, 19:11942 (RA;IL)
NEMO - Advanced energy systems and technologies: Final report on the energy research programme 1988-1992, 19:12347 (R;FI;In Finnish)
Solar activities at Sandia National Laboratories, 19:12350 (R;US)
SOLAR HEATING
Travel to Italy to attend the ninth Experts Meeting of IEA Solar R&D Task 13: "Advanced Solar Low-Energy Buildings": Foreign trip report, November 8–11, 1993, 19:11953 (R;US)
SOLAR NEUTRINOS
Effects of scalar exchange and neutrino magnetic and electric dipole moments in $\nu_e e^-$ scattering, 19:13661 (R;AT)
SOLAR RECEIVERS
See also CENTRAL RECEIVERS
The PLVCR 500 and HCPC, tests and results, 19:11943 (R;DE)
SOLAR THERMAL CONVERSION
Applications of solar reforming technology, 19:11954 (R;US)
SOLAR THERMAL RECEIVERS
See SOLAR RECEIVERS
SOLENOIDS
Travel to Mexico to attend the semi-annual Supplier Quality Partnership meeting: Foreign trip report, October 18–20, 1993, 19:12715 (R;US)
SOLID ELECTROLYTE FUEL CELLS
Alternative materials for solid oxide fuel cells: Processing and interactions of materials, 19:12369 (RA;US)
Contaminant effects in solid oxide fuel cells, 19:12365 (RA;US)
High temperature solid oxide fuel cell development activities, 19:12362 (RA;US)
High temperature solid oxide fuel cell-customer test units, 19:12364 (RA;US)
Low cost, radial flow, solid oxide fuel cell, 19:12370 (RA;US)
MSOFC development status, 19:12363 (RA;US)
Manufacturing processes and properties of components for the high temperature fuel cell, 19:12377 (R;DE;In German)
Perovskite solid electrolytes for SOFC, 19:12376 (RA;US)
Processing of $LaCrO_3$ for solid oxide fuel cell applications, 19:12371 (RA;US)
Sealant research for solid oxide fuel cells, 19:12368 (RA;US)
SOLID ELECTROLYTES
Conductivity measurements of ceria-based solid electrolytes using AC impedance, 19:12591 (R;US)
SOLID SCINTILLATION DETECTORS
See also PLASTIC SCINTILLATION DETECTORS
Travel to Switzerland and Germany to participate in WA98 at CERN and WA98 meeting in Darmstadt: Foreign trip report, November 7–28, 1993, 19:12975 (R;US)
SOLID STATE LASERS
See also NEODYMIUM LASERS
SEMICONDUCTOR LASERS
Repetitively pulsed Cr:LiSAF laser for lidar applications, 19:12808 (R;US)
Short-pulse, high-intensity lasers at Los Alamos, 19:12809 (R;US)
Status of solid state lasers in the visible and near infrared, 19:13407 (IA;XA)
SOLID WASTES
See also SCRAP
Exclusions and exemptions from RCRA hazardous waste regulation: RCRA Information Brief, 19:12306 (R;US)
Field study of disposed solid wastes from advanced coal processes: Annual report, October 1, 1992–September 30, 1993, 19:11490 (R;US)
Pacific Northwest Laboratory's Solid Waste Initiative, 19:13106 (R;US)
Polyethylene encapsulation of simulated blowdown waste for SEG treatability study: Letter report on Phase I screening: Waste treatment and specimen preparation, 19:11664 (R;US)
Proceedings of waste stream minimization and utilization innovative concepts: An experimental technology exchange: Volume 1, Industrial solid waste processing municipal waste reduction/recycling, 19:12431 (R;US)
RCRA corrective action permit requirements and modifications under proposed Subpart S rule: RCRA Information Brief, 19:12305 (R;US)
Technical approach for the management of UMTRA ground water investigation-derived wastes, 19:11831 (R;US)
The "Derived-from" rule under the Resource Conservation and Recovery Act (RCRA): RCRA Information Brief, 19:12307 (R;US)
SOLIDS
Exact results for the one dimensional asymmetric exclusion model, 19:13391 (R;FR)
Numerical simulation of quantum many-body systems: Progress report for March 1, 1991–September 1, 1993, 19:13881 (R;US)
Potential for a solids fire during an ITP waste tank deflagration and the impact on gas pressure, 19:11780 (R;US)
SOLITONS
Large amplitude collective nuclear motion and soliton concept, 19:13663 (R;US)
Variational discrete symmetries, 19:13459 (R;RU)
SOLVENT EXTRACTION
Phase equilibria and process simulation for high-pressure supercritical extraction processes, 19:12421 (RA;FR)
SOOT
Fouling of oil-fired boilers and furnaces, 19:12389 (RA;US)
SORBENT INJECTION PROCESSES
Control of coal combustion SO_2 and NO_x emissions by in-boiler injection of CMA: Fifth quarterly project status report, 1 October 1993–30 December 1993, 19:12101 (R;US)
SOURCE ROCKS
Carbonate redistribution, element mobilisation and petroleum hydrocarbon migration in Posidonia shale (Hils basin, NW Germany) as a function of palaeotemperature load from the Vlotho mass, 19:11537 (R;DE;In German)
SOURCE TERMS
Independent assessment of MELCOR as a severe accident thermal-hydraulic/source term analysis tool, 19:12258 (R;US)
SOUTHEAST REGION
See USA
SOUTHWEST REGION
See USA
SOUTHWESTERN POWER ADMINISTRATION
Southwestern Power Administration 1993 annual report, 19:12343 (R;US)

SOVIET UNION

CHROMIUM-NICKEL STEELS

Corrosion Resistance
Characterization of the corrosion resistance of duplex stainless steels using local current density mapping techniques, 19:12481 (R;US)

Creep
Irradiation creep of Russian Federation Pressurized tubes in MOTA-2B, 19:14096 (RA;US)
Relationship between swelling and irradiation creep in cold worked PCA stainless steel to 178 DPA at~400°C, 19:14094 (RA;US)

Density
Density changes induced by neutron irradiation in dynamically compacted tungsten and PCA, 19:14103 (RA;US)

Deposition
Mass transfer in lithium/stainless steel test loop, 19:14115 (RA;US)

Dislocations
Dose dependence of the microstructural evolution in neutron-irradiated austenitic stainless steel, 19:14101 (RA;US)

Erosion
Robotic weld overlay coatings for erosion control: [Quarterly report, July–September 1993], 19:12488 (R;US)

Fracture Properties
Effects of hydrogen and loading mode on the fracture toughness of a reduced activation ferritic stainless steel, 19:14090 (RA;US)
Fracture toughness of irradiated candidate materials for ITER first wall/blanket structures: Preliminary results, 19:14102 (RA;US)

Grain Boundaries
Quantitative estimation of sodium penetration depth in stainless steels, 19:12513 (IA;RU;In Russian)

Hydrogen Embrittlement
Effects of hydrogen and loading mode on the fracture toughness of a reduced activation ferritic stainless steel, 19:14090 (RA;US)

Irradiation
Comparison of microstructural evolution in reactor-irradiated austenitic stainless steels with and without spectrally tailoring, 19:14099 (RA;US)
Density changes induced by neutron irradiation in dynamically compacted tungsten and PCA, 19:14103 (RA;US)
Dose dependence of the microstructural evolution in neutron-irradiated austenitic stainless steel, 19:14101 (RA;US)
Fracture toughness of irradiated candidate materials for ITER first wall/blanket structures: Preliminary results, 19:14102 (RA;US)
Irradiation creep of Russian Federation Pressurized tubes in MOTA-2B, 19:14096 (RA;US)
Relationship between swelling and irradiation creep in cold worked PCA stainless steel to 178 DPA at~400°C, 19:14094 (RA;US)

Mass Transfer
Mass transfer in lithium/stainless steel test loop, 19:14115 (RA;US)

Microhardness
Robotic weld overlay coatings for erosion control: [Quarterly report, July–September 1993], 19:12488 (R;US)

Microstructure
Robotic weld overlay coatings for erosion control: [Quarterly report, July–September 1993], 19:12488 (R;US)

Procurement
Think list! Procurement of stainless steel: Meeting October 7, 1965, Building 723-A, 8:30 A.M., 19:12252 (R;US)

Production
Better utilization of Cr-containing materials: Final report, 19:12436 (R;FI;In Finnish)

Stability
Thermal stability of manganese-stabilized stainless steels, 19:14098 (RA;US)

Stress Corrosion
Stress corrision of stainless steel equipment: Use of chlorine bearing materials, 19:12538 (R;US)

Swelling
Comparison of microstructural evolution in reactor-irradiated austenitic stainless steels with and without spectrally tailoring, 19:14099 (RA;US)

Tensile Properties
Thermal stability of manganese-stabilized stainless steels, 19:14098 (RA;US)

STANDARD ELECTROWEAK MODEL
See WEINBERG-SALAM GAUGE MODEL

STANDARD MODEL
Implications of radiative corrections for the supersymmetric Higgs search at the NLC, 19:13579 (R;DE)
Precision measurements of $\sin^2 \theta_W$, 19:13478 (RA;US)
Standard model status (in search of "new physics"), 19:13477 (RA;US)
Supersymmetric threshold corrections to the Higgs sector in the minimal supersymmetric model, 19:13484 (R;DE)

SUSPENSIONS (FUEL)
See FUEL SLURRIES

SWEDEN
Alterations in the atomic energy laws, 19:14285 (I;SE;In Swedish)
Building for animal production, 19:13235 (R;SE;In Swedish)
Conservation and retrieval of information: Elements of a strategy to inform future societies about nuclear waste repositories, 19:11719 (R;DK)
Energy use in Sweden: An international perspective, 19:12378 (R;US)
SKIs evaluation of SKBs RD and D programme 92, 19:11761 (R;SE)
Simulation of the European ice sheet through the last glacial cycle and prediction of future glaciation, 19:11759 (R;SE)
Travel to Europe to examine waste management practices in Germany and Sweden: Foreign trip report, October 17–November 17, 1993, 19:12444 (R;US)

SWITCHES
Superconductor switches for protection and control of superconducting magnetic systems, 19:14193 (R;RU;In Russian)

SWPA
See SOUTHWESTERN POWER ADMINISTRATION
SYMBOLIC LOGIC
See MATHEMATICAL LOGIC
SYMMETRY
See also CHIRAL SYMMETRY
SUPERSYMMETRY
Quantum symmetry in quantum theory, 19:13439 (R;DE)
SYNCHROPHASOTRONS
See SYNCHROTRONS
SYNCHROTRONS
See also CERN SPS SYNCHROTRON
DESY
FERMILAB ACCELERATOR
FERMILAB TEVATRON
JINR SYNCHROTRON
KEK SYNCHROTRON
SERPUKHOV TEVATRON
Particle diffusion from the beam-beam interaction in synchrotron colliders, 19:12835 (R;US)
Replacement of the ISIS control system, 19:12885 (RA;JP)
The computer simulation of the resonant network for the B-factory model power supply, 19:12866 (R;JP)
The new control system for TARN-2, 19:12889 (RA;JP)
SYNTHESIS GAS
Bioconversion of coal derived synthesis gas to liquid fuels: Final quarterly technical progress report, July 1, 1993–September 30, 1993, 19:11919 (R;US)
Biological conversion of synthesis gas: Final report, August 31, 1990–September 3, 1993, 19:11915 (R;US)
Biological conversion of synthesis gas: [Quarterly] project status report, July 1, 1992–September 30, 1992, 19:11916 (R;US)
Technology development for cobalt F-T catalysts: Quarterly technical progress report No. 3, April 1, 1993–June 30, 1993, 19:12677 (R;US)
Technology development for cobalt F-T catalysts: Quarterly technical progress report No. 4, July 1, 1993–September 30, 1993, 19:11918 (R;US)
SYNTHETIC FUELS
See also ALCOHOL FUELS
Development of an extraction process for removal of heteroatoms from coal liquids: Technical progress report No. 6, 1 July, 1993–30 September, 1993, 19:11446 (R;US)
SYNTHETIC FUELS REFINERIES
The economical production of alcohol fuels from coal-derived synthesis gas: Quarterly technical progress report Number 8, 1 July, 1993–30 September, 1993, 19:11445 (R;US)
SYNTHETIC-APERTURE RADAR
A model for forming airborne synthetic aperture radar images of underground targets, 19:13024 (R;US)
Feature discovery in gray level imagery for one-class object recognition, 19:12998 (R;US)
SYNTHINE PROCESS
See FISCHER-TROPSCH SYNTHESIS

T

T INVARIANCE
Are the invariance principles really truly Lorentz covariant?, 19:13474 (R;US)
T4 HORMONE
See THYROXINE
TANDEM ELECTROSTATIC ACCELERATORS
Annual report of the Tandem Accelerator Center, University of Tsukuba: April 1, 1992 - March 31, 1993., 19:14228 (R;JP)
Process control for the Vivitron: the generator test set-up, 19:12874 (RA;JP)
TANK FARMS
See STORAGE FACILITIES
TANKS
Corrosion monitoring of high-level waste tanks, 19:11768 (R;US)
Criticality safety analysis of Hanford Waste Tank 241-101-SY, 19:11708 (R;US)
Criticality safety study of the MSRE Fuel Drain Tank Cell in Building 7503, 19:11654 (R;US)
Excluded USTs: RCRA Subtitle 1, Underground Storage Tanks, 19:11580 (R;US)
Hazardous substance USTs: RCRA Subtitle 1, Underground Storage Tanks: RCRA Information Brief, 19:11578 (R;US)
Initial laboratory studies into the chemical and radiological aging of organic materials in underground storage tanks at the Hanford Complex, 19:11738 (R;US)
Input shaping filter methods for the control of structurally flexible, long-reach manipulators, 19:12713 (R;US)
Petroleum USTs: RCRA Subtitle 1, Underground Storage Tanks: RCRA Information Brief, 19:11581 (R;US)
Potential for erosion corrosion of SRS high level waste tanks, 19:12554 (R;US)
Radioactive waste tank Initial Pretreatment Module (IPM) technology development and selection, 19:11740 (R;US)
Tank waste remediation system milestone report magnetic separation of tank waste: Surrogate system separations report, 19:11851 (R;US)
The effect of gamma radiation on reference electrodes and platinum and carbon steel bare metal electrodes in a simulated waste solution, 19:11734 (R;US)
Thermal-spectrum recriticality energetics, 19:11860 (R;US)
TANTALUM
Tantalum-base materials for molten plutonium containment, 19:12549 (R;US)
TANTALUM 178
(Gamma,2n) reaction on the high-spin nucleus ^{180m}Ta, 19:13797 (R;RU;In Russian)
TANTALUM 180 TARGET
(Gamma,2n) reaction on the high-spin nucleus ^{180m}Ta, 19:13797 (R;RU;In Russian)
TANTALUM 181 TARGET
Fragmentation of a 500 MeV/nucleon ^{86}Kr beam, investigated at the GSI projectile fragment separator, 19:13770 (R;DE)
TAPIRO REACTOR
Specification of fast neutron radiation quality from cell transformation data, 19:12202 (R;IT)
TATB
A frictional work predictive method for the initiation of solid high explosives from low-pressure impacts, 19:13010 (R;US)
TAU LEPTONS
See TAU PARTICLES
TAU PARTICLES
τphysics, 19:13655 (R;DE)
A tau – charm – factory at Argonne: Preliminary assessment of the physics case and the Argonne Site, 19:13631 (R;US)
Project of the experiment on mass measurement of τ lepton at VEPP-4M, 19:13605 (R;RU;In Russian)
TAUONS
See TAU PARTICLES
TEARING INSTABILITY
Measurements of MHD activity with reflectometry on ASDEX, 19:14015 (IA;XA)
TECHNETIUM
Solubility of the redox-sensitive radionuclides ^{99}Tc and ^{237}Np under reducing conditions in neutral to alkaline solutions. Effect of carbonate, 19:11760 (R;SE)
TECHNETIUM 99
Concentration of technetium-99 in marine environment, 19:13129 (RA;JP;In Japanese)
TECHNOLOGY ASSESSMENT
German Delphi report on the development of science and technology, 19:12321 (I;DE;In German)
Problems of method of technology assessment: A methodological analysis, 19:12322 (R;DE;In German)
TELESCOPES
Design and early results of the sodium-layer laser guide star adaptive optics experiment at the Lawrence Livermore National Laboratory, 19:12987 (R;US)
Gamma Large Area Silicon Telescope (GLAST), 19:12977 (R;US)
TELLURIUM ALLOYS
Structural ordering in liquid K-Te alloys, 19:12478 (R;US)

TELLURIUM SULFIDES
Brillouin scattering study of the phase transition in Tl In S_2 and Tl Ga Se_2, 19:12572 (IA;IR)
Investigation of Te In S_2 crystals near phase transitions by method of second optical harmonic, 19:13402 (IA;IR)
TEM (MICROSCOPY)
See TRANSMISSION ELECTRON MICROSCOPY
TEMPERATURE (BODY)
See BODY TEMPERATURE
TEMPERATURE (ION)
See ION TEMPERATURE
TENDONS (STRUCTURAL)

Fusion applications of high power millimeter wave sources, 19:14162 (R;US)
Electron Density
Electron density measurement in tokamaks using lasers, 19:13955 (IA;IR)
Electron-Molecule Collisions
Collisional radiative model for H_2 molecules in a tokamak boundary plasma, 19:13981 (IA;XA)
Experiment Planning
Elongated separatrix formation in COMPASS-D, 19:14179 (IA;XA)
Ferromagnetic Materials
Numerical simulation of nonsymmetric divertor plasma configuration at the presence of ferromagnetic, 19:14061 (R;RU;In Russian)
Frequency Control
Frequency-sweeping: A new technique for energy-selective transport, 19:14067 (R;US)
H-Mode Plasma Confinement
Self-sustained turbulence and L-mode confinement in toroidal plasmas, 19:14060 (R;JP)
High-Beta Plasma
Ballooning mode stability of high-β tokamaks with elongation and triangularity, 19:13983 (IA;XA)
Laser Radiation
Electron density measurement in tokamaks using lasers, 19:13955 (IA;IR)
Lower Hybrid Current Drive
On the dynamics of the power spectrum during lower hybrid current drive in Tokamaks, 19:13945 (R;FR)
Mhd Equilibrium
Numerical simulation of nonsymmetric divertor plasma configuration at the presence of ferromagnetic, 19:14061 (R;RU;In Russian)
Non-Inductive Current Drive
Travel to Japan to attend and present a paper at the Fifth Toki Conference on Plasma Physics and Controlled Nuclear Fusion: Foreign trip report, November 14–20, 1993, 19:14063 (R;US)

Pellet Injection
Development of advanced railgun for injection of hypervelocity hydrogen pellets into tokamak, 19:14175 (IA;XA)
Single and multishot "in-situ" pellet injectors at St. Petersburg technical university, 19:14173 (IA;XA)
Plasma Confinement
Collisional and chaotic transport of energetic particles in toroidal plasma: [Annual] progress report, 19:14132 (R;US)
L-H confinement mode dynamics in three-dimensional state space, 19:13937 (R;US)
Research using small tokamaks: A collection of papers presented at the IAEA technical committee meeting, 19:13965 (I;XA)
Plasma Diagnostics
Phaedrus-T results on impurity and density control with rf an on diagnostic development, 19:13968 (IA;XA)
Plasma Disruption
Disruption control experiments using external resonant magnetic perturbations in the SINP tokamak, 19:13967 (IA;XA)
Magnetic surfaces of toroidal helical fields in tokamaks, 19:13953 (I;BR;In Portuguese)
Plasma Impurities
Use of modelling to improve SINP tokamak discharges, 19:13978 (IA;XA)
Plasma Microinstabilities
Basic principles approach for studying nonlinear Alfven wave-alpha particle dynamics, 19:13936 (R;US)
Plasma Scrape-Off Layer
Collisional radiative model for H_2 molecules in a tokamak boundary plasma, 19:13981 (IA;XA)
Rotational Transform
Resistance anomaly in very-low-q plasma, 19:13972 (IA;XA)
Sawtooth Oscillations
Use of modelling to improve SINP tokamak discharges, 19:13978 (IA;XA)
Sizing
Engineering feasibility study of OMITRON device, 19:14152 (RA;IT)
Specifications
Present status of the Novillo Tokamak, 19:14178 (IA;XA)
Start-Up
Use of modelling to improve SINP tokamak discharges, 19:13978 (IA;XA)
Superconducting Coils
Structural design of the superconducting Poloidal Field coils for the Tokamak Physics Experiment, 19:14200 (R;US)
Superconducting Magnets
Assessment of a magnet system combining the advantages of cable-in-conduit forced-flow and pool-boiling magnets, 19:14197 (R;US)
The TPX magnet R&D program, 19:14201 (R;US)
Thermo-hydraulic analysis of the TPX superconducting TF magnets, 19:14198 (R;US)

TOKAMAK FUSION TEST REACTOR
See TFTR TOKAMAK

TOKAMAK TYPE REACTORS
See also ITER TOKAMAK
3-D neutron transport calculations for activation and dose assessment for IGNITOR, 19:14145 (RA;IT)
Dynamical model for IGNITOR experiment, 19:14159 (R;IT)

TOLUENE
Energy transfer properties and mechanisms: Technical progress report, 1 March 1991–15 August 1993, 19:13862 (R;US)
Surface probes of porous toluene/water ices: Adsorption kinetics and annealing spectra measured by second harmonic generation, 19:13053 (R;US)

TOMATOES
Mechanisms and genetic control of interspecific crossing barriers in lycopersicon: Progress report, First year, August 1, 1992, 19:13195 (R;US)

TOMOGRAPHY
See also COMPUTERIZED TOMOGRAPHY
Integrated test plan for crosswell compressional and shear wave seismic tomography for site characterization at the VOC Arid Site, 19:13113 (R;US)

TOP PARTICLES
The CDF top search in the multijet decay mode, 19:13648 (R;US)

TORE SUPRA
See TORE SUPRA TOKAMAK

TORE SUPRA TOKAMAK
Characterization of atomic and molecular impurity sources and transport at the tokamak edge, 19:13931 (R;US)
Overview of the pellet injection programme of Tore Supra, 19:14164 (IA;XA)
Reflectometry experiment on the tokamak TORE-SUPRA, 19:14005 (IA;XA)
Travel to France to participate in the Tore Supra steering committee meeting: Foreign trip report, November 12, 1993–November 24, 1993, 19:14195 (R;US)

TORSATRON STELLARATORS
See also ATF TORSATRON
CHS TORSATRON
Free boundary plasma equilibrium in the U-2M torsatron, 19:14046 (IA;RU;In Russian)
X-mode 37 GHz reflectometry on the "Uragan-3M" torsatron, 19:14006 (IA;XA)

TOTAL-ABSORPTION SPECTROMETERS
See SHOWER COUNTERS

TOWERS (EXTRACTION)
See EXTRACTION COLUMNS

TOXIC MATERIALS
Diphonix: A new ion exchange resin for the treatment of industrial waste streams, contaminated groundwaters, and mixed-wastes, 19:11657 (R;US)
Ecological evaluation of proposed dredged material from St. Andrew Bay, Florida, 19:13103 (R;US)
Identification and evaluation of the nonradioactive toxic components in LLNL weapon designs, Phase 1, 19:13018 (R;US)
Measurement of air toxic emissions from a coal-fired boiler equipped with a tangentially-fired low NOx combustion system, 19:12039 (RA;US)
Separations techniques for recovery and/or removal of toxic metals from spent textile dyebaths, 19:12433 (R;US)

TOXICITY
Toxicological benchmarks for screening of potential contaminants of concern for effects on aquatic biota on the Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program ESD Publication 3940, 19:13122 (R;US)

TPC
See TIME PROJECTION CHAMBERS

TRACE AMOUNTS
Atmospheric trace element deposition in Norway studied by ICP-MS, 19:13055 (R;NO)

TRACE ELEMENTS
See TRACE AMOUNTS

TRACER TECHNIQUES
Analytical laboratory and mobile sampling platform: Progress report, October 1, 1993–December 31, 1993, 19:13072 (R;US)

TRACK DETECTORS (DIELECTRIC)

TRANSFORMERS
Internal faults in oil-filled distribution transformers: Fault mechanisms and choice of protection, 19:12286 (R;NO)

TRANSIENTS
MORECA-GT: Interactive simulator for gas-turbine modular HTGR transients and heatup accidents with ATWS options, 19:12259 (R;US)
Simulation and control of fast transients in process and utility systems, 19:12424 (RA;FR)

TRANSITION FLOW
Analysis of the photodiode boundary layer transition indicator, 19:12986 (R;US)
TRANSMISSION (HEAT)
See HEAT TRANSFER
TRANSMISSION ELECTRON MICROSCOPY
Atomic scale structure and chemistry of interfaces by Z-contrast imaging and electron energy loss spectroscopy in the STEM, 19:12638 (R;US)
TRANSMISSION LINES
See POWER TRANSMISSION LINES
TRANSMUTATION
Recycling long-lived waste components in high-flux thermal systems, 19:11698 (R;NL)
TRANSPORT (CHARGED-PARTICLE)
See CHARGED-PARTICLE TRANSPORT
TRANSPORT (NEUTRON)
See NEUTRON TRANSPORT
TRANSPORT (RADIATION)
See RADIATION TRANSPORT
TRANSPORT THEORY
Travel to Italy to attend the 4th international workshop on plasma edge theory in fusion devices: Foreign trip report, September 30, 1993–October 6, 1993, 19:13938 (R;US)
TRANSPORTATION SYSTEMS
A decade of successful domestic sea transports of radioactive waste in Sweden 1982-1992, 19:11644 (IA;JP)
Alternative risk-based criteria for transportation of radioactive materials on the United States Department of Energy Hanford Site, 19:11652 (IA;JP)
Assessment of hoist failure rate for Payload Transporter III, 19:13008 (R;US)
Review and status of maglev in the United States, 19:12410 (R;US)
System certification: an alternative to package certification?, 19:12728 (IA;JP)
The Swedish sea transportation system for safety reasons, 19:11650 (IA;JP)
Transportation of spent fuel from light water reactors, 19:11640 (IA;JP)
TRANSURANIUM ELEMENTS

WOOD FUELS
Development and demonstration of a wood-fired gas turbine system, 19:12000 (RA;US)

Integrated harvesting for pulp chips and fuel from whole tree material, 19:11895 (RA;FI)
Wood fuel utilization in California, 19:11911 (RA;FI)

WOOD-FUEL POWER PLANTS
Biomass power industry: Assessment of key players and approaches for DOE and industry interaction, 19:11910 (R;US)
Development and demonstration of a wood-fired gas turbine system, 19:12000 (RA;US)

WORKERS
See PERSONNEL

WT-3 TOKAMAK
Combined electron cyclotron and lower hybrid current drive on WT-3 tokamak, 19:13966 (IA;XA)

WWER TYPE REACTORS
See also WWER-3 REACTOR
WWER-5 REACTOR
Program for experimental investigation of fuel element and assembly behaviour in water cooled and moderated power reactors under transient and accidental operational conditions, 19:12131 (IA;RU;In Russian)

WWER-1000 REACTOR
See WWER-5 REACTOR

WWER-3 REACTOR
Advanced digital reactivity meter for nuclear power plant with WWER reactors, 19:12184 (I;BG;In Bulgarian)

WWER-440 REACTOR
See WWER-3 REACTOR

WWER-5 REACTOR
Advanced digital reactivity meter for nuclear power plant with WWER reactors, 19:12184 (I;BG;In Bulgarian)

WWER-500 REACTOR
See WWER-5 REACTOR

WYOMING
Preliminary results on the characterization of Cretaceous and lower Tertiary low-permeability (tight) gas-bearing rocks in the Wind River Basin, Wyoming, 19:11586 (R;US)
US hydropower resource assessment for Wyoming, 19:11932 (R;US)

X

X RADIATION
See also SOFT X RADIATION
Comment on: "Interference effects between independent gamma rays", 19:13809 (R;US)
Development of a high-resolution backscatter spectrometer for inelastic X-ray scattering measurement: Final report, 19:13895 (R;DE;In German)
Observation of the traveling component of an x-ray standing wave field, 19:13901 (R;US)

X-2830 RESONANCES
See MESONS

X-RASERS
See X-RAY LASERS

X-RAY DETECTION
Position sensitive x-ray detector, 19:12944 (I;BR;In Portuguese)

X-RAY EQUIPMENT
See also X-RAY SOURCES
Development and application of photosensitive device systems to studies of biological and organic materials: Progress report, January 1, 1993–December 31, 1993, 19:12935 (R;US)

X-RAY LASERS
Progress in understanding and improving X-ray lasers, 19:14209 (R;US)
Tunable coherent V U V/X U V radiation generated by nonlinear optical process, 19:12804 (IA;IR)

X-RAY RADIOGRAPHY
Influence of quantum noise on radiological images, 19:13162 (I;BR;In Portuguese)

X-RAY SOURCES
Design and characterization of a pulsed x-ray source for fluorescent lifetime measurements, 19:12969 (R;US)

X-RAY SPECTROMETERS
The Los Alamos National Laboratory precision double crystal spectrometer, 19:12968 (R;US)

X-RAY SPECTROSCOPY
Near edge x-ray spectroscopy theory: Annual progress report, 1993–1994, 19:13830 (R;US)

X-ZERO RESONANCES
See ETA PRIME-958 MESONS

XENON
Deactivation of two-photon excited Xe (5 p^5 6 p, 6 p', 7 p) and Kr(4 p^5 5 p) in Xenon and krypton, 19:13852 (IA;IR)
Interim storage of radioactive xenon and krypton gas, 19:11663 (R;US)

XENON 129
Applications of highly spin-polarized xenon in NMR, 19:13897 (R;US)

XENON 129 REACTIONS
Investigation of reabsorption effects in subthreshold π^0 production, 19:13765 (R;DE)

XENON ISOTOPES
See also XENON 129
Hanford radioactive waste management plans, 19:11670 (R;US)

Y

Y'RESONANCES
See BARYONS

Y-12 PLANT
Aqueous mercury treatment technology review for NPDES Outfall 49 Y-12 Plant, 19:11869 (R;US)
Oak Ridge Health Studies Phase 1 report, Volume 2: Part A, Dose Reconstruction Feasibility Study: Tasks 1 and 2, A summary of historical activities on the Oak Ridge Reservation with emphasis on information concerning off-site emissions of hazardous materials, 19:11801 (R;US)

YANG-MILLS THEORY
JINR rapid communications: Collection, 19:13467 (R;RU;In English, Russian)
On embedding of integrable equations in (1 + 1) and (2 + 1) dimensions into the generalized self-dual Yang-Mills equations, 19:13469 (RA;RU)

YELLOW CAKE
See URANIUM OXIDES U3O8

YIELD (NUCLEAR REACTION)
See NUCLEAR REACTION YIELD

YOSHIDA SARCOMA
See EXPERIMENTAL NEOPLASMS

YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES

YTTRIUM OXIDES
Effect of twin boundary density on the vortex melting transition in $YBa_2Cu_3O_{7-\delta}$ single crystals, 19:12559 (R;US)
Explosively produced megagauss fields and recent solid state applications, 19:12583 (R;US)
Mechanical properties of vacuum-sintered equimolar CaO-Y_2O_3 system, 19:12595 (R;US)
Mechanical properties of vacuum-sintered yttria ceramics, 19:12555 (R;US)
Structural characterization of high-Tc superconductors, 19:12576 (R;DE;In German)
Time-resolved site-selection spectroscopy investigation of $Y_3(Al_{1-x}\ Ga_x)_5\ O_1 2{:}Nd^{3+}$ crystals, 19:12647 (IA;IR)

YUCCA MOUNTAIN
A mechanical model for repeated slip events along normal faults in the basin and range: Applications to Yucca Mountain, Nevada, 19:13338 (RA;US)
Effects of soil quality and depth on seed germination and seedling survival at the Nevada test site, 19:13076 (R;US)
Geohydrologic data from test hole USW UZ-6s, Yucca Mountain, Nye County, Nevada, 19:11767 (R;US)
Geoscience technical support for nuclear waste geologic repositories, 19:13331 (RA;US)

Identification and characterization of conservative organic tracers for use as hydrologic tracers for the Yucca Mountain site characterization project: Quality Assurance Project Plan, Revision 1: Quarterly progress report, October 1, 1993–December 31, 1993, 19:11684 (R;US)
Leaching patterns and secondary phase formation during unsaturated leaching of UO_2 at 90°C, 19:13062 (R;US)
Los Alamos National Laboratory Yucca Mountain Site Characterization Project 1992 quality program status report, 19:11707 (R;US)
Mineralogy and clinoptilolite K/Ar results from Yucca Mountain, Nevada, USA: A potential high-level radioactive waste repository site, 19:11706 (R;US)
Radionuclides in hydrothermal systems as indicators of repository conditions, 19:13332 (RA;US)
Repository relevant testing applied to the Yucca Mountain Project, 19:11658 (R;US)
Yucca Mountain Site Characterization Project Technical Data Catalog (Quarterly supplement), 19:11692 (R;US)

YUKAWA NONLOCAL THEORY
Towards finiteness without supersymmetry, 19:13441 (R;DE)

Z

Z NEUTRAL BOSONS
A measurement of the e^+e^- decay width of the Z^0, 19:13628 (R;US)
A measurement of the left-right cross section asymmetry in Z^0 production with polarized e^+e^- collisions, 19:13629 (R;US)
Experimental aspects of heavy flavour physics at LEP, 19:13614 (R;FR)
Measurement of the mean lifetime of bottom hadrons by the reaction $Z^0 \rightarrow b$ anti b $\rightarrow J/\psi X$ by usage of the silicon vertex detector in ALEPH at the LEP storage ring, 19:13620 (R;DE;In German)
Measurement of the ratio $R = \sigma \times B(p\bar{p} \rightarrow W^{\pm} \rightarrow e^{\pm}\nu)/\sigma \times B(p\bar{p} \rightarrow Z^0 \rightarrow e^+e^-)$ in $p\bar{p}$ collisions at $\sqrt{s}$ = 1,800 GeV, 19:13589 (R;US)
Measurements of gluon spin-sensitive quantities at the Z^0 resonance, 19:13658 (R;US)
Multivariate analysis methods to tag b quark events at LEP/SLC, 19:13622 (R;FR)
On the determination of the b $\rightarrow$c handedness using nonleptonic Λ_c-decays, 19:13583 (R;DE)
Results on b hadron lifetimes from ALEPH, 19:13621 (R;DE)
Studies on the determination of the Λproduction in quark and gluon jets, 19:13555 (R;DE;In German)

ZAMBIA
Travel to Africa to gather information on the prospects of a Renewable Energy of African Development Program (REFAD): Foreign trip report, August 21, 1993–September 10, 1993, 19:12346 (R;US)

ZEA MAYS
See MAIZE

ZENTRALINST. F. KERNFORSCHUNG
See ZFK ROSSENDORF

ZEOLITES
See also CLINOPTILOLITE
Double rotation NMR studies of zeolites and aluminophosphate molecular sieves, 19:12614 (R;US)
[Studies of the fundamental nature of catalytic acidity, sites and intermediates]: Final performance (technical progress) report, 19:12673 (R;US)

ZERO POWER REACTORS
Reactivity effects of void formations in a solution critical assembly, 19:12243 (R;US)

ZERO SOUND
First, second and fourth sound in relativistic superfluidity theory with account for dissipative effects, 19:13925 (R;UA;In Ukrainian)

ZFK ROSSENDORF
Rossendorf Research Center, Institute of Safety Research. Annual report 1991, 19:14219 (I;DE;In German)

ZHURAVLEV PROCESS
See COAL GASIFICATION

ZINC
Heavy-metal contamination on training ranges at the Grafenwoehr Training Area, Germany, 19:13064 (R;US)
The zinc electrode: Reactions and mechanisms, 19:12293 (R;US)

ZINC COMPOUNDS
See also ZINC SULFIDES
An attrition-resistant zinc titanate sorbent for sulfur: Final technical report, September 1, 1992–August 31, 1993, 19:11498 (R;US)
Enhanced durability of desulfurization sorbents for fluidized-bed applications, 19:12062 (RA;US)
Fixed-bed testing of a molybdenum-promoted zinc titanate sorbent for hot gas desulfurization, 19:12076 (RA;US)
High temperature hydrogen sulfide removal with tin oxide, 19:12084 (RA;US)
Testing of zinc titanate desulfurization sorbents for moving-bed applications, 19:12061 (RA;US)

ZINC DISTILLATION PROCESS
See PYROCHEMICAL REPROCESSING

ZINC HALIDE PROCESS
See COAL LIQUEFACTION

ZINC SULFIDES
Formation mechanism and yield of molecules ejected from ZnS, CdS, and FeS_2 during ion bombardment, 19:13860 (R;US)

ZION STATION UNIT-1
See ZION-1 REACTOR

ZION STATION UNIT-2
See ZION-2 REACTOR

ZION-1 REACTOR
Direct containment heating experiments in Zion Nuclear Power Plant geometry using prototypic materials, 19:12254 (R;US)

ZION-2 REACTOR
Direct containment heating experiments in Zion Nuclear Power Plant geometry using prototypic materials, 19:12254 (R;US)

ZIRCONIUM
On zirconium conversion in superhigh-purity water production, 19:12510 (IA;RU;In Russian)
Problems of nuclear science and technology: Scientific-technical collection, 19:12504 (I;RU;In Russian)

ZIRCONIUM ALLOYS
See also ZIRCONIUM BASE ALLOYS
Assessment of niobium-base alloys for structural applications in the ITER divertor, 19:14105 (RA;US)
Density changes observed in Nb-1Zr after irradiation in FFTF-MOTA, 19:14104 (RA;US)
Production of zirconium-niobium-95 and scandium-46 at Hanford, 19:12222 (R;US)

ZIRCONIUM BASE ALLOYS
Deuterium absorption and material phase characteristics of SAES St 198 Zr-Fe Alloy: Revision 1, 19:12592 (R;US)
Investigations into the state of zirconium tubes of reactor channels after long-term operation in Kursk-1 reactor, 19:12505 (IA;RU;In Russian)
Irradiation growth of zirconium alloys, 19:12507 (IA;RU;In Russian)
On zirconium conversion in superhigh-purity water production, 19:12510 (IA;RU;In Russian)
Problems of nuclear science and technology: Scientific-technical collection, 19:12504 (I;RU;In Russian)
Study of protective properties of oxide films and tendency to local corrosion in zirconium-niobium alloys, 19:12506 (IA;RU;In Russian)

ZIRCONIUM OXIDES
Cost-effective ceramic machining: Summary of three-body wear experiments, 19:12589 (R;US)
Ion-irradiation-induced densification of zirconia sol-gel thin films, 19:12584 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Contract No.	Abstract No.	Report No.

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Codes Used on Index Lines

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document and the country of publication, e.g., (R;SU;In Russian). The language designator does not appear if the document is published in English.

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

☐ Charge to my ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no. _____

☐ Check/Money Order enclosed for $ _____

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions) _ _ _ _ _ _ _ _ _

Employer identification number (9 digits) —

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
Technology Administration
National Technical Information Service
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

IV. SELECTIONS

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
